Matt Blunt, Governor • Doyle Childers, Director

DEPARTMENT OF NATURAL RESOURCES

www.dnr.mo.gov

October 3, 2005

Mr. Larry Schepker
Deputy Commissioner
Office of Administration
Division of Budget and Planning
State Capitol, Room 124
Jefferson City, MO 65101

Dear Mr. Schepker:

I am pleased to submit the Department of Natural Resources' budget request for Fiscal Year 2007. The Governor set guiding principles for me when I was appointed Director of the Department of Natural Resources:

- To emphasize an even-handed approach to regulation and responsible implementation of environmental law; and
- To enhance, protect and utilize our natural, cultural and energy resources while demonstrating that this can be achieved without negatively affecting the environmental or economic vitality of the state.

Our FY07 budget focuses on the Governor's direction for natural resources and goals I have established for the department without increasing our FTE count and by providing a new general revenue offset, substantially larger, to cover the general revenue decision item being requested. The budget also presents the new organizational structure I have put in place to administer our new direction.

As soon as the FY06 budget was approved, the department's deputy directors, division directors, deputy division directors, other key staff and myself began a review of the department and its current functions and activities. We also identified possible organizational structures that would be the most conducive to accomplishing the goals and the priorities we identified. This effort lead to the determination that there would be no additional resources and whatever new initiatives were identified would have to come from a redirection of existing staff and financial resources.

We then began the next level of review by holding a series of meetings with several mid-managers within the department responsible for key programs. Approximately twenty-two

meetings were held in June and early July. This next level of review provided additional information to help solidify what was identified during the initial review, further identify relationships between the current divisions and programs, and identify possible implications that could occur as the result of a restructuring.

Concurrently while the internal reviews were being conducted I had several opportunities to meet with various external constituencies to share different thoughts and views and obtain their input. I also had heard from many of our constituents during my previous work as a legislator.

The decisions and recommendations we have made thus far are reflected in our FY07 budget request. The request encompasses a department restructuring, a redirection of current resources and four new decision items.

RESTRUCTURING

We are restructuring and adding critical elements necessary to make real change in how the state is to strike “a better balance between natural resource protection and doing things that spur economic growth.” Our new organization consists of Operations, Field Services, Environmental Quality, Geology and Land Survey and State Parks. The restructuring of the department was completed within the existing core budget; no new funds were necessary. I would like to briefly outline some of the changes made.

Operations

Operations encompasses the existing Director’s Office, Ombudsman Program, Policy, Communications, Legal and Administrative Support. The combination of these entities into one budgeting unit increases the efficiency of administration and combines the resources necessary to adequately manage a complex organization. By consolidating the functions I have been able to vacate the position of Director for the Division of Administrative Support. The Deputy Department Director of Operations has assumed that role.

A new function in the Director’s Office is the department’s Ombudsman initiative. In my many discussions with constituents it became clear that the director’s office needed “eyes and ears” in our communities who would report directly to me. The Ombudsmen will keep me abreast of emerging problems, issues of inconsistency of policy application across programs and regional offices, as well as providing constituent input and access to the director’s office. Their involvement with business, communities, and citizens will serve as my barometer on how well the department is performing. Ombudsmen positions are assigned to each of the department’s out-state offices, St. Louis, Kansas City, Springfield, Poplar Bluff, Rolla and Macon. Each ombudsman is independent, and will inform the regional director and myself of issues, concerns and problems, and assist in issue resolution.

Due to the importance of water and energy issues, I have assigned those important functions to the director’s office. While almost everyone understands the need and use of water, many take for granted its potentially limited capacity until it impacts them personally which is what happened to individuals and communities here in Missouri this summer. Additionally, the state

has been in constant struggles with other states and the Federal Government over flow issues of the Missouri River. In addition, energy issues focusing on cost, availability and conservation, continue to critically affect Missourians. Attaching these functions to the director's office assures a higher departmental profile and attention level.

Field Services Division

This new division is composed of functions that historically have had high field presence or supported field staff activities. These functions include our regional and satellite offices, the Environmental Services Program and Environmental Assistance Office. Each office will be staffed with services that reflect the documented needs of that area. For example, St. Louis and Kansas City have major needs in wastewater treatment, while the Macon region has a great need for expertise on confined animal feeding operations. There are plans to open satellite offices in Maryville, Rolla, West Plains, Hannibal and Portageville to further place staff in locations where their services are in the most demand. By placing staff where the needs are, we are cutting down on "windshield time," or time spent traveling by staff to statewide locations.

The Field Services Division staff will be the DNR team to implement our new compliance assistance efforts. Working with the permitted community to resolve issues is important as it costs less to prevent pollution, than to clean it up afterward. Compliance assistance is an initiative designed to work with a permittee in preventing or resolving compliance issues. Resolving compliance issues early will reduce enforcement activity and cost to both the permittee and taxpayers while achieving positive environmental impact.

Division of Environmental Quality

To improve coordination and communications between our environmental programs I have consolidated the environmental programs into one division, the Division of Environmental Quality. Given the interrelationship of air, water and land policy and regulation, it is more conducive to have these efforts combined under one division to provide better, coordinated responses and actions to issues or problems that are multifaceted.

Review and Revision of our Regulatory Process

To be complete in our assessment of our approach to our regulatory functions, we undertook a comprehensive review of the department's functions of permitting, inspections and enforcement. We are also in the process of enhancing our permitting process via the development of an online permit assistant to guide applicants through the application process and placing the most used permit applications on line as e-permits. As the result of these efforts we expect that over time we will be able to redirect staff resources from permitting to inspections. We believe an increased field presence for compliance assistance and inspection will increase compliance with permit requirements and thus improve Missouri's environmental quality.

REDIRECTION

SRF Opportunity

Several years ago the General Assembly asked the department if it was possible to use State Revolving Fund (SRF) interest earnings to make the principle and interest payments for general obligation bonds issued on behalf of the SRF program. After lengthy discussion with the Environmental Protection Agency (EPA), that proposal was denied. EPA did state however, that the state could use SRF interest earnings prospectively to make principle and interest payments on future bond sales made solely for SRF programs.

During the last legislative session, DNR was again asked if we could use interest earnings from SRF repayments to pay principle and interest payments of previously issued state match bonds. We again sought clarification from EPA. At first, EPA again denied our request; however, we continued to discuss new concepts on this issue with EPA. Based on our most recent discussions with EPA it appears that agency has changed their decision and will allow the state to use interest earnings from the SRF funds to pay the principle and interest payment for previously issued bonds sold for SRF purposes. We expect to receive an affirmative response from the national EPA office in the near future. When approved, there is sufficient interest earnings from August 2003, the date of EPA's first approval for use of SRF funds as debt service payments, to make the projected FY07 debt service payments of approximately \$7.9 million for the SRF portion of outstanding previously issued state Water Pollution Control bonds.

This could result in debt service payments of \$1 million for the bonds issued in 2002 and an additional \$7.0 million for the projected FY07 debt service payments for the SRF portion of the remaining previously issued state Water Pollution Control bond sales. This represents approximately \$6.9 million of General Revenue savings that will accrue to HB 1 for the FY07 budget.

We are requesting \$3,006,219 of the \$6.9 million General Revenue savings to fund our new decision items as outlined in discussions with EPA. The department is currently working on improving our permitting processes; we expect to realize savings related to these efforts. However, if we are to show these environmental results in the near future, additional resources are necessary now to bridge the time gap.

As a result of SB 225

Last year's SB 225, related to solid waste management and scrap tires, reduced the department's FTE by approximately 12.2. We redirected these FTE toward efforts to help us accomplish our goals. These efforts include 5 FTE for State Revolving Fund Compliance Assistance, 5.67 FTE for Operations (Accountability and Ombudsmen Program), and 1.49 FTE toward our Field Services initiative.

NEW DECISION ITEMS

As stated, I am not asking for any increase in FTE in my FY07 budget. The FTE requested in the new decision items have been offset by reductions of FTE in our core budget. The Customer Assistance Visits and Water Resources Initiatives general revenue decision item is offset by the general revenue reduction in House Bill 1. This decision item has four component parts; Initial Assistance Visits, Water Resources, Water Quantity and Water Quality Monitoring and Use Attainability Analyses Contract Efforts.

Customer Assistance Visits and Water Resources Initiatives

Initial Assistance Visits - 18 FTE - \$1,114,304

We are committed to a new strategy of automating the permit application process while improving the environment through an initial assistance visit with the permit recipient. Traditionally, considerable effort has been invested in writing very protective permits; however, many permit recipients have never been visited to ensure that they understand the environmental requirements of the permit and are following those requirements. Significant reduction of pollution, facilitated by the increased compliance is possible if the department is positioned to more readily assist the permit recipient at the beginning of the permit term. Providing assistance on the front end will help Missouri businesses and citizens stay in compliance with environmental laws and regulations and protect our environment in a timely manner.

Water Resources - 4 FTE - \$256,296

Additional resources will allow the department to continue working on state water planning and drought mitigation efforts. The 2005 drought underscored the need for more accurate evaluations of existing water resources. A more prompt response by the department in assessing drought conditions will greatly assist drought-affected businesses and communities.

Water Quantity and Water Quality Monitoring - \$1,348,981

The current groundwater-monitoring network consists of only 75 wells located in 58 of the 114 counties in Missouri. To address water supply issues, Missouri must expand the groundwater-monitoring network to better understand the depletion of groundwater resources.

To ensure surface water monitoring data continues to be collected, the department requests funding for stream gages within the Missouri and Mississippi River basins. In addition, the department requests funding to add approximately 19 stream gaging sites per year.

These two monitoring efforts will provide the necessary data to accurately assess the amount of drinking water available for public consumption; the vital component for planning to address potential drinking water shortages.

Use Attainability Analyses Contract Efforts - \$286,638

Upcoming revisions to the Missouri Water Quality Standards will require that over 22,000 miles of classified streams and more than 293,000 acres of classified lakes be protected for swimming and other recreational uses. Contract resources are necessary to conduct use attainability analysis on waterbodies, perform disinfection assessments and provide additional services to small wastewater treatment systems.

Jasper County Superfund Site

In addition, we request funds to satisfy the state's required ten percent match of the hazardous waste clean up costs associated with the Jasper County Superfund site. The site invoice is \$19,457,252; with the state's outstanding debt obligation being \$1,945,725. This new decision item requests funds to satisfy the full state match debt. A second option is to pay the obligation in two annual payments. It should also be noted that a third and preferable option is available. The department is working with EPA to use a new technology (phosphate stabilization) as an alternative treatment method in certain situations for the Jasper County lead sites. This "in kind" work, using the same funds we would otherwise pay directly to EPA, will serve as a direct reduction to Missouri's required match for the Jasper County lead site cleanup. We must satisfy this debt obligation to ensure Missouri is in the best possible position to receive federal assistance for future superfund cleanup,

County Courthouse Initiative Entertainer Tax Transfer - \$500,000

Many of the historic courthouse buildings are in disrepair and need renovation. Funding the historic county courthouse renovations begins to save the historic landmarks in our counties and creates savings for local governments.

Soil and Water District Benefits - \$258,243

The Soil and Water Districts Commissions requested a new decision item to increase the district grants appropriation to pay for the health and retirement benefits of the local Soil and Water District employees. This increase would bring district employee benefits more in line with state employees.

In closing, we will continue our efforts to enhance our out-state presence for compliance assistance and placing permit applications on line. Review of processes within the department will continue, including administrative processes, to maximize the finite resources we have to carry out these initiatives. We will better integrate our planning, policy and operations functions and review our major federal funding sources to seek additional opportunities and activities. Last but not least, performance measures and environmental results will be monitored to measure the progress our changes and new initiatives are having on the state's natural resources.

I am proud of the quantity and quality of time and effort that has been exerted thus far from all levels within the department in reshaping Missouri's natural resources agency. While a lot has

been accomplished, there is still much to do. I look forward to working with you and your staff in meeting the challenges of the upcoming budget session.

If you have any questions or would like to further discuss our budget request please contact me. We appreciate your and your staff's assistance and cooperation.

Sincerely,

DEPARTMENT OF NATURAL RESOURCES

A handwritten signature in black ink, reading "Doyle Childers". The signature is fluid and cursive, with the first name "Doyle" being more prominent than the last name "Childers".

Department of Natural Resources Overview

The Department of Natural Resources preserves, protects, restores and enhances Missouri's natural, cultural and energy resources and works to inspire their enjoyment and responsible use for present and future generations. We take seriously our responsibility of stewardship to protect and enhance the environment in which we work and live, and we will consider all aspects of the environment when making decisions.

Preserving, Protecting, Restoring and Enhancing Missouri's Natural Resources – The Department of Natural Resources works to ensure clean air, land and water by cleaning up pollution from the past, addressing pollution problems of today and identifying potential pollution issues of the future.

We work with citizens, including landowners, local governments, small businesses and industry, to protect Missouri's environment. Monitoring, partnerships, technical assistance and training allow the department the opportunity to help Missourians and to protect their natural resources.

The department enforces environmental rules and regulations related to air and water pollution; hazardous and solid waste; land reclamation; soil and water conservation and safe public drinking water. Regional and satellite offices provide assistance and outreach services on a local level.

The department interprets the state's geological and hydrological setting. We also interpret the character and availability of Missouri's water, energy and mineral resources, ensure the safety of dams and determine land boundaries. In addition, we preserve and restore our natural landscapes, ranging from natural prairies to Missouri's many caves.

Cultural Resources –Working with citizens and groups throughout Missouri, we identify, evaluate and protect the state's diverse range of historic, architectural and archaeological resources. The department also funds and coordinates surveys to identify historic, architectural and archaeological resources throughout Missouri.

Energy Resources – From following the market forces that affect gasoline prices to providing support and information on clean and renewable energy sources, the department works to protect the environment and stimulate the economy through energy efficiency and renewable energy resources and technologies. We provide technical and financial assistance for energy efficiency and renewable energy projects to state and local governments, school districts and other consumers. We also assist low-income Missourians in weatherizing their homes, helping them save money on the cost of heating and cooling.

Inspire Their Enjoyment...Missouri boasts over 140,000 acres of state parks and historic sites plus an extensive recreation easement agreement on 61,000 acres with the L-A-D foundation. Visitors can step back into the past to experience our state's history, explore Missouri's natural landscapes such as forests, prairies and savannas, and enjoy opportunities for hiking, bicycling, camping, picnicking, fishing and swimming. To further promote the visitors' understanding and appreciation of these resources, the department provides programs about these natural and cultural resources.

Whether bicycling in the shadow of Missouri River bluffs or strolling through the homes of the state's famous residents, visitors to the state's 83 state parks and historic sites plus the Roger Pryor Pioneer Backcountry can enjoy our natural and cultural resource diversity.

For More Information...An important element in the successful completion of the Department of Natural Resources' mission is helping Missourians and visitors who seek our services. The department offers a number of technical and educational services designed to help individuals, groups and businesses better understand our natural resources and the rules that exist to protect them. The department also maintains a vast amount of information available to the public in the form of fact sheets, guidance documents, geologic maps, technical books and publications on a wide variety of issues.

Est. Fringe	453,452	497,797	1,185,450	2,136,699
-------------	---------	---------	-----------	-----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

	FY2007 Governor's Recommendation				
	GR	Fed	Other	Total	
PS	852,051	1,018,199	2,424,728	4,294,978	
EE	138,818	319,026	776,838	1,234,682	E
PSD	0	0	0	0	
Total	990,869	1,337,225	3,201,566	5,529,660	E
FTE	19.82	23.86	58.56	102.24	

Est. Fringe	416,568	497,797	1,185,450	2,099,815
-------------	---------	---------	-----------	-----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: State Parks Earnings (0415); DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Solid Waste Management Fund (0570); NRP-Air Pollution Permit Fee (0594); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Hazardous Waste Fund (0676)

Notes: Estimated appropriations are requested for Contract Audits (Other Funds). The number of contract audits that will be conducted and the cost per audit is unknown. In addition, 25% flexibility is requested between General Revenue Personal Services and Expense and Equipment for FY2007.

2. CORE DESCRIPTION

Department Operations includes the Director's Office, Ombudsman, Communications, Policy, Legal and Administrative Support . Department Operations is responsible for the development of statewide environmental and natural resource policies. Department Operations also coordinates functional and programmatic interaction between the department's divisions and programs to ensure a consistent approach. Department Operations is responsible for the management of all organizational units within the department: the Field Services Division, Division of Environmental Quality, Division of Geology and Land Survey, Division of State Parks, Water Resources, Soil and Water Conservation Program and the Missouri Energy Center; as well as coordination with the Environmental Improvement and Energy Resources Authority and Petroleum Storage Tank Insurance Fund Board.

Department Operations also includes the department's Ombudsman initiative. Physically located throughout the state, the ombudsmen inform the department director and regional directors of emerging problems, issues of inconsistency of policy application across the programs and regional offices, as well as providing a mechanism for constituent input and access to the director's office.

CORE DECISION ITEM

Department of Natural Resources Department Operations Department Operations Core	Budget Unit <u>78111C</u>			
<p>Department Operations provides departmental focus on key outcomes and works to ensure decisions are made which result in real environmental improvements. Participation in interstate river associations and reviewing environmental impact statements for highway construction projects work to ensure decisions made result in environmental improvements. Department Operations seeks to improve efficiency of departmental actions, drive customer focused initiatives and ensure public participation in DNR's decision-making. Department Operations is also the focal point for providing information and assistance to state and national legislative bodies, and the oversight of issues of state and national importance.</p> <p>Administrative Support includes the functions of budget development, financial resource allocations, internal audit, accounting, human resources, procurement, grants management and general services.</p>				
3. PROGRAM LISTING (list programs included in this core funding)

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78811C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: DEPARTMENT OPERATIONS	DIVISION: DEPARTMENT OPERATIONS

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

The department can more effectively operate by allowing 25% flexibility in the General Revenue Fund Personal Service and Expense and Equipment appropriations. Flexibility allows the department to contract various services, if necessary, when existing resources are not sufficient, the need is temporary or when vacancies are difficult to fill. Flexibility allows the department to address emerging issues without a permanent increase in appropriation levels.

DEPARTMENT REQUEST	GOVERNOR RECOMMENDATION																														
Department Operations is requesting 25% flexibility within its General Revenue PS and E&E appropriation authority. The information below shows a 25% calculation of both the General Revenue PS and E&E FY 07 budgets.	The governor recommended 25% GR flexibility on both PS and E&E.																														
<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Section</th> <th style="width: 15%;">PS or E&E</th> <th style="width: 15%;">Core</th> <th style="width: 15%;">% Flex Requested</th> <th style="width: 15%;">Flex Request Amount</th> </tr> </thead> <tbody> <tr> <td></td> <td>PS</td> <td>\$927,495</td> <td>25%</td> <td>\$231,874</td> </tr> <tr> <td></td> <td>E&E</td> <td>\$138,818</td> <td>25%</td> <td>\$34,705</td> </tr> </tbody> </table>	Section	PS or E&E	Core	% Flex Requested	Flex Request Amount		PS	\$927,495	25%	\$231,874		E&E	\$138,818	25%	\$34,705	<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Section</th> <th style="width: 15%;">PS or E&E</th> <th style="width: 15%;">Core</th> <th style="width: 15%;">% Flex Gov Rec</th> <th style="width: 15%;">Flex Gov Rec Amount</th> </tr> </thead> <tbody> <tr> <td></td> <td>PS</td> <td>\$852,051</td> <td>25%</td> <td>\$213,013</td> </tr> <tr> <td></td> <td>E&E</td> <td>\$138,818</td> <td>25%</td> <td>\$34,705</td> </tr> </tbody> </table>	Section	PS or E&E	Core	% Flex Gov Rec	Flex Gov Rec Amount		PS	\$852,051	25%	\$213,013		E&E	\$138,818	25%	\$34,705

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

1. What does this program do?

Department Operations includes the Director's Office, Ombudsman, Communications, Policy, Legal and Administrative Support . Department Operations is responsible for the development of statewide environmental and natural resource policies. Department Operations also coordinates functional and programmatic interaction between the department's divisions and programs to ensure a consistent approach. Department Operations is responsible for the management of all organizational units within the department: the Field Services Division, Division of Environmental Quality, Division of Geology and Land Survey, Division of State Parks, Water Resources, Soil and Water Conservation Program and the Missouri Energy Center; as well as coordination with the Environmental Improvement and Energy Resources Authority and Petroleum Storage Tank Insurance Fund Board.

Department Operations also includes the department's Ombudsman initiative. Physically located throughout the state, the ombudsmen inform the department director and regional directors of emerging problems, issues of inconsistency of policy application across the programs and regional offices, as well as providing a mechanism for constituent input and access to the director's office.

Department Operations provides departmental focus on key outcomes and works to ensure decisions are made which result in real environmental improvements. Participation in interstate river associations and reviewing environmental impact statements for highway construction projects work to ensure decisions made result in environmental improvements. Department Operations seeks to improve efficiency of departmental actions, drive customer focused initiatives and ensure public participation in DNR's decision-making. Department Operations is also the focal point for providing information and assistance to state and national legislative bodies, and the oversight of issues of state and national importance.

Administrative Support includes the functions of budget development, financial resource allocations, internal audit, accounting, human resources, procurement, grants management and general services.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Not applicable

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

Department Operations oversees and coordinates environmental and natural resources responsibilities for which the state has elected thorough environmental statutes to seek delegation of federal programs.

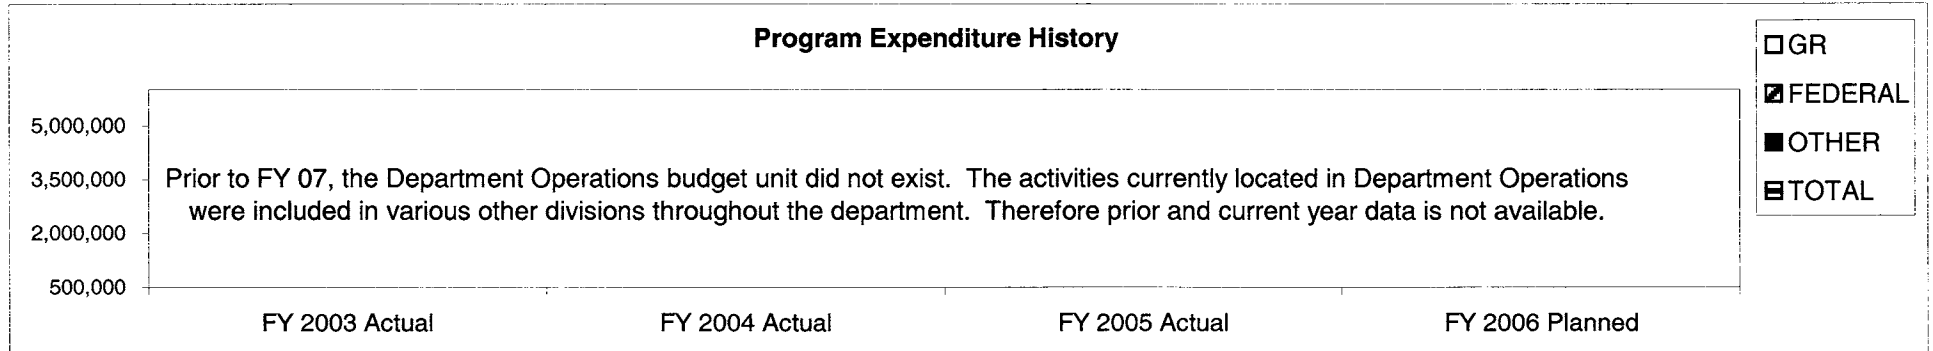

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

5. Provide actual expenditures for the prior three fiscal years.

6. What are the sources of the "Other" funds?

Not applicable. See note above.

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

7a. Provide an effectiveness measure.

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

Number of Missouri, Mississippi & White River operation presentations

Note: The department currently has 726 vehicles. Statute requires 50% of vehicles purchased be alternative fuel, which is approximately 376 vehicles. The department has purchased 221 alternative fuel vehicles which is 53%.

Note: The department's goal would be to audit 100% of core revenues and expenditures on a three year cycle. This measure does not reflect goals associated with program audits or audits of sub-grantees and contractors.

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

7b. Provide an efficiency measure.

Prior to FY 07, the Department Operations budget unit did not exist. The activities currently located in Department Operations were included in various other divisions throughout the department. Therefore prior and current year data for Department Operations expenditures is not available.

Prior to FY 07, the Department Operations budget unit did not exist. The activities currently located in Department Operations were included in various other divisions throughout the department. Therefore prior and current year data for Department Operations FTE is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

7c. Provide the number of clients/individuals served (if applicable)

* Field Services Division	339.28 FTE
* Division of Environmental Quality	478.41 FTE
* Division of State Parks	736.96 FTE
* Division of Geology and Land Survey	71.49 FTE
* Water Resources	28.46 FTE
* Soil and Water Conservation	54.86 FTE
* Missouri Energy Center	24.00 FTE

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Cost Allocation Fund (0500)									
Note: The department requests 25% General Revenue flexibility for FY 2007.									
2. CORE DESCRIPTION									
Water Resources staff provide information for Missouri's comprehensive water needs by examining surface water use and availability, monitoring and providing technical assistance regarding drought and flood conditions, preparing lake capacity and future supply studies and utilizing stream gages to provide water quantity evaluations to determine community sustainable yields. Staff chair the Climate and Weather Subcommittee of the Statewide Drought Assessment Committee, are principal authors of the Missouri Drought Plan and maintain a record of the major users of water in the state. Water Resources also administers the provisions of the Missouri Dam and Reservoir Safety Law. The department regulates all nonfederal, nonagricultural dams 35 feet and higher through inspections, registration and construction permits and inspections. Other sections of Water Resources investigate water supply issues, collect and distribute groundwater-level data from a statewide network of observation wells, evaluate all public water supply bedrock wells and provide casing and total depth specifications, respond to public inquiries on a variety of water issues, advise communities on aquifer locations and contamination potential and complete water tracing on spring recharge areas to identify contamination sources. Water Resources completes regional water assessments that evaluate water problems, needs, and opportunities and focus efforts on watershed priorities. Hydrologists perform highly complex technical analysis to determine the benefits or adverse impact of interstate river operations and resultant water quantity impacts for the state of Missouri. Staff provide analytical support on legal challenges and are involved in negotiations with other states on water quantity issues.

Unexpended (All Funds)	N/A	273,988	310,185	N/A
Unexpended, by Fund:				
General Revenue	11,204	13,824	43,045	N/A
Federal	172,821	260,164	267,140	N/A
Other	0	0	0	N/A
	(1)	(1)	(2)	

Actual Expenditures (All Funds)

Fiscal Year	Actual Expenditures (All Funds)
FY 2003	1,486,992
FY 2004	1,326,644
FY 2005	1,330,279

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) FY03 and FY04 appropriations and expenditures include both the Water Resources and Dam & Reservoir Safety Programs that were consolidated in FY05.

(2) \$43,045 in General Revenue lapsed due to vacancies in positions for dam safety inspections and river basin activities. The remaining lapse is in both federal personal service and expense and equipment. The program continuously looks for federal funding opportunities in the areas of dam safety, water supply evaluations and other general water resources areas.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78518C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: WATER RESOURCES	DIVISION: WATER RESOURCES

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

Water Resources staff provide information for Missouri's comprehensive water needs by examining surface water use and availability, monitoring and providing technical assistance regarding drought and flood conditions, preparing lake capacity and future supply studies, and utilizing stream gages to provide water quantity evaluations. The 2005 drought has underscored the need for more accurate evaluations of existing water resources. Flexibility will enhance our ability to address specific community needs or to help solve specific water resource problems by collecting essential data.

DEPARTMENT REQUEST					GOVERNOR RECOMMENDATION				
Water Resources is requesting 25% GR flexibility on both PS and E&E, based on our FY2007 budget request.					The governor recommended 25% GR flexibility on both PS and E&E.				
Section	PS or E&E	Core	% Flex Requested	Flex Request Amount	Section	PS or E&E	Core	% Flex Gov Rec	Flex Gov Rec Amount
Water Resources	PS	\$774,736	25%	\$193,684	Water Resources	PS	\$774,736	25%	\$193,684
	E&E	\$143,915	25%	\$35,979		E&E	\$143,915	25%	\$35,979

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78518C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: WATER RESOURCES	DIVISION: WATER RESOURCES

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$6,100 General Revenue PS \$ 0 General Revenue EE	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly. FY2006 Flex Approp (Estimate 25% of GR PS) \$191,316	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly. FY2007 Flex Request (25% of GR PS) \$193,684

3. Was flexibility approved in the Prior Year Budget or the Current Year Budget? If so, how was the flexibility used during those years?

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
FY05 flexibility was used to pay various E&E costs such as increased fuel and utilities, as well as miscellaneous supplies including groundwater monitoring network equipment.	The program continues to see increases in ongoing expenses for items such as fuel, without a corresponding increase in expense & equipment (E&E). The flexible language allows the division to address these issues without a permanent increase in appropriation levels.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Water Resources

1. What does this program do?

Water Resources staff provide information for Missouri's comprehensive water needs by examining surface water use and availability, monitoring and providing technical assistance regarding drought and flood conditions, preparing lake capacity and future supply studies and utilizing stream gages to provide water quantity evaluations to determine community sustainable yields. Staff chair the Climate and Weather Subcommittee of the Statewide Drought Assessment Committee, are principal authors of the Missouri Drought Plan and maintain a record of the major users of water in the state. Water Resources also administers the provisions of the Missouri Dam and Reservoir Safety Law. The department regulates all nonfederal, nonagricultural dams 35 feet and higher through inspections, registration and construction permits and inspections. Other sections of Water Resources investigate water supply issues, collect and distribute groundwater-level data from a statewide network of observation wells, evaluate all public water supply bedrock wells and provide casing and total depth specifications, respond to public inquiries on a variety of water issues, advise communities on aquifer locations and contamination potential and complete water tracing on spring recharge areas to identify contamination sources. Water Resources completes regional water assessments that evaluate water problems, needs, and opportunities and focus efforts on watershed priorities. Hydrologists perform highly complex technical analysis to determine the benefits or adverse impact of interstate river operations and resultant water quantity impacts for the state of Missouri. Staff provide analytical support on legal challenges and are involved in negotiations with other states on water quantity issues.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 236.400-236.500	Dam, Mills, & Electric Power
RSMo 256.170	Geologic Hazard Assessment
RSMo 256.060	Survey of water resources of state
RSMo 256.200	Commission to collect & coordinate water data
RSMo 256.400-256.430	Water Usage Law, users to file registration
RSMo 256.435	Multipurpose Water Resources Program to ensure public water supply storage
RSMo 640.400-640.430	Negotiation of interstate compacts, surface & groundwater monitoring, state water resources plan and annual report, and special water protection areas
RSMo Chapter 257	Water Conservancy Districts

3. Are there federal matching requirements? If yes, please explain.

Headwater Wetlands in Agriculture Areas in Missouri	25% State
National Dam Safety Assistance Award	100% Federal
Pesticides Monitoring	100% Federal
Establishing a Dollar Value for Wetlands Under Past, Present and Future Conditions in Missouri	25% State

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Water Resources

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: FY03 and FY04 expenditures include both the Water Resources and Dam & Reservoir Safety Programs that were consolidated in FY05. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other" funds?

Not applicable

7a. Provide an effectiveness measure.

Number of groundwater monitoring wells in statewide network equipped with satellite telemetry technology

Notes: The department's goal of 200 wells would allow the state to have at least one well per county with additional wells in the areas of highest groundwater usage (based on approx. 1 well per 3 billion gallons used).

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Water Resources

Cumulative number of water quantity evaluations for Public Water Suppliers (utilizing surface water reservoirs)

Note: Utilizing the RESOP computer program and lake bathymetry studies, which perform water budgets during the critical period of record, our staff provide these specialized services to assist the local communities. This was a new measure in FY05, therefore some prior year projected data is not available.

7b. Provide an efficiency measure.

Number of regulated dams in compliance with Missouri's Dam Safety Law

Note: Prior to FY04, permit renewal inspections were conducted by state engineers. In FY04, due to state budget reductions, dam owners were required to retain private engineers to inspect their dams. This resulted in compliance violations. This was a new measure in FY05, therefore some prior year projected data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Water Resources

7c. Provide the number of clients/individuals served, if applicable.

Number of Missourians served by protecting the quantity of water in the Missouri River for water supply purposes

	FY2002	FY2003	FY2004	FY2005
Individuals using Missouri River for drinking water	1,904,154	1,943,721	1,983,289	2,423,105

Note: Other benefits of the program's work to ensure that the Missouri River has adequate flow include: recreation, agriculture (irrigation and livestock), flood control, fish and wildlife, water commerce, and industrial usage. Approximately 50% of Missouri's population relies on water in the Missouri River as a source of drinking water.

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Not applicable									
<p>Governor's Recommendations do not include personal services or FTE. The department plans to continue to implement our new compliance assistance activities. This funding is to act as a bridge for two fiscal years to avoid delaying implementation of the program. During that time we will be simplifying the permitting process and redirecting those efforts to the Initial Assistance Visits initiative. Since personal services and FTE were not recommended, the department is reviewing its existing permitting and other environmental activities to determine the best option for contract services. The department will then contract for those services and our existing FTE will be redirected to the Initial Assistance Visits initiative. This initiative is critical to achieving the positive results of our reorganization efforts. Working with the permitted community to resolve issues is important as it costs less to prevent pollution, than to clean it up afterward. In addition, the department plans to contract for the water resources activities requested in the new decision item.</p>

Department of Natural Resources	Budget Unit 78518C; 78115C; 78847C
Department of Natural Resources	
Customer Assistance Visits and Water Resources Initiative	1780001
3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.	
<p>In order to increase compliance throughout the state and to quantify and protect Missouri's natural resources, the department needs additional resources to provide front line compliance assistance across all environmental media, and to monitor and assess the state's water resources.</p> <p>Initial Assistance Visits: The department is committed to a new strategy of simplifying the permit process while improving the environment through follow-up with the permit recipient. Traditionally, considerable effort has been invested in writing very protective permits; however, many permit recipients have never been visited to ensure that they understand the permit and are following the permit conditions. Significant reduction of pollution, facilitated by increased compliance, is possible if the department is positioned to more readily assist the permit recipient. We are redirecting resources saved in the permitting process toward this effort; however, it will take one to two years to fully make this transition if we depend on the resultant savings. We have shared our plans with EPA, who is supportive of our immediate attention to this effort - instead of waiting one to two years for Missouri citizens to utilize the value of these changes. An expansion of this program is needed in order to fully implement the concept. Increased assistance should mean less enforcement, and follow-up will be required by the agency to meet permit requirements.</p> <p>Water Resources Staff: Staff are needed to enable the department to continue working on state water planning, drought mitigation efforts, and major water user reporting. The 2005 drought has underscored the need for more accurate evaluations of existing water resources. This expansion item will allow the department to evaluate and interpret water quantity information that can be used to address statewide water issues. The department will then be in a better position to make recommendations on where their limited funding resources need to be focused, such as public water supply. A more prompt response by the department in assessing drought conditions will enable drought-affected businesses and individuals access to federal relief funding. This will enable the department to do more analysis of the data that is being collected and apply it in resolving the state's water needs.</p> <p>Groundwater Monitoring Efforts: The groundwater monitoring network was established in the 1950's as a result of severe drought conditions. The department continues to address drought issues, as well as flood and water supply issues from a statewide, regional and local perspective. The current groundwater monitoring network consists of only 75 wells located in 58 of the 114 counties in Missouri. To address water supply issues, the state needs to expand the groundwater monitoring network to evaluate groundwater quantity for all portions of the state. Data gathered from the network gives local, regional and state officials the necessary information to make both short-term and long-term decisions about water supply issues. Not all counties are represented and many areas of the state have experienced increased development and need better information to make water supply decisions. The department's goal is to maintain a monitoring well in each county of the state and additional wells in counties where groundwater use exceeds three billion gallons per year. Resources are needed to allow the network to grow by approximately 40 wells per year for the next two years.</p>	

NEW DECISION ITEM RANK: <u>005</u> OF <u>009</u>	
Department of Natural Resources	Budget Unit <u>78518C; 78115C; 78847C</u>
Department of Natural Resources	
Customer Assistance Visits and Water Resources Initiative	1780001
<p>Surface Water Monitoring Efforts: Through a cooperative agreement with the United States Geological Survey (USGS), the department supports the operation of several stream gages that collect flow data that are used in the department's work to address both water quality and quantity issues in the state. Gages on tributaries of the Missouri River are extremely important in defending the uses of this river in our state. In FY05, funding for these gages was eliminated from DNR's budget. The Missouri Department of Conservation assumed the responsibility for funding these gages in FY05 and FY06. The department is dependent upon consistent, long-term data collected from these gages to address water quality and quantity issues.</p> <p>New Surface Water Monitoring Efforts: Regional stream flow data is a key component of the drought assessment process. However, for drought assessment purposes, the current network of stream gages operated by the USGS does not provide adequate stream flow coverage in 38 counties. The department's goal is to monitor stream flows in every county of the state. Resources are needed to add approximately 19 stream gaging sites per year for two years.</p> <p>Drinking Water Reservoir Monitoring Efforts: An accurate assessment of the amount of drinking water available for public consumption is vital in planning for potential drinking water shortages. Through FY05, water quantity evaluations have been performed on 33 surface water reservoirs. Resources are needed to install staff gages in each of the reservoirs that has been studied and in all future reservoirs as the analyses are completed.</p> <p>Use Attainability Analysis: Upcoming revisions to the Missouri Water Quality Standards will require that over 22,000 miles of classified streams and over 293,000 acres of classified lakes be protected for swimming and other recreational uses, wherever attainable. Owners or operators of wastewater treatment systems will be required to disinfect effluent, unless it can be shown, through (1) an evaluation that disinfection is not required in order to meet bacteria standards in the classified stream or (2) a Use Attainability Analysis that the classified stream below the facility cannot support swimming. Additional resources will be necessary to hire contractors to perform the Use Attainability Analyses. These studies equip the department with the information needed to make decisions on water quality standards.</p>	

NEW DECISION ITEM RANK: <u>005</u> OF <u>009</u>	
Department of Natural Resources	Budget Unit <u>78518C; 78115C; 78847C</u>
Department of Natural Resources	
Customer Assistance Visits and Water Resources Initiative	1780001
4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)	
<p>Initial Assistance Visits: Existing resources sufficient to conduct 1,075 initial assistance visits will be redirected in FY 2006. It is estimated that one FTE will conduct 380 visits per year. Based on the projection of 6,362 permits being issued in FY 2006 and an existing universe of over 21,000 facilities, 18 FTE are needed to fulfill this initiative. Due to the fact that these staff will be continually deployed in the field, expense and equipment for in-state travel has been increased over the standard by \$36,017, or \$2,000 additional per FTE. Other Expense and Equipment amounts are based on the department's standard per FTE.</p> <p>Water Resource Staff: Four staff are needed. One Environmental Engineer III will supervise the State Water Planning unit and will work with the program director to ensure the state's needs are being met; one Environmental Engineer II will provide engineering, and hydrologic/hydraulic expertise to improve the technical abilities of the unit and incorporate surface water and groundwater modeling; and two Hydrologist III's will provide hydrologist expertise and help bridge the gap between the groundwater and surface water work. The hydrologists will be responsible for working with major water users in the state to develop a more comprehensive estimate of how much water is being consumed and by whom so that adequate water resources are ensured for the future. Expense & Equipment amounts are based on the department's standard per FTE.</p> <p>New Groundwater Monitoring Efforts: Estimated contract cost for drilling 40 wells per year: $\\$8,500 \times 40 = \\$340,000$. This is an estimate since the actual cost of the well is dependent on location, depth, etc. Satellite connection through USGS = \$10,000. Laptop computers for network: $\\$2,647 \times 3 = \\$7,941$. Monitoring equipment: $\\$8,000 \times 40 = \\$320,000$.</p> <p>Surface Water Monitoring Efforts: The annual maintenance costs for the 8 stream gaging sites currently being funded by the Missouri Department of Conservation includes 50/50 match with USGS: $\\$6,350 \times 8 = \\$50,800$.</p> <p>New Surface Water Monitoring Efforts: The stream gaging costs are broken down into installation and maintenance costs. The total cost of stream gaging assuming 50/50 match with USGS is \$566,200; this includes installation and maintenance of 38 new gages in the first year. Installation of new gages: $\\$8,500 \times 38 = \\$323,000$; maintenance for new gages: $\\$6,400 \times 38 = \\$243,200$. Additionally, water quality monitoring: $\\$2,000 \times 20 \text{ sites} = \\$40,000$. Drinking Water Reservoir Monitoring Efforts:</p>

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Clarence Cannon Dam Transfer and Payments

1. What does this program do?

The Army Corps of Engineers and the state of Missouri entered into a contract in 1988, obligating the state to repay the Corps for building a 20,000 acre-feet water supply storage into the Clarence Cannon Dam and Mark Twain Lake project. As long as the state makes no use of its share of the 20,000 acre-feet of water, payment is limited to 3.137 % interest on the unpaid project and a portion of the overall project's operation and maintenance expenses. The state is billed in the spring of each year for interest and operations and maintenance expenses for the previous year. The Clarence Cannon Wholesale Water Commission markets and develops water from the Mark Twain Lake, and has been conveyed additional water storage rights.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

PL 87-874 (Water Supply Act of 1958, as amended)
RSMo 256.290; 393.700-770

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No, although the contract contains a provision that if funds are not appropriated for repayment of the contract amount, the contract will be terminated and control of the water-supply storage reverts to the Corps of Engineers. The state would be considered in default of the obligation, which could adversely affect the State's bond rating.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

FY06 Planned expenditures are shown at full appropriation spending.

This decision item was included in the Office of Administration's budget during the FY03 - FY05 timeframe; it will be transferred to the DNR in the FY07 Budget.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Clarence Cannon Dam Transfer and Payments

6. What are the sources of the "Other " funds?

Water Development Fund (0174)

Cash is transferred from General Revenue to the Water Development Fund for payment to the Corps of Engineers.

7a. Provide an effectiveness measure.

Compliance with contract and statutes

7b. Provide an efficiency measure.

Payment has been remitted by the deadline for 10 fiscal years.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

2. CORE DESCRIPTION									
Funding this core item will allow the department to continue Missouri's proactive efforts to address soil erosion and related water quality problems on a watershed basis through voluntary means. The critical roles of our voluntary conservation programs are locally and nationally acclaimed as very successful means to help reduce soil erosion and improve agricultural related water quality problems. Missouri's efforts are being mirrored around the country. The Soil and Water Districts Commission and the Soil and Water Conservation Program (SWCP) provide leadership and support, both financial and technical, to 114 soil and water conservation districts. The SWCP staff assist the 114 soil and water conservation districts throughout the state in the reduction of agricultural erosion and sediment runoff to maintain the land's productivity. The staff processes between eight to ten thousand applications from landowners and districts that provides over \$30 million in financial reimbursement for the installation of soil conservation practices and operation of district support programs. The SWCP has soil science technical staff that provide soil surveying, mapping, and interpretation for hundreds of thousands of acres across the entire state of Missouri. Soil surveys are extremely critical in natural resource planning, management and documentation as they identify specific soil types and soil characteristics. Agricultural landowners, local governments, developers and others refer to these surveys as a primary resource to determine the appropriate use of a specific soil, for example, a pond or lake. Funding from these programs is applied to agricultural working lands, which produce the crops that support the state's agricultural economy. The support staff and district coordinators are responsible for providing training and support for over 300 district employees throughout the state and over 700 attendees at the annual Soil and Water Training Conference.

Federal	0	15,000	0	N/A
Other	108,181	278,711	684,693	N/A

(1)

(2)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Hiring freezes have prevented the program from maintaining full staff, resulting in lower expenditures. We do not anticipate this trend to continue.

(2) Professional consultant service projects and contracts not finalized in FY05 resulting in a lapse of appropriation authority of approximately \$500,000. Contracts for these services are in place for FY06.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation Program

1. What does this program do?

The Soil and Water Conservation Program (SWCP) administers voluntary programs developed by the Soil and Water Districts Commission and funded by the Soil and Water Sales Tax to conserve Missouri's soil and water resources for agricultural production. The SWCP staff assist the 114 soil and water conservation districts throughout the state in the reduction of agricultural erosion and sediment runoff to maintain the land's agricultural productivity. The staff processes between eight to ten thousand applications annually from landowners and districts that provide over \$30 million in financial assistance for the installation of soil conservation practices and the operation of the district. Costs of these conservation practices are such that landowners could not afford them without the financial assistance from the Soil and Water Conservation sales tax. The SWCP has soil science technical staff that provide soil surveying, mapping, and interpretation for hundreds of thousands of acres across the entire state of Missouri. Soil surveys are extremely critical in natural resource planning, management and documentation as they identify specific soil types and soil characteristics. Agricultural landowners, local governments, developers and others refer to these surveys as a primary resource to determine the appropriate use of a specific soil, for example, a pond or lake. The support staff and district coordinators are responsible for providing training to over 300 district employees throughout the state and over 700 attendees at the annual Soil and Water Training Conference, as well as generating approximately 10,000 checks for cost share recipients and district grants.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Missouri Constitution, Article IV, Section 47a Sales and Use Tax Levied for Soil and Water Conservation
RSMo. 278.080 Soil and Water Conservation Districts

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2006 Planned reflects full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

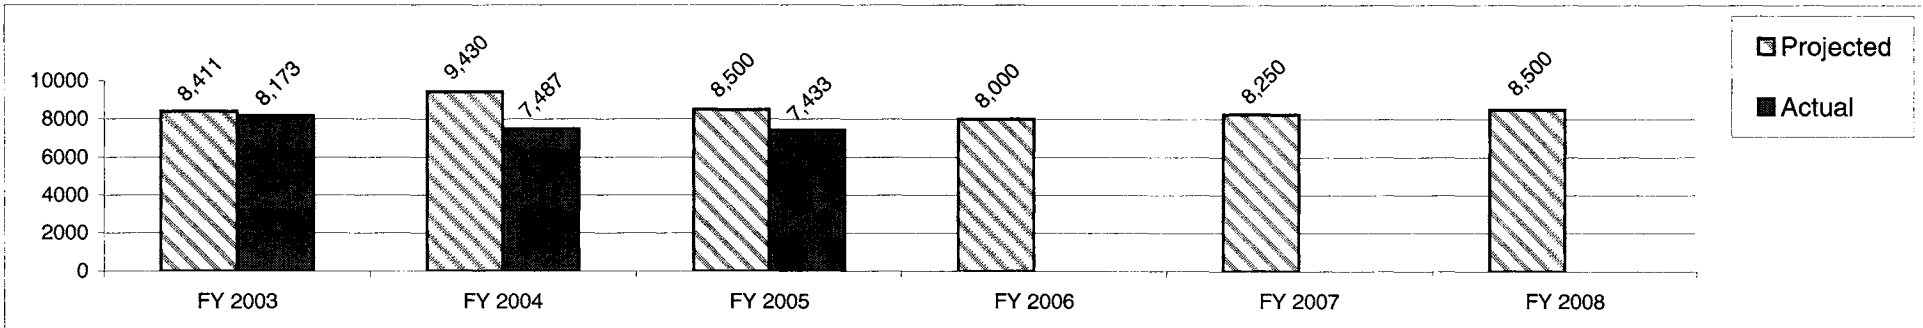

Program is found in the following core budgets: Soil and Water Conservation Program

6. What are the sources of the "Other " funds?

Soil and Water Sales Tax Fund (0614)

7a. Provide an effectiveness measure.

Number of requests staff processed for grant payments

Note: FY04 actuals are lower due to a wet spring which caused fewer cost share practices to be installed and reimbursed during the FY04 timeframe.

Number of acres surveyed, updated, and analyzed concerning Missouri's soils

Note: The initial soil survey work was completed during FY02, updates begin in FY03 and the higher actuals in FY04 includes special project work. The special project opportunities from the FY04 initiatives resulted in higher FY05 actuals as well as projections through FY08 to maintain that level of work.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation Program

7b. Provide an efficiency measure.

Program operation expenditures compared to program specific distribution expenditures

Note: Calculation shows total personal service and expense and equipment expenditures compared to PSD expenditures from the core and reappropriations. A projected calculation with PSD reappropriations sized to address multi-year project encumbrances would skew the percentage calculation. Therefore the projected measure is not shown.

7c. Provide the number of clients/individuals served, if applicable.

Number of clients served by incentive grants

Notes: Clients include landowner applicants and district offices. Incentive Grants include district grants, cost share and Special Area Land Treatment (SALT) cost share financial assistance.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation Program

7d. Provide a customer satisfaction measure, if available.

Voting Citizen Tax Renewal Approval Rate

Note: The Parks and Soils Sales Tax will be voted on again in 2006 as a result of the passage of SJR1. This joint resolution modifies the constitution, upon voter approval, by resubmitting the parks and soils sales tax to the voters every 10 years, beginning in 2006.

Percentage of landowner claims processed without denial/appeal

Note: This measure assumes a satisfied landowner is one whose claims have met all requirements and were processed with no need for a denial/appeal process with the Soil and Water Districts Commission.

Note: An "E" is requested for Soil Sales Tax Fund pass through appropriations.									
2. CORE DESCRIPTION									
Cost Share reimbursement grants are provided to landowners for part of the cost of installing best management practices which prevent or control excessive erosion on agricultural land. The practices are designed to maintain soil productivity and prevent continued degradation of water quality of rivers and streams. The Special Area Land Treatment (SALT) program Agricultural Non Point Source best management practice projects are designed to reduce erosion and sedimentation, chemical and nutrient runoff from cropland, improve pasture management, protect and enhance riparian corridors, improve animal waste management, reduce runoff from irrigated cropland and better integrate general awareness of agriculture's protection of water quality. These projects are multi-year projects offering technical and financial assistance to landowners in a watershed for non point source issues associated with production agriculture. Various local, state and federal partners may support these projects also. The District Grants Program provides grants for the operation of each district. The local district board specifically budgets how the grants will be spent depending on the needs of that district. Funding is provided for managerial/clerical personnel, technical personnel, information/education programs, equipment and general administrative expenses. While these grant funds do provide support to landowners that participate in the cost-share and loan interest-share programs, they also fund technical assistance and information/education programs for landowners and residents of the soil and water district who may not participate in these programs. The Loan Interest Share Program provides reimbursement for a portion of the interest paid on private loans used to finance standard erosion control practices or the purchase of approved conservation tillage equipment. Research Grants are awarded to Missouri State colleges and universities for research projects to support the goals of the soil and Water Districts Commission. The program also provides funding for projects that demonstrate conservation management practices on private lands, as well as providing technical assistance as requested to the Districts.

Actual Expenditures (All Funds)	24,680,962	21,735,664	33,130,092	N/A	
Unexpended (All Funds)	10,937,230	13,882,528	2,761,100	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	100,000	82,962	79,731	N/A	
Other	10,837,230	13,799,566	2,681,369	N/A	

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) FY06 core appropriations are as follows: Demonstration Projects and Technical Assistance at \$100,000 Federal; Grants to Districts at \$8,143,032; Cost Share at \$20,250,000 "E"; Loan Interest Share at \$300,000 "E"; Special Area Land Treatment at \$6,896,200 "E"; and Research Grants at \$160,000 "E".

Past expenditures for the Soil and Water Conservation PSD programs have been made through reappropriations as well as core appropriations due to the multi-year nature of the projects. In addition to the core spending shown above, there were expenditures through reappropriations of \$9,055,627 in FY03 and \$9,896,391 in FY04. For FY05 and future fiscal years, the core appropriations for most of these programs are estimated appropriations because there no longer is an operating reappropriation house bill. The estimated appropriations will be used to encumber and pay the multi-year project obligations of the fund.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation PSDs

Program is found in the following core budget(s): Soil and Water Conservation PSDs

1. What does this program do?

The Soil and Water Conservation Program Specific Distributions consists of many financial assistance programs and projects. Grants to Districts provides funds that may be used to fund field technical assistance efforts, management/clerical assistance, health insurance and retirement, and information/education activities in 114 local soil and water conservation districts to promote soil conservation. Each district receives grants that support the operational costs of running the district. The district board budgets how the grants will be spent depending on district needs. The Cost Share, Loan Interest Share, and Special Area Land Treatment programs provide financial incentives to landowners through cost-share grants and interest buy-down on loans for improved agricultural practices and for conservation improvement to their working land. While these programs provide for up to 75% of the estimated or actual cost (whichever is lower), the landowner is responsible for 25%, or more, of the actual costs to install soil conservation measures or purchase conservation equipment. These programs fund practices which are designed to maintain soil productivity and prevent continued degradation of water quality of rivers and streams. The cost of these measures is such that landowners may not be able to afford the additional installation costs for soil conservation without financial assistance from the Soil and Water Conservation Program. The Soil and Water Research Grants provide funding to support soil conservation related research to gather data for the development and refinement of programs. The program also provides funding for projects that demonstrate conservation management practices on private lands, as well as providing technical assistance as requested to the Districts.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Missouri Constitution, Article IV, Section 47a
RSMo. 278.080

Sales and Use Tax Levied for Soil and Water Conservation
Soil and Water Conservation Districts

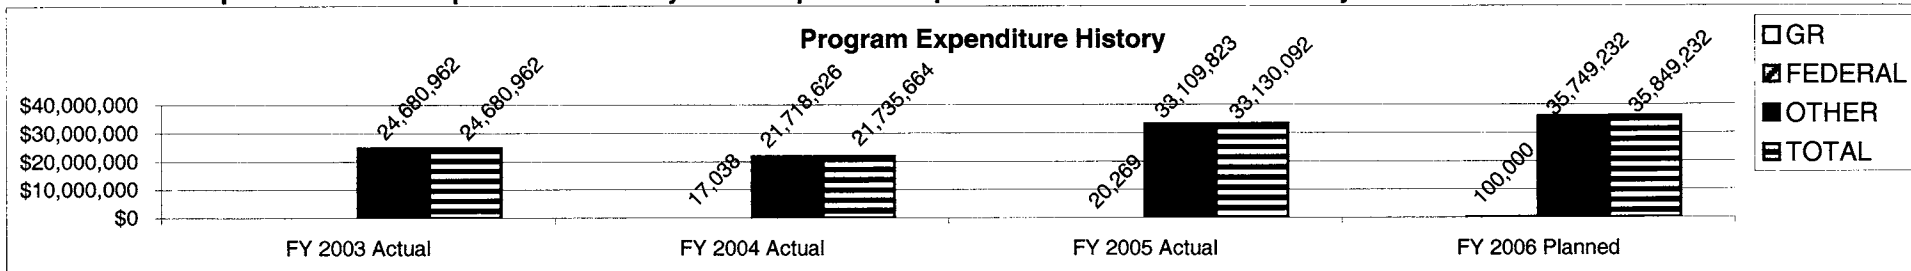

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

(Notes continue on following page.)

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation PSDs

Program is found in the following core budget(s): Soil and Water Conservation PSDs

Notes (continued): FY06 core appropriations shown as budgeted: Demonstration Projects and Technical Assistance at \$100,000 Federal; Grants to Districts at \$8,143,032; Cost Share at \$20,250,000 "E"; Loan Interest Share at \$300,000 "E"; Special Area Land Treatment at \$6,896,200 "E"; and Research Grants at \$160,000 "E".

Past expenditures for the Soil and Water Conservation PSD programs have been made through reappropriations as well as core appropriations due to the multi-year nature of the projects. In addition to the core spending shown above, there were expenditures through reappropriations of \$9,055,627 in FY03 and \$9,896,391 in FY04. For FY05 and future fiscal years, the core appropriations for most of these programs are estimated appropriations because there is no longer an operating reappropriation house bill. The estimated appropriations will be used to encumber and pay multi-year project obligations of the fund.

6. What are the sources of the "Other" funds?

Soil and Water Sales Tax Fund (0614)

7a. Provide an effectiveness measure.

Notes: Tons of soil saved is based on evaluation criteria for the life of the cost-share practice. Each cost share practice saves soil at a rate determined by the Revised Universal Soil Loss equation. The more practices implemented the more tons of soil saved. Tonnage shown is cumulative since program began evaluations in 1984. Projections are based on actual trends which indicate more landowners voluntarily participating in conservation planning programs and starting and completing more practices each year excepting years with unforeseen weather or economic impacts.

7b. Provide an efficiency measure.

Note: Measurement includes Cost Share grants and Special Area Land Treatment Cost Share grants.

Water Resources	
Soil and Water Grants to Districts - Benefits	1780004

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

One of the responsibilities of the Soil and Water Districts Commission is to support the 114 local soil and water conservation districts in planning and implementing successful soil conservation programs within their jurisdiction. As the commission continues to implement its "Plan for the Future" it relies heavily on the local district office staff. The constant change of technology and growing responsibilities due to increasing complex state and federal programs require that the districts hire highly skilled employees. To attract and retain the best possible personnel, soil and water conservation districts must compete in an economy where highly skilled employees are often in high demand by a number of employers who offer competitive salary levels and fringe benefits. Without capable, experienced staff at the local level, the districts will not be able to operate efficiently, impairing their ability to provide services to landowners and provide accountability for state funds.

In 2001 an employee benefit grant was added to the Grants to the Districts Program to help fund district employees' retirement and health insurance. The Soil and Water Districts Commission's intent is to offer health insurance benefits to soil and water district employees similar to those offered to state employees. Due to the continuing rise of health insurance cost and retirement expenses an increase in the employee benefit grant is being requested.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

Since the Employee Benefit Grant was started in Fiscal Year 2001 there have been increases in expenses for health insurance and for retirement while the number of district employees has remained constant. In both FY06 and FY07 the health insurance component is anticipated to increase as much as 20% and retirement benefit costs are expected to increase as much as 10%. The current appropriation is insufficient to handle these increased costs. An increase in estimated costs for coverage changes were obtained in a contribution rates memorandum from Office of Administration summarizing MOSERS and the Missouri Consolidated Health Care Program (MCHCP) rates.

Computation of Expansion Amount:

Estimated District Health Care for FY07	\$1,307,265 (FY05 amount of \$907,823 x 20% increase = FY06 amount of \$1,089,387 x 20% increase = \$1,307,265)
Estimated District Retirement for FY07	444,010 (FY05 amount of \$366,950 x 10% increase = FY06 amount of \$403,645 x 10% increase = \$444,010)
Total FY07 Estimated Costs	<u>\$1,751,275</u>
Available Appropriation	<u>\$1,493,032</u> (Funds are included in Grants to local Soil and Water Conservation districts appropriation; FY01 decision item \$848,460 plus FY02 increase of \$413,532, plus FY06 increase of \$231,040)
Projected FY07 Appropriation Shortfall	\$258,243

Budget Unit 79435C

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an effectiveness measure.

The current appropriation level compared to the employee benefit package costs

Note: The Soil and Water Program cannot meet the benefits grant needs with current appropriation as shown in the graph above. The appropriation shown is current core amount and the total benefits needed in FY 2006 and after are based on projected increased costs.

6b. Provide an efficiency measure.

The district's average amount paid per month for health benefit and the state allowance for health coverage per employee

Note: Source of state allowance numbers is Office of Administration. Each district must secure its own health benefits package. The amounts shown are the averages of all districts.

Department of Natural Resources	Budget Unit <u>79435C</u>
Water Resources	
Soil and Water Grants to Districts - Benefits	1780004

6b. Provide an efficiency measure.

The District's retirement contribution compared to the state retirement contribution rate per employee.

Note: Five percent is the retirement contribution agreed to by the Soil and Water District Commission for District employees. Source of State Contribution is Office of Administration memorandum on contribution rates.

Note: Computed as costs divided by participants. Five percent is the retirement contribution agreed to by the Soil and Water District Commission for District employees.

Department of Natural Resources
Water Resources
Soil and Water Grants to Districts - Benefits 1780004

Budget Unit 79435C

6c. Provide the number of clients/individuals served, if applicable.

6d. Provide a customer satisfaction measure, if available.

Note: Computed as number of participating employees divided by the number of total annual employees. FY 2005 and FY 2006 projected from previous years' trend.

Water Resources	
Soil and Water Grants to Districts - Benefits	1780004

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

Continue partnership with agencies involved in soil conservation.

Retain soil and water district employees by maintaining health care and retirement benefit levels in light of projected increases.

Improve the operational accountability of the soil and water conservation districts through continued enhancements of the Soil and Water Conservation District accounting systems.

Continue to provide various types of financial assistance to construct and implement soil conservation measures including grants and loans.

Maintain key soil conservation programs.

Maintain or increase the number of educational events promoting soil conservation and the use of best management practices held by the soil and water conservation districts.

Expand the Commission's role in providing technical assistance for soil conservation, and promote land management practices that maximize soil protection.

2. CORE DESCRIPTION									
This core decision item provides the operational funding for the Missouri Energy Center. The Energy Center is a nonregulatory state agency that works to help ensure adequate energy supplies and to promote energy efficiency and renewable energy resources and technologies. Staff regularly track and report on energy prices and supplies; collect and report Missouri energy data; conduct energy policy research and analysis; and maintain Missouri's plan for energy emergencies. Staff also give technical and financial assistance for energy efficiency and renewable energy projects to state and local governments, school districts, and other consumers. In addition, the Energy Center supports market research and demonstration projects that advance the use of clean, domestic energy resources and technologies.

Unexpended, by Fund:				
General Revenue	N/A	N/A	N/A	N/A
Federal	N/A	N/A	N/A	N/A
Other	N/A	N/A	N/A	N/A
	(1)	(1)	(1)	(1)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) As a result of the department's reorganization efforts, the Missouri Energy Center, which was previously budgeted within the Outreach and Assistance Center now reports to the Deputy Director of Policy and will be budgeted separately. Prior year actual and current year data is included in the Outreach & Assistance Center Core, and therefore is not shown here.

PROGRAM DESCRIPTION

Department of Natural Resources

Missouri Energy Center

Program is found in the following core budget(s): Missouri Energy Center

1. What does this program do?

The Missouri Energy Center is a nonregulatory state agency that works to help ensure adequate energy supplies and to promote energy efficiency and renewable energy resources and technologies. Staff regularly track and report on energy prices and supplies; collect and report Missouri energy data; conduct energy policy research and analysis; and maintain Missouri's plan for energy emergencies. Staff also give technical and financial assistance for energy efficiency and renewable energy projects to state and local governments, school districts, and other consumers. In addition, the Energy Center supports market research and demonstration projects that advance the use of clean, domestic energy resources and technologies.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

10 CFR 420	Federal regulations affecting the State Energy Program
10 CFR 440	Federal regulations affecting the Weatherization Program
RSMo 8.800-8.851	Energy Efficiency in State Facilities
RSMo 414.350-414.359	Alternative Fuel Vehicle Loan Fund
RSMo 414.400-414.417	Fuel Conservation and State Vehicles Program and Bio-diesel Revolving Fund
RSMo 640.150	Duties as to Energy Activities
RSMo 640.651-640.686	Energy Conservation Projects
RSMo 660.100-660.136	Utilicare – Weatherization projects

3. Are there federal matching requirements? If yes, please explain.

Weatherization Assistance for Low Income Persons	100% Federal
State Energy Program (SEP) Grant	20% State/Local
SEP Special Project - Rebuild America Missouri Initiative	50% State/Local
SEP Special Project - Rebuild America KC School Districts	35% Local
SEP Special Project - Residential Deployment	38% State/Local
Energy Efficiency and Renewable Energy Information Dissemination, Outreach, Training, and Technical Analysis/Assistance has numerous small awards that may require various state share of projects	varies
State Heating Oil and Propane Program	50% State
SEP Special Project - Rebuild America Kansas City Schools	25% State/Local
SEP Special Project - Tall Tower Investigations of Midwest Wind Patterns	75% Local
SEP Special Project - Clean Cities St Louis	50% Local
HUD Multi-Family Weatherization Collaboration - Building Performance with Energy Star	100% Federal

PROGRAM DESCRIPTION

Department of Natural Resources

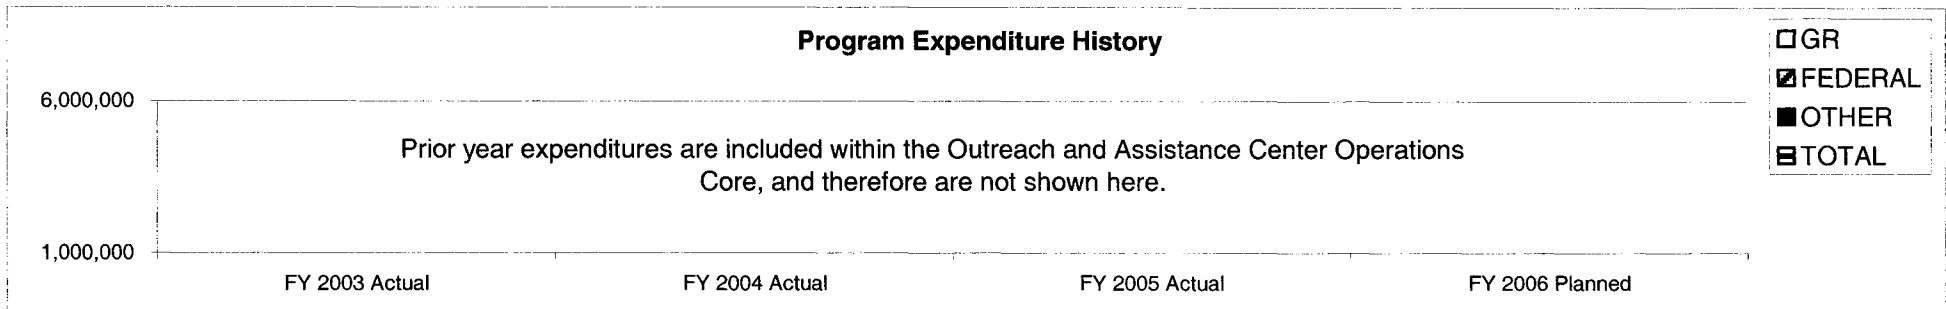

Missouri Energy Center

Program is found in the following core budget(s): Missouri Energy Center

4. Is this a federally mandated program? If yes, please explain.

The National Energy Policy and Conservation Act sets forth requirements for state energy offices; the Missouri Energy Center is recognized by the federal government as Missouri's energy office.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

6. What are the sources of the "Other " funds?

Not applicable. See note above.

7a. Provide an effectiveness measure.

Note: Renewable energy consumption includes bio-mass (ethanol, bio-diesel, industrial and utility wood use, bio-gas from wastewater treatment plants and landfills), solar, and wind energy sources. Non-fossil resources not included are hydroelectric generation (due to its year-to-year variations that would reduce the value of the data series as an indicator), residential charcoal and wood use, consumption of crop waste as it is not produced as a fuel, and waste tires.

PROGRAM DESCRIPTION

Department of Natural Resources

Missouri Energy Center

Program is found in the following core budget(s): Missouri Energy Center

7a. Provide an effectiveness measure (continued).

The Missouri Energy Center administers the Fuel Conservation and State Vehicles Program for state fleets (RSMo 414.400-414.417) and annually reports agencies' progress in alternative fuel use and the acquisition of alternative fuel vehicles. The decrease from FY03 to FY04 in alternative fuel vehicles is due to a change in reporting of dual-fueled alternative fuel vehicles to exempt vehicles by one state agency. FY 05 data should be available in February 2006.

Note: Alternative fuel use in eligible state alternative fuel vehicles (ethanol 85%, compressed natural gas, propane, electric and biodiesel 20%) increased significantly in FY04 due to statutory requirements for the Missouri Department of Transportation to use biodiesel (RSMo 414.365). The Department of Natural Resources has consistently increased its use of alternative fuel and works with industry to increase the availability of refueling facilities. Data is shown as gasoline gallon equivalents (gge) to provide a common unit and is based on energy content of the fuels. FY05 data should be available in February 2006.

Missouri Energy Center

Program is found in the following core budget(s): Missouri Energy Center

7b. Provide an efficiency measure.

Note: The Missouri Energy Center participates in regulatory proceedings of electric and natural gas utilities before the Public Service Commission (PSC) to secure funds for energy efficiency programs for customers of regulated energy utilities. Energy efficiency measures help customers reduce energy use, which helps to reduce utility bills. Cost-effective programs are designed and implemented by the utility in consultation with an advisory group of parties to each case. Amounts are cumulative, based on the number of years specified in stipulations or PSC orders, or estimated when not specified. A small amount of funds for wind energy assessments is included. This is a new measure, therefore prior year projected data is not available.

7c. Provide the number of clients/individuals served, if applicable.

	FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
	Proj	Actual	Proj	Actual	Proj	Actual	Proj	Proj	Proj
School Districts	15	19	16	18	19	21	20	20	20
Local Governments	3	3	3	6	3	5	3	3	3
Low-income households	2,000	2,276	2,000	1,859	1,990	2,233	2,000	2,000	2,000

Note: In addition to clients receiving energy efficiency loans and weatherization services, the Missouri Energy Center provides technical assistance and services to individuals, electric and natural gas utilities, agriculture and energy industries, state agencies and other units of government and businesses that are difficult to quantify.

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Utilicare Stabilization Fund (0134); Energy Set-Aside Fund (0667); Biodiesel Fuel Revolving Fund (0730); Missouri Alternative Fuel Vehicle Loan Fund (0886)									
Note: An "E" is requested for Federal Funds and Other Funds.									
2. CORE DESCRIPTION									
This core appropriation provides authority to pass through federal funds and other funds. Federal funding includes the Low Income Weatherization Assistance Program (administered through 18 local, community based agencies), the State Energy Program Grant funding, and competitive federal funding for various special projects. State funding includes the Energy Set-Aside Loan Fund, the Biodiesel Fuel Revolving Fund, and the Missouri Alternative Fuel Vehicle Loan Fund.									
3. PROGRAM LISTING (list programs included in this core funding)									
Energy Efficient Services									

CORE DECISION ITEM

Department of Natural Resources
Missouri Energy Center
Energy Efficient Services Core

Budget Unit 78220C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	20,255,100	31,107,144	37,697,654	8,311,574	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	20,255,100	31,107,144	37,697,654	N/A	
Actual Expenditures (All Funds)	11,323,856	15,851,472	25,445,626	N/A	
Unexpended (All Funds)	8,931,244	15,255,672	12,252,028	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	978,802	1,060,206	1,242,995	N/A	
Other	7,952,442	14,195,466	11,009,033	N/A	
	(2)	(3)	(4)		

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not reflect lapse period activities.

NOTES:

(1) An "E" is necessary from the following funds: Federal Fund, Utilicare Stabilization Fund, Energy Set-Aside Fund, and Biodiesel Fuel Revolving Fund. The "E" is needed for the Federal Fund to accommodate the variable amounts of federal funding available and to allow the department to pursue competitive federal grants. Estimated appropriation authority is needed for the Utilicare Stabilization Fund in the event that funding becomes available. An "E" is needed for the Energy Set-Aside Fund because loan commitments are variable and payments span multiple years. Additionally, we need the authority to encumber all project obligations. An "E" is necessary for the Biodiesel Fuel Revolving fund; usage of the fund and available funding amounts are market driven.

(2) We received an "E" appropriation increase of \$11,215,526 in FY03 to pay and encumber these multi-year commitments.

(3) We received an "E" appropriation increase of \$22,067,570 in FY04 to pay and encumber these multi-year commitments.

(4) We received an "E" appropriation increase of \$29,386,080 in FY05 to pay and encumber these multi-year commitments.

Language Change: We are requesting the reference to the Outreach and Assistance Center be removed. The house bill will be written "To the Department of Natural Resources, For the purpose of funding the promotion of energy, renewable energy and energy efficient state government, From ..."

PROGRAM DESCRIPTION

Department of Natural Resources

Missouri Energy Center

Program is found in the following core budget(s): Energy Efficient Services

1. What does this program do?

Energy Efficient Services involves multiple successful efforts including revolving loans for energy efficiency improvements made to schools and local government buildings, which saves tax dollars. Funding for energy-efficiency improvements to homes of low-income Missourians saves families money by reducing their utility bills. The State Energy Program includes services such as energy assurance, mitigation of energy supply disruptions, and development of renewable energy sources. The Biodiesel Fuel Revolving Fund encourages alternative fuel use in state vehicles. Benefits of these programs include improving the state's economy by reducing expenditures for energy imported into the state and creating opportunities for the local development of renewable energy sources, environment and security benefits from avoiding fossil energy generation and consumption, developing clean domestic distributed energy systems and industries, informing citizens and decision-makers about energy prices and helping ensure adequate energy supplies.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

10 CFR 420	State Energy Program federal regulations
10 CFR 440	Low-Income Weatherization Assistance Program federal regulations
RSMo 8.800-8.851	Energy Efficiency in State Buildings
RSMo 414.350-414.359	Alternative Fuel Vehicle Loan Fund
RSMo 414.407	Biodiesel Fuel Revolving Fund
RSMo 640.150	Department of Natural Resources Energy Responsibilities
RSMo 640.651-640.686	Energy Conservation Projects
RSMo 660.100-660.136	Utilicare – Weatherization Assistance

3. Are there federal matching requirements? If yes, please explain.

Weatherization Assistance for Low Income Persons	100% Federal
State Energy Program (SEP) Grant	20% State/Local
SEP Special Project - Rebuild America Missouri Initiative	50% State/Local
SEP Special Project - Rebuild America KC School Districts	35% Local
SEP Special Project - Residential Deployment	38% State/Local
Energy Efficiency and Renewable Energy Information Dissemination, Outreach, Training, and Technical Analysis/Assistance has numerous small awards that may require various state share of projects	varies

(continued on following page)

PROGRAM DESCRIPTION

Department of Natural Resources

Missouri Energy Center

Program is found in the following core budget(s): Energy Efficient Services

3. Are there federal matching requirements? If yes, please explain.

continued:

SEP Special Project - Rebuild America Kansas City Schools	25% State/Local
SEP Special Project - Tall Tower Investigations of Midwest Wind Patterns	75% Local
SEP Special Project - Clean Cities St Louis	50% Local
HUD Multi Family Weatherization Collaboration - Building Performance with Energy Star	100% Federal

4. Is this a federally mandated program? If yes, please explain.

The Department of Natural Resources is recognized by the federal government as Missouri's official state energy office.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at appropriation amounts.

6. What are the sources of the "Other" funds?

Utilecare Stabilization Fund (0134); Energy Set-Aside Fund (0667); Biodiesel Fuel Revolving Fund (0730); Missouri Alternative Fuel Vehicle Loan Fund (0886)

PROGRAM DESCRIPTION

Department of Natural Resources

Missouri Energy Center

Program is found in the following core budget(s): Energy Efficient Services

7a. Provide an effectiveness measure.

Note: From inception of the Low-Income Weatherization Program in 1977 through 2005, the program has weatherized 147,165 homes and is reducing energy costs by over \$12 million annually for Missouri's low-income, elderly and disabled citizens. Lasting energy efficient improvements are installed in the home, resulting in lower utility bills year after year. A home that has been weatherized can reduce average annual fuel use per dwelling by 33.5 percent of natural gas space heating consumption, making it a cost effective way to help low-income families with their energy bills.

Note: Since 1989 the Energy Center has offered low-interest loans to schools and local governments for the installation of energy efficiency measures. Based on an expected 20 year life of the energy efficiency measures, annual savings in FY 2005 were \$10 million.

PROGRAM DESCRIPTION

Department of Natural Resources

Missouri Energy Center

Program is found in the following core budget(s): Energy Efficient Services

7b. Provide an efficiency measure.

Note: The Energy Center passes through federal funds to 18 local agencies to provide weatherization services in their communities. Currently these agencies receive a base allocation plus an allocation based on the percentage of low-income households within each service area.

7c. Provide the number of clients/individuals served, if applicable.

Number of Clients Receiving Energy Efficiency Loans and Weatherization Assistance

	FY2003		FY2004		FY2005		FY 2006	FY 2007	FY 2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
School Districts	15	19	16	18	19	21	20	20	20
Local Governments	3	3	3	6	3	5	3	3	3
Low-income households	2,000	2,276	2,000	1,859	1,990	2,233	2,000	2,000	2,000

7d. Provide a customer satisfaction measure, if available.

Customer Satisfaction Survey: Grant and Loan recipient surveys maintain a 100% satisfaction rating.

Other Funds: Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund – Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund – Air Pollution Permit Fee Subaccount (0594); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Energy Set-Aside Program Fund (0667); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679)									
Note: The division requests 25% personal service and expense and equipment flexibility in FY07 from the General Revenue Fund.									
2. CORE DESCRIPTION									
This core decision item provides operational funding for the Field Services Division. Core funding supports the implementation of the department's environmental services throughout the state of Missouri. To protect the state's air, land and water resources, which are important to the state's citizens and economy, the division provides consistent, efficient delievery of services closest to where Missourians live and work. This is accomplished through timely compliance assistance, inspection, on-site visits to permitted facilities, permit issuance, environmental emergency response, sampling and sample analysis, and investigating reported environmental complaints. Front-line field staff are available regionally to provide better public and facility access for permitting, compliance and informational purposes.									
3. PROGRAM LISTING (list programs included in this core funding)									
Field Services Division									

CORE DECISION ITEM

Department of Natural Resources	Budget Unit <u>78115C</u>

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78115C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: FIELD SERVICES	DIVISION: FIELD SERVICES

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

As a result of the department's recent reorganization, the Field Services Division will focus on improving environmental compliance by bringing more services closer to the people we serve, and by streamlining the permitting process to foster increased compliance, while increasing time spent assisting facilities with the implementation of their permit. We are redirecting resources saved in the permitting process toward this effort. PS and E&E flexibility will help to ensure responsiveness and effectiveness of the division. Additionally, environmental emergencies or other unanticipated needs may arise, and the need for satellite offices may evolve and change.

DEPARTMENT REQUEST					GOVERNOR RECOMMENDATION				
The Field Services Division is requesting 25% GR flexibility on both PS and E&E, based on our FY2007 budget request.					The Governor recommended 25% GR flexibility on both PS and E&E.				
Section	PS or E&E	Core	% Flex Requested	Flex Request Amount	Section	PS or E&E	Core	% Flex Gov Rec	Flex Gov Rec Amount

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division

Program is found in the following core budget(s): Field Services Division

1. What does this program do?

The Field Services Division has been organized to implement environmental protection and improvement services throughout the State of Missouri. The department is focusing on improving environmental compliance by bringing more services closer to the people we serve and by providing increased compliance assistance by streamlining permit processes while increasing time spent assisting facilities with the implementation of their permit.

The division is responsible for providing on-site visits to permitted facilities, compliance assistance activities, inspections, sampling and sample analysis, environmental emergency response, investigating reported environmental complaints, cleanup of controlled substances (primarily wastes associated with methamphetamine production), and managing the Clandestine Drug Lab Collection Station Program.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Clean Water Act as amended

Federal Safe Drinking Water Act as amended

Federal Clean Air Act, with amendments, 1990

Federal Comprehensive Environmental Response,

Compensation, and Liability Act of 1980, as amended, Public Law 96-510

Federal Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499

Federal Resource Conservation and Recovery Act of 1976; as amended, Public Law 94-580

Federal Solid Waste Disposal Act of 1976, as amended

Oil Pollution Act of 1990

RSMo 640.040 Cleanup of Controlled Substance

RSMo 260.500 through 260.552 Hazardous Substance Emergency Response

RSMo 260.818 through 260.819 Oil Spill Response, National Contingency Plan

Also see program authorization in the core operating budgets for the Division of Environmental Quality's Air Pollution Control Program, Hazardous Waste Program, Solid Waste Management Program, and Water Protection Program.

3. Are there federal matching requirements? If yes, please explain.

Performance Partnership Grant

Match Varies by Component

Drinking Water State Revolving Fund

20% State

Funds from MO Drug Lab Task Force through Department of Safety's Byrne Grant

25% State

Pollution Prevention Incentives for States

50% State

Small Business Mentoring for Compliance Assistance Outcome Measurement

12% Local

Waste Minimization Outreach

10% State

Brownfields Assessment Grant

100% Federal

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division

Program is found in the following core budget(s): Field Services Division

4. Is this a federally mandated program? If yes, please explain.

The Field Services Division supports the Clean Water Act; the Safe Drinking Water Act; the Clean Air Act; the Resource Conservation and Recovery Act; the Comprehensive Environmental Response, Compensation, and Liability Act; and the Superfund Amendments and Reauthorization Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

6. What are the sources of the "Other " funds?

Not applicable. See note above.

7a. Provide an effectiveness measure.

Percentage of Inspected Facilities Either Compliant or Returned to Compliance

Note: This is a new measure, therefore some prior year projected and actual data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division

Program is found in the following core budget(s): Field Services Division

7b. Provide an efficiency measure.

Timeliness of Selected Field Services Division Functions (average number of days)						
Function	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Projected	FY 2007 Projected	FY 2008 Projected
Inspection Reports	9.93	10.05	13.02	12.5	12	11
Complaint Response	8.82	9.84	8.49	8.25	8	8
Sample Analysis	46	33	49	28	25	25

7c. Provide the number of clients/individuals served, if applicable.

Missourians Served by Public Drinking Water Supply Systems Monitored Through Chemical Analysis

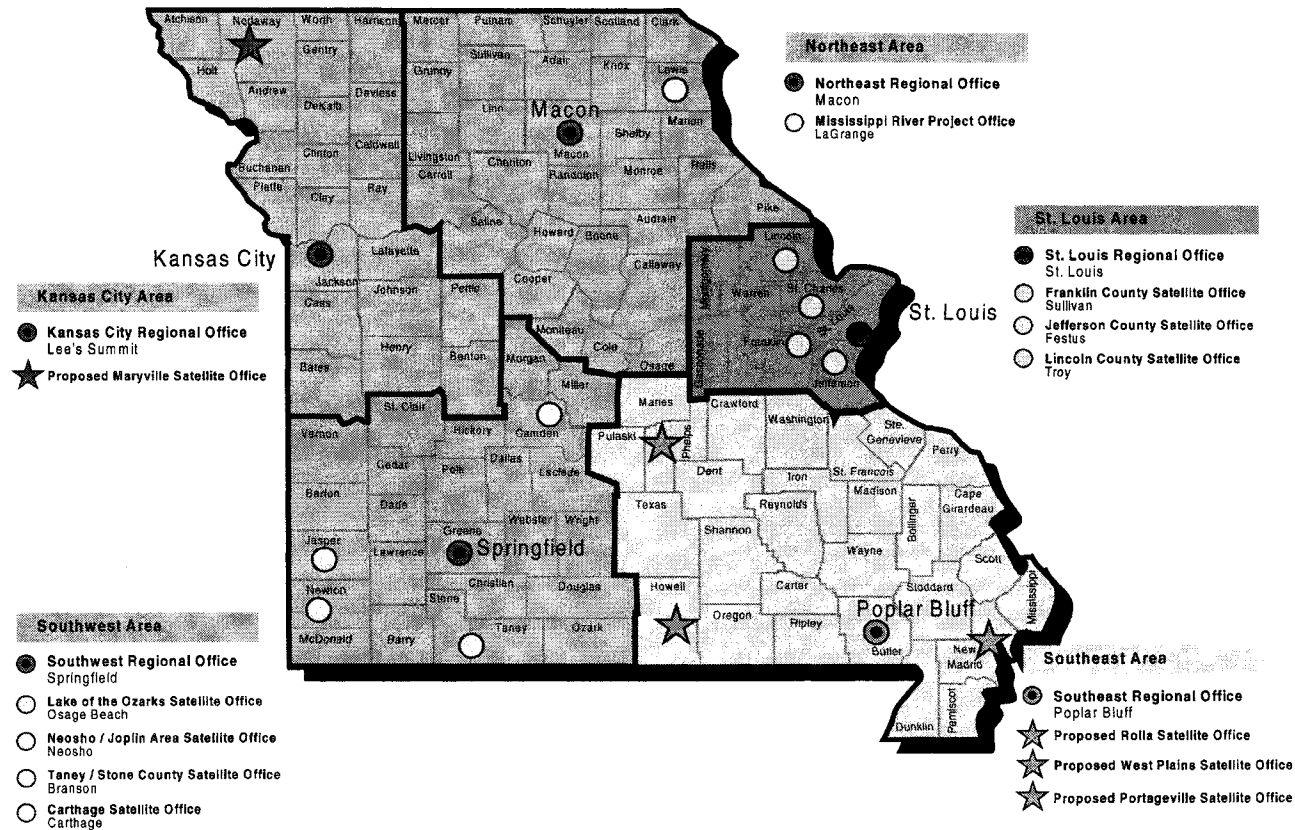

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division

Program is found in the following core budget(s): Field Services Division

Regional and Satellite Office Locations in the State

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Not applicable									
Governor's Recommendations do not include personal services or FTE. The department plans to continue to implement our new compliance assistance activities. This funding is to act as a bridge for two fiscal years to avoid delaying implementation of the program. During that time we will be simplifying the permitting process and redirecting those efforts to the Initial Assistance Visits initiative. Since personal services and FTE were not recommended, the department is reviewing its existing permitting and other environmental activities to determine the best option for contract services. The department will then contract for those services and our existing FTE will be redirected to the Initial Assistance Visits initiative. This initiative is critical to achieving the positive results of our reorganization efforts. Working with the permitted community to resolve issues is important as it costs less to prevent pollution, than to clean it up afterward. In addition, the department plans to contract for the water resources activities requested in the new decision item.									
2. THIS REQUEST CAN BE CATEGORIZED AS:

Department of Natural Resources Department of Natural Resources Customer Assistance Visits and Water Resources Initiative	Budget Unit <u>78518C; 78115C; 78847C</u> 1780001
3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.	
<p>In order to increase compliance throughout the state and to quantify and protect Missouri's natural resources, the department needs additional resources to provide front line compliance assistance across all environmental media, and to monitor and assess the state's water resources.</p> <p>Initial Assistance Visits: The department is committed to a new strategy of simplifying the permit process while improving the environment through follow-up with the permit recipient. Traditionally, considerable effort has been invested in writing very protective permits; however, many permit recipients have never been visited to ensure that they understand the permit and are following the permit conditions. Significant reduction of pollution, facilitated by increased compliance, is possible if the department is positioned to more readily assist the permit recipient. We are redirecting resources saved in the permitting process toward this effort; however, it will take one to two years to fully make this transition if we depend on the resultant savings. We have shared our plans with EPA, who is supportive of our immediate attention to this effort - instead of waiting one to two years for Missouri citizens to utilize the value of these changes. An expansion of this program is needed in order to fully implement the concept. Increased assistance should mean less enforcement, and follow-up will be required by the agency to meet permit requirements.</p> <p>Water Resources Staff: Staff are needed to enable the department to continue working on state water planning, drought mitigation efforts, and major water user reporting. The 2005 drought has underscored the need for more accurate evaluations of existing water resources. This expansion item will allow the department to evaluate and interpret water quantity information that can be used to address statewide water issues. The department will then be in a better position to make recommendations on where their limited funding resources need to be focused, such as public water supply. A more prompt response by the department in assessing drought conditions will enable drought-affected businesses and individuals access to federal relief funding. This will enable the department to do more analysis of the data that is being collected and apply it in resolving the state's water needs.</p> <p>Groundwater Monitoring Efforts: The groundwater monitoring network was established in the 1950's as a result of severe drought conditions. The department continues to address drought issues, as well as flood and water supply issues from a statewide, regional and local perspective. The current groundwater monitoring network consists of only 75 wells located in 58 of the 114 counties in Missouri. To address water supply issues, the state needs to expand the groundwater monitoring network to evaluate groundwater quantity for all portions of the state. Data gathered from the network gives local, regional and state officials the necessary information to make both short-term and long-term decisions about water supply issues. Not all counties are represented and many areas of the state have experienced increased development and need better information to make water supply decisions. The department's goal is to maintain a monitoring well in each county of the state and additional wells in counties where groundwater use exceeds three billion gallons per year. Resources are needed to allow the network to grow by approximately 40 wells per year for the next two years.</p>	

NEW DECISION ITEM RANK: 005 OF 009	
Department of Natural Resources	Budget Unit 78518C; 78115C; 78847C
Department of Natural Resources	
Customer Assistance Visits and Water Resources Initiative	1780001
<p>Surface Water Monitoring Efforts: Through a cooperative agreement with the United States Geological Survey (USGS), the department supports the operation of several stream gages that collect flow data that are used in the department's work to address both water quality and quantity issues in the state. Gages on tributaries of the Missouri River are extremely important in defending the uses of this river in our state. In FY05, funding for these gages was eliminated from DNR's budget. The Missouri Department of Conservation assumed the responsibility for funding these gages in FY05 and FY06. The department is dependent upon consistent, long-term data collected from these gages to address water quality and quantity issues.</p> <p>New Surface Water Monitoring Efforts: Regional stream flow data is a key component of the drought assessment process. However, for drought assessment purposes, the current network of stream gages operated by the USGS does not provide adequate stream flow coverage in 38 counties. The department's goal is to monitor stream flows in every county of the state. Resources are needed to add approximately 19 stream gaging sites per year for two years.</p> <p>Drinking Water Reservoir Monitoring Efforts: An accurate assessment of the amount of drinking water available for public consumption is vital in planning for potential drinking water shortages. Through FY05, water quantity evaluations have been performed on 33 surface water reservoirs. Resources are needed to install staff gages in each of the reservoirs that has been studied and in all future reservoirs as the analyses are completed.</p> <p>Use Attainability Analysis: Upcoming revisions to the Missouri Water Quality Standards will require that over 22,000 miles of classified streams and over 293,000 acres of classified lakes be protected for swimming and other recreational uses, wherever attainable. Owners or operators of wastewater treatment systems will be required to disinfect effluent, unless it can be shown, through (1) an evaluation that disinfection is not required in order to meet bacteria standards in the classified stream or (2) a Use Attainability Analysis that the classified stream below the facility cannot support swimming. Additional resources will be necessary to hire contractors to perform the Use Attainability Analyses. These studies equip the department with the information needed to make decisions on water quality standards.</p>	

NEW DECISION ITEM RANK: 005 OF 009	
Department of Natural Resources Department of Natural Resources Customer Assistance Visits and Water Resources Initiative	Budget Unit 78518C; 78115C; 78847C 1780001
4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)	
<p>Initial Assistance Visits: Existing resources sufficient to conduct 1,075 initial assistance visits will be redirected in FY 2006. It is estimated that one FTE will conduct 380 visits per year. Based on the projection of 6,362 permits being issued in FY 2006 and an existing universe of over 21,000 facilities, 18 FTE are needed to fulfill this initiative. Due to the fact that these staff will be continually deployed in the field, expense and equipment for in-state travel has been increased over the standard by \$36,017, or \$2,000 additional per FTE. Other Expense and Equipment amounts are based on the department's standard per FTE.</p> <p>Water Resource Staff: Four staff are needed. One Environmental Engineer III will supervise the State Water Planning unit and will work with the program director to ensure the state's needs are being met; one Environmental Engineer II will provide engineering, and hydrologic/hydraulic expertise to improve the technical abilities of the unit and incorporate surface water and groundwater modeling; and two Hydrologist III's will provide hydrologist expertise and help bridge the gap between the groundwater and surface water work. The hydrologists will be responsible for working with major water users in the state to develop a more comprehensive estimate of how much water is being consumed and by whom so that adequate water resources are ensured for the future. Expense & Equipment amounts are based on the department's standard per FTE.</p> <p>New Groundwater Monitoring Efforts: Estimated contract cost for drilling 40 wells per year: $\\$8,500 \times 40 = \\$340,000$. This is an estimate since the actual cost of the well is dependent on location, depth, etc. Satellite connection through USGS = \$10,000. Laptop computers for network: $\\$2,647 \times 3 = \\$7,941$. Monitoring equipment: $\\$8,000 \times 40 = \\$320,000$.</p> <p>Surface Water Monitoring Efforts: The annual maintenance costs for the 8 stream gaging sites currently being funded by the Missouri Department of Conservation includes 50/50 match with USGS: $\\$6,350 \times 8 = \\$50,800$.</p> <p>New Surface Water Monitoring Efforts: The stream gaging costs are broken down into installation and maintenance costs. The total cost of stream gaging assuming 50/50 match with USGS is \$566,200; this includes installation and maintenance of 38 new gages in the first year. Installation of new gages: $\\$8,500 \times 38 = \\$323,000$; maintenance for new gages: $\\$6,400 \times 38 = \\$243,200$. Additionally, water quality monitoring: $\\$2,000 \times 20 \text{ sites} = \\$40,000$. Drinking Water Reservoir Monitoring Efforts:</p>

Other Funds: Hazardous Waste Fund (0676)									
An "E" is requested for Cleanup of Controlled Substances on the Federal Fund and for Environmental Emergency Response on the Hazardous Waste Fund.									
2. CORE DESCRIPTION									
The department coordinates state, federal and local efforts during an environmental emergency and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY05, approximately 3,488 hazardous substance spills, leaks and other chemical-related incidents were reported through the statewide emergency response telephone. Many of these incidents were managed by providing technical assistance over the telephone, but a substantial number required an on-scene response to assess the situation, provide technical assistance to on-site responders, and ensure that the hazardous substance release was properly cleaned up.									
The department assists the department in the coordination of controlled substance cleanup. Controlled substance (primarily methamphetamine) use and production is the number one drug problem in the state of Missouri, according to the Department of Public Safety. Law enforcement agencies have found that dealing with the by-products of controlled substance production is an environmental and public health hazard beyond their expertise. The ingredients used to produce methamphetamine are very volatile and can cause the meth labs to be highly explosive. Many of the materials used in the methamphetamine production process, as well as the by-products from that production, are toxic and create a hazardous waste cleanup problem. The department assists local law enforcement with the environmental challenges posed by illegal drug production.									
3. PROGRAM LISTING (list programs included in this core funding)									
Hazardous Substance Analyses and Environmental Emergency Response									
Controlled Substance Cleanup									

CORE DECISION ITEM

	(3)			(4)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) The Cleanup of Controlled Substances appropriation, which had been previously budgeted in the Hazardous and Other Substance Cleanup PSD, was reallocated to this PSD in FY06. In order to provide comparable data, historical appropriation authority and spending from this appropriation is shown in this form.

(Notes continued on following page)

CORE DECISION ITEM

Department of Natural Resources	Budget Unit <u>79475C</u>
Field Services Division	
Hazardous Substances Analysis & Emergency Response Core	
<p>notes continued:</p> <p>(2) There is an "E" appropriation on the Cleanup of Controlled Substances PSD of \$124,999 and an "E" appropriation on the Environmental Emergency Response PSD for \$30,000. PSD dollars are used in part for meth cleanup and emergency response work which makes the need unpredictable from year to year and depends on the number and size of meth and emergency response incidents. For example, in FY03 the Controlled Substance Cleanup appropriation was increased from \$125,000 to \$376,200. It was increased again in FY04 to \$275,000.</p> <p>(3) In FY03 there was an annual appropriation of \$125,000 for Controlled Substances Cleanup from the Controlled Substance Cleanup Fund (0875) which had no revenues. This is reflected as part of the Other Funds lapse.</p> <p>(4) The FY06 appropriations are: Controlled Substance Cleanup at \$124,999"E"; Hazardous Substance Sample Analysis at \$160,210; Environmental Emergency Response at \$280,000"E"; and Emergency Response Loans at \$150,000.</p> <p><u>Language Change:</u> We are requesting the reference to the Air and Land Protection Division be removed. The house bill will be written "To the Department of Natural Resources, For contracts for the analysis of hazardous waste samples, From ...; For the environmental emergency response system, From ...; For emergency response loans..., From ...; For cleanup of controlled substances, From..."</p>

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division - Hazardous Substance Analysis and Environmental Emergency Response

Program is found in the following core budget(s): Hazardous Substance Analysis and Environmental Emergency Response

1. What does this program do?

The department coordinates state, federal and local efforts during an environmental emergency, and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY05, approximately 3,488 hazardous substance spills, leaks and other chemical-related incidents were reported to the department through the statewide emergency response telephone. Many of these incidents were managed by providing technical assistance over the telephone, but a substantial number required an on-scene response to assess the situation, provide technical assistance to on-site responders, and ensure that the hazardous substance release was properly cleaned up.

Onsite response may require a contractor to be called in to eliminate a threat to public health and environment if a responsible party cannot be located or fails to take timely action to clean up. Likewise a contractor may be used for laboratory analysis when the department does not have appropriate equipment or cannot perform the work quickly enough for state and local officials to determine the course of action in an emergency.

The department may utilize authority to provide loans to local governments or political subdivisions for immediate relief from costs incurred while responding to a hazardous substance release.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 260.500 through 260.552 Hazardous Substance Emergency Response
RSMo 260.818 through 260.819 National Contingency Plan
Oil Pollution Act of 1990

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division - Hazardous Substance Analysis and Environmental Emergency Response

Program is found in the following core budget(s): Hazardous Substance Analysis and Environmental Emergency Response

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

The FY06 Planned is shown at full appropriation as follows: Hazardous Substance Sample Analysis at \$160,210; Environmental Emergency Response at \$280,000"E"; and Emergency Response Loans at \$150,000. The "E" appropriation is requested since this appropriation is used for emergency response work which makes the need unpredictable from year to year and depends on the number and size of emergency response incidents.

6. What are the sources of the "Other" funds?

Hazardous Waste Fund (0676); Hazardous Waste Remedial Fund (0690)

Note: SB225, passed in the 2005 session, consolidates the Hazardous Waste Remedial Fund into the Hazardous Waste Fund. FY03-06 figures include appropriations from both funds.

7a. Provide an effectiveness measure.

**Number of Environmental Emergency Response
Incidents Reported and Number Requiring On Site Response By Year**

Note: Some prior year projected data is not shown due to a change in incidents being reported (meth reports not included).

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division - Hazardous Substance Analysis and Environmental Emergency Response

Program is found in the following core budget(s): Hazardous Substance Analysis and Environmental Emergency Response

7b. Provide an efficiency measure.

Notes: To help ensure that responsible parties pay for emergency response services provided, the department is billing where costs exceed \$500. The collections of these charges may carry over from a prior year's billings. This was a new measure in FY05, therefore prior year projected data is not available.

7c. Provide the number of clients/individuals served, if applicable.

Note: Through the department's 24-hour emergency line and other interaction, the Field Services Division renders assistance to fire services, hazardous materials teams, homeland security teams, law enforcement, local emergency management committees, elected officials, local, state and federal agencies, private business/industry, and the citizens of Missouri.

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division - Controlled Substance Cleanup

Program is found in the following core budget(s): Hazardous Substance Analyses and Environmental Emergency Response

1. What does this program do?

Controlled substance (primarily methamphetamine) use and production is the number one drug problem in the state of Missouri, according to the Department of Public Safety. Law enforcement agencies have found that dealing with the by-products of controlled substance production is an environmental and public health hazard beyond their expertise. The ingredients used to produce methamphetamine are very volatile and can cause the meth labs to be highly explosive. Many of the materials used in the methamphetamine production process, as well as the by-products from that production, are toxic and create a hazardous substance cleanup problem. The department assists local law enforcement with the environmental challenges posed by illegal drug production.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.040 Cleanup of Controlled Substance

3. Are there federal matching requirements? If yes, please explain.

Funds from Missouri Drug Lab Task Force through 25% State
Department of Public Safety's Byrne Grant

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 Planned is shown at core appropriation level. The Field Services Division has an "E" appropriation on the Cleanup of Controlled Substances PSD. This appropriation is used for meth cleanup which makes the need unpredictable from year to year and depends on the number and size of meth incidents. For example, in FY03 the Controlled Substance Cleanup appropriation was increased from \$125,000 to \$376,200. It was increased again in FY04 to \$275,000. The Cleanup of Controlled Substances appropriation, which had been previously budgeted in the Hazardous and Other Substance Cleanup PSD, was reallocated to this PSD in FY06. In order to provide comparable data, historical spending from this appropriation is shown in this form.

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division - Controlled Substance Cleanup

Program is found in the following core budget(s): Hazardous Substance Analyses and Environmental Emergency Response

6. What are the sources of the "Other " funds?

Not applicable

7a. Provide an effectiveness measure.

Note: Funding availability for FY2008 is uncertain

7b. Provide an efficiency measure.

Comparison of meth disposal costs for DNR versus the DEA, calendar year 2005

Notes: The DEA's (federal Drug Enforcement Administration) contractor has an inflexible protocol for meth disposal pickup, and many times law enforcement wait hours or days at a meth lab site before the contractor is able to respond and dispose of the lab waste. This is an estimate of cost comparison. Annual projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Field Services Division - Controlled Substance Cleanup

Program is found in the following core budget(s): Hazardous Substance Analyses and Environmental Emergency Response

7c. Provide the number of clients/individuals served, if applicable.

Individuals Served by Receiving Training and Equipment/Supplies Through the Meth Program

Notes: The number of clients served above are individuals from local agencies from the beginning of the program in 2000 through June 2005.

CDLCS = Clandestine Drug Lab Collection System; HAZWOPER = Hazardous Waste Operations and Emergency Response

7d. Provide a customer satisfaction measure, if available.

Not available

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.					Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.				
Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Water and Wastewater Loan Fund (0649); Groundwater Protection Fund (0660); Safe Drinking Water Fund (0679)									
Notes: The program requests 25% General Revenue Personal Service and Expense & Equipment flexibility.									
Reorganization of the department incorporated the Wellhead Protection Program (from the Division of Geology and Land Survey) and the Operator Certification Program (from the Outreach Assistance Center) into the Water Protection Program. Core reallocations have been coded in the FY 2007 budget request.									
2. CORE DESCRIPTION									
The Water Protection Program helps ensure clean and safe water for all Missourians. To help ensure safe drinking water, the program provides financial and technical assistance to public drinking water supplies, sets standards for safety and testing, issues permits and conducts enforcement actions, where necessary. Groundwater supplies the drinking water for nearly half of all Missourians. To protect this resource, the program oversees the proper construction of all wells, including water, oil and gas, exploration, heat pump and monitoring wells. Clean water is also part of a healthy economy. The program protects Missouri's surface and groundwater for recreational, farming and industrial uses including fishing, swimming, livestock watering and irrigation. To help ensure clean water, the program classifies water bodies, establishes safe levels to protect the uses of each, issues permits to wastewater treatment discharges and provides technical and financial assistance to improve water quality. The program monitors the water quality of streams and lakes and develops strategies to restore impaired waters. The program permits large confined animal feeding operations. The program administers low-interest loan and grant programs to help ensure Missouri communities develop adequate water infrastructure at an affordable cost. The program also trains and certifies operators at Missouri's water supply and water treatment plants.

Unexpended (All Funds)	1,718,477	3,003,334	2,780,768	N/A
Unexpended, by Fund:				
General Revenue	6,850	10,675	6,890	N/A
Federal	1,010,717	2,548,896	1,893,153	N/A
Other	700,910	443,763	880,725	N/A

(2)

(2)

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) The former Public Drinking Water and Water Pollution Control Programs have been merged to form the Water Protection Program. The financial data above reflects the appropriations and expenditures of both former programs in order to provide comparable data.

(2) Hiring freezes have prevented the program from maintaining full staff, resulting in lower expenditures. In addition, Federal E&E appropriations have been maintained to allow for the ability to handle new federal dollars that may become available.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78847C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: WATER PROTECTION PROGRAM	DIVISION: ENVIRONMENTAL QUALITY

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

The department plans to use the GR PS and E&E flexibility to effectively and efficiently manage emerging environmental and natural resource issues. Additionally, we are in the process of enhancing our permitting process via the development of an online permit assistant to guide applicants through the application process and placing the most used permit applications on line as e-permits. As a result of these efforts, we expect that over time we will be able to redirect staff resources from permitting to inspections. Flexibility will be key to making this transition.

DEPARTMENT REQUEST					GOVERNOR RECOMMENDATION				
The Water Protection Program is requesting 25% GR flexibility on both PS and E&E, based on our FY2007 budget request.					The governor recommended 25% GR flexibility on both PS and E&E.				
Section	PS or E&E	Core	% Flex Requested	Flex Request Amount	Section	PS or E&E	Core	% Flex Gov Rec	Flex Gov Rec Amount
Water Protection Program	PS	\$350,617	25%	\$87,654	Water Protection Program	PS	\$350,617	25%	\$87,654
	E&E	\$11,478	25%	\$2,870		E&E	\$11,478	25%	\$2,870

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78847C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: WATER PROTECTION PROGRAM	DIVISION: ENVIRONMENTAL QUALITY

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$0 General Revenue PS \$0 General Revenue EE This flexibility is needed in the event of an environmental emergency that may affect public health or safety.	\$0 General Revenue PS \$0 General Revenue EE This flexibility is needed in the event of an environmental emergency that may affect public health or safety.	\$0 General Revenue PS \$0 General Revenue EE This flexibility is needed in the event of an environmental emergency that may affect public health or safety.

3. Was flexibility approved in the Prior Year Budget or the Current Year Budget? If so, how was the flexibility used during those years?

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
N/A - The flexible appropriation was not used in the prior year.	At this time there are no current year plans. The flexible language allows the division to address these issues without a permanent increase in appropriation levels.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

1. What does this program do?

The Water Protection Program helps ensure clean and safe water for all Missourians. To help ensure safe drinking water, the program provides financial and technical assistance to public drinking water supplies, sets standards for safety and testing, issues permits and conducts enforcement actions, where necessary. Groundwater supplies the drinking water for nearly half of all Missourians. To protect this resource, the program oversees the proper construction of all wells, including water, oil and gas, exploration, heat pump and monitoring wells. Clean water is also part of a healthy economy. The program protects Missouri's surface and groundwater for recreational, farming and industrial uses including fishing, swimming, livestock watering and irrigation. To help ensure clean water, the program classifies water bodies, establishes safe levels to protect the uses of each, issues permits to wastewater treatment discharges and provides technical and financial assistance to improve water quality. The program monitors the water quality of streams and lakes and develops strategies to restore impaired waters. The program permits large confined animal feeding operations. The program administers low-interest loan and grant programs to help ensure Missouri communities develop adequate water infrastructure at an affordable cost. The program also trains and certifies operators at Missouri's water supply and water treatment plants.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Missouri Constitution Article III, Section 37(c), (e), (g), and (h)

RSMo 640.100 through 640.140

RSMo 644.006 through 644.096 and

RSMo 644.125 through 644.150

RSMo 640.700 through 640.758

RSMo 644.101 through 644.124

RSMo 644.500 through 644.564

RSMo 256.600-256.640

Title 42, Chapter 6A, Subchapter XII, Part B, § 300(g)

Water Pollution and Stormwater Control Bonds

Powers and duties of the department related to drinking water

Planning, Permitting, Inspection, Remediation, Technical Assistance, Enforcement and

Wastewater Operator Certification

Concentrated Animal Feeding Operation

Water Pollution Grants and Loans or Revolving Fund

Water Pollution Bonds

Water Well Drillers

Federal Safe Drinking Water Act

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

3. Are there federal matching requirements? If yes, please explain.

Clean Water Act §319(h) Non-point Source Management Grant	40% State/Local
Clean Water Act §604(b) Water Quality Management Planning Grant	100% Federal
Clean Water Act §104(b)(3) Surveys, Studies, Investigations, and Special Purpose Grants	Current grant 5% State/Local
Special Infrastructure Administration Grant	100% Federal
Drinking Water State Revolving Fund Capitalization Grant	20% State/Local
Performance Partnership Grant funds for Water Pollution	16% State
Performance Partnership Grant funds for Drinking Water	33% State
Underground Injection Control	25% State
Drinking Water Operator Training Reimbursement	100% Federal

4. Is this a federally mandated program? If yes, please explain.

Through delegation from, and agreements with, the federal Environmental Protection Agency, the Water Protection Program supports the federal Clean Water Law and the federal Safe Drinking Water Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Reorganization of the department incorporated the Wellhead Protection Program (from the Division of Geology and Land Survey) and the Operator Certification Program (from the Outreach Assistance Center) into the Water Protection Program. Core reallocations have been coded in the FY 2007 budget request. The financial data reported above does not include the actual or planned expenditures of these former programs.

6. What are the sources of the "Other" funds?

Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Natural Resources Protection Fund - Damages Subaccount (0555); Water and Wastewater Loan Fund (0649); Groundwater Protection Fund (0660); and the Safe Drinking Water Fund (0679)

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7a. Provide an effectiveness measure.

Percentage of National Pollution Discharge Elimination System (NPDES) permitted facilities inspected by the department in compliance with the Missouri Clean Water Law

Note: Due to the large number of permitted facilities and limited staff resources, a limited number of permitted facilities are inspected each year. FY 2003 - 848 facilities or 8% of all permitted facilities; FY 2004 - 837 facilities or 7.3% of all permitted facilities; FY 2005 - 759 entities or 6% of all permitted facilities.

Percentage of enforcement actions initiated for violations of the Missouri Clean Water law resolved by the department without litigation

Note: Level 1 - Regional Office staff using conference, conciliation, and persuasion (as defined in RSMo 644.016(3))

Level 2 - Program enforcement staff using settlement agreements and abatement orders

Level 3 - Attorney General Office - Litigation

This was a new measure in FY05, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

Notes : This was a new measure in FY05, therefore some prior year projections are not available.

Percentage of permitted public drinking water supply systems that are out of compliance with state regulations, and against which enforcement actions are resolved

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

Number of Properly Constructed Wells Drilled Annually in Missouri

Note: Other wells include monitoring wells, heat pump systems, test holes, underground injection wells - all classes and oil & gas wells. This was a new measure in FY 2005, therefore some prior year projections are not available.

Number of Permitted Well Installation Contractors in Missouri

Note: This was a new measure in FY 2005, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7b. Provide an efficiency measure.

Number of permit actions for control of discharges to the waters of the state completed each fiscal year

	FY 2003 Actual	FY 2004 Actual	FY 2005 Proj	FY 2005 Actual	FY 2006 Proj	FY 2007 Proj	FY 2008 Proj
Number of NPDES facility permit actions completed	3,685	4,468	3,200	5,435	4,500	4,500	4,500
Percent of permits issued within statutory deadlines	N/A	N/A	95%	95%	98%	100%	100%

Notes : The system that has been developed to track permits in progress did not allow the program to aggregate the permit backlog. Therefore we are not able to report the percentage of permits issued within the statutory deadlines for fiscal years prior to FY 2005. Number of permit actions complete includes new permits issued, renewal of permits, permit modifications and permit terminations. NPDES is the National Pollution Discharge Elimination System permits. This was a new measure in FY2005, therefore some prior year projections are not available.

7c. Provide the number of clients/individuals served, if applicable.

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual
Community Public Water Supply Systems	1,466	1,443	1,471
Non-Community Public Water Supply Systems	1,337	1,225	1,256
Permitted Wastewater & Stormwater Entities	11,625	12,664	14,156
Water Well Inquiries	12,121	12,129	16,164
On-site Field Assistance with Well Plugging	28	31	45
Active Water & Wastewater Facility Operator Certifications *	N/A	8,856	8,416
Water & Wastewater Operator Certification Examinations Given	1,221	1,093	1,261
Number Attending Water & Wastewater Operator Training Courses	9,733	10,119	11,433

Notes: The number of active permits (permitted wastewater and stormwater entities) was computed using the number active on July 1 of each fiscal year plus those new permits added during that fiscal year. Community Public Water Supply System - serves residential areas where a minimum of 25 people live all year (i.e. towns, cities, mobile home parks, subdivisions); Non-community Public Water Supply System - serves transient population of a minimum of 25 people per day (restaurants, schools, businesses, parks, highway rest areas).

* This is total number of active operator certifications in FY 2005 and not only the number of new and renewed certificates issued during the year. Staff must service all active certified operators to ensure eligibility to maintain their certification during the 3-year lifespan of a certificate. This information is not available for FY2003.

7d. Provide a customer satisfactions measure, if available.

Other Funds: Not applicable

Governor's Recommendations do not include personal services or FTE. The department plans to continue to implement our new compliance assistance activities. This funding is to act as a bridge for two fiscal years to avoid delaying implementation of the program. During that time we will be simplifying the permitting process and redirecting those efforts to the Initial Assistance Visits initiative. Since personal services and FTE were not recommended, the department is reviewing its existing permitting and other environmental activities to determine the best option for contract services. The department will then contract for those services and our existing FTE will be redirected to the Initial Assistance Visits initiative. This initiative is critical to achieving the positive results of our reorganization efforts. Working with the permitted community to resolve issues is important as it costs less to prevent pollution, than to clean it up afterward. In addition, the department plans to contract for the water resources activities requested in the new decision item.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.	
<p>In order to increase compliance throughout the state and to quantify and protect Missouri's natural resources, the department needs additional resources to provide front line compliance assistance across all environmental media, and to monitor and assess the state's water resources.</p> <p>Initial Assistance Visits: The department is committed to a new strategy of simplifying the permit process while improving the environment through follow-up with the permit recipient. Traditionally, considerable effort has been invested in writing very protective permits; however, many permit recipients have never been visited to ensure that they understand the permit and are following the permit conditions. Significant reduction of pollution, facilitated by increased compliance, is possible if the department is positioned to more readily assist the permit recipient. We are redirecting resources saved in the permitting process toward this effort; however, it will take one to two years to fully make this transition if we depend on the resultant savings. We have shared our plans with EPA, who is supportive of our immediate attention to this effort - instead of waiting one to two years for Missouri citizens to utilize the value of these changes. An expansion of this program is needed in order to fully implement the concept. Increased assistance should mean less enforcement, and follow-up will be required by the agency to meet permit requirements.</p> <p>Water Resources Staff: Staff are needed to enable the department to continue working on state water planning, drought mitigation efforts, and major water user reporting. The 2005 drought has underscored the need for more accurate evaluations of existing water resources. This expansion item will allow the department to evaluate and interpret water quantity information that can be used to address statewide water issues. The department will then be in a better position to make recommendations on where their limited funding resources need to be focused, such as public water supply. A more prompt response by the department in assessing drought conditions will enable drought-affected businesses and individuals access to federal relief funding. This will enable the department to do more analysis of the data that is being collected and apply it in resolving the state's water needs.</p> <p>Groundwater Monitoring Efforts: The groundwater monitoring network was established in the 1950's as a result of severe drought conditions. The department continues to address drought issues, as well as flood and water supply issues from a statewide, regional and local perspective. The current groundwater monitoring network consists of only 75 wells located in 58 of the 114 counties in Missouri. To address water supply issues, the state needs to expand the groundwater monitoring network to evaluate groundwater quantity for all portions of the state. Data gathered from the network gives local, regional and state officials the necessary information to make both short-term and long-term decisions about water supply issues. Not all counties are represented and many areas of the state have experienced increased development and need better information to make water supply decisions. The department's goal is to maintain a monitoring well in each county of the state and additional wells in counties where groundwater use exceeds three billion gallons per year. Resources are needed to allow the network to grow by approximately 40 wells per year for the next two years.</p>	

NEW DECISION ITEM	
RANK: 005	OF 009
Department of Natural Resources	Budget Unit 78518C; 78115C; 78847C
Department of Natural Resources	
Customer Assistance Visits and Water Resources Initiative	1780001
<p>Surface Water Monitoring Efforts: Through a cooperative agreement with the United States Geological Survey (USGS), the department supports the operation of several stream gages that collect flow data that are used in the department's work to address both water quality and quantity issues in the state. Gages on tributaries of the Missouri River are extremely important in defending the uses of this river in our state. In FY05, funding for these gages was eliminated from DNR's budget. The Missouri Department of Conservation assumed the responsibility for funding these gages in FY05 and FY06. The department is dependent upon consistent, long-term data collected from these gages to address water quality and quantity issues.</p> <p>New Surface Water Monitoring Efforts: Regional stream flow data is a key component of the drought assessment process. However, for drought assessment purposes, the current network of stream gages operated by the USGS does not provide adequate stream flow coverage in 38 counties. The department's goal is to monitor stream flows in every county of the state. Resources are needed to add approximately 19 stream gaging sites per year for two years.</p> <p>Drinking Water Reservoir Monitoring Efforts: An accurate assessment of the amount of drinking water available for public consumption is vital in planning for potential drinking water shortages. Through FY05, water quantity evaluations have been performed on 33 surface water reservoirs. Resources are needed to install staff gages in each of the reservoirs that has been studied and in all future reservoirs as the analyses are completed.</p> <p>Use Attainability Analysis: Upcoming revisions to the Missouri Water Quality Standards will require that over 22,000 miles of classified streams and over 293,000 acres of classified lakes be protected for swimming and other recreational uses, wherever attainable. Owners or operators of wastewater treatment systems will be required to disinfect effluent, unless it can be shown, through (1) an evaluation that disinfection is not required in order to meet bacteria standards in the classified stream or (2) a Use Attainability Analysis that the classified stream below the facility cannot support swimming. Additional resources will be necessary to hire contractors to perform the Use Attainability Analyses. These studies equip the department with the information needed to make decisions on water quality standards.</p>	

NEW DECISION ITEM RANK: 005 OF 009	
Department of Natural Resources Department of Natural Resources Customer Assistance Visits and Water Resources Initiative	Budget Unit 78518C; 78115C; 78847C 1780001
4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)	
<p>Initial Assistance Visits: Existing resources sufficient to conduct 1,075 initial assistance visits will be redirected in FY 2006. It is estimated that one FTE will conduct 380 visits per year. Based on the projection of 6,362 permits being issued in FY 2006 and an existing universe of over 21,000 facilities, 18 FTE are needed to fulfill this initiative. Due to the fact that these staff will be continually deployed in the field, expense and equipment for in-state travel has been increased over the standard by \$36,017, or \$2,000 additional per FTE. Other Expense and Equipment amounts are based on the department's standard per FTE.</p> <p>Water Resource Staff: Four staff are needed. One Environmental Engineer III will supervise the State Water Planning unit and will work with the program director to ensure the state's needs are being met; one Environmental Engineer II will provide engineering, and hydrologic/hydraulic expertise to improve the technical abilities of the unit and incorporate surface water and groundwater modeling; and two Hydrologist III's will provide hydrologist expertise and help bridge the gap between the groundwater and surface water work. The hydrologists will be responsible for working with major water users in the state to develop a more comprehensive estimate of how much water is being consumed and by whom so that adequate water resources are ensured for the future. Expense & Equipment amounts are based on the department's standard per FTE.</p> <p>New Groundwater Monitoring Efforts: Estimated contract cost for drilling 40 wells per year: $\\$8,500 \times 40 = \\$340,000$. This is an estimate since the actual cost of the well is dependent on location, depth, etc. Satellite connection through USGS = \$10,000. Laptop computers for network: $\\$2,647 \times 3 = \\$7,941$. Monitoring equipment: $\\$8,000 \times 40 = \\$320,000$.</p> <p>Surface Water Monitoring Efforts: The annual maintenance costs for the 8 stream gaging sites currently being funded by the Missouri Department of Conservation includes 50/50 match with USGS: $\\$6,350 \times 8 = \\$50,800$.</p> <p>New Surface Water Monitoring Efforts: The stream gaging costs are broken down into installation and maintenance costs. The total cost of stream gaging assuming 50/50 match with USGS is \$566,200; this includes installation and maintenance of 38 new gages in the first year. Installation of new gages: $\\$8,500 \times 38 = \\$323,000$; maintenance for new gages: $\\$6,400 \times 38 = \\$243,200$. Additionally, water quality monitoring: $\\$2,000 \times 20 \text{ sites} = \\$40,000$. Drinking Water Reservoir Monitoring Efforts:</p>

Other Funds: Water Pollution Control Fund (0385 & 0301); Water and Wastewater Loan Fund (0649); Water and Wastewater Loan Revolving Fund (0602); Stormwater Control Fund (0302 & 0387); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755)

2. CORE DESCRIPTION

Inadequate treatment of sewage, water used for drinking water supplies, and stormwater runoff causes public health hazards and pollutes streams and lakes. The construction of public drinking water or wastewater treatment facilities is expensive and many Missouri communities need financial assistance to meet these costs. The department operates several grant and loan programs to assist political subdivisions of the state in construction of adequate wastewater, stormwater and drinking water treatment facilities. This item requests the core funding to provide financial assistance to Missouri communities for drinking water and wastewater treatment projects. These loans and grants are administered by the Water Protection Program.

3. PROGRAM LISTING (list programs included in this core funding)

Water Infrastructure PSDs

CORE DECISION ITEM

Department of Natural Resources	Budget Unit	79415C
Division of Environmental Quality		
Water Infrastructure PSDs Core		

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	128,136,350	117,660,000	359,409,466	117,660,000	E
Less Reverted (All Funds)	(498,475)	0	0	N/A	
Budget Authority (All Funds)	127,637,875	117,660,000	359,409,466	N/A	
Actual Expenditures (All Funds)	9,963,719	39,458,457	136,918,035	N/A	
Unexpended (All Funds)	117,674,156	78,201,543	222,491,431	N/A	
Unexpended, by Fund:					
General Revenue	1,671,548	0	0	N/A	
Federal	0	0	0	N/A	
Other	116,002,608	78,201,543	222,491,431	N/A	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. No General Revenue remains in this budget. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) The FY06 appropriations are: State Grants for Wastewater Treatment Facilities at \$3,000,000 "E"; Clean Water State Revolving Fund Loans at \$60,000,000 "E"; Rural Water and Sewer Grants and Loans at \$20,660,000 "E"; Stormwater Control Grants and Loans at \$20,000,000 "E"; and Drinking Water State Revolving Fund Loans at \$14,000,000 "E". There were large unexpended balances in FY03 and FY04 because during FY03 and FY04 expenditures for the Water Infrastructure PSD programs were made through reappropriations as well as core appropriations due to the multi-year nature of the projects. In addition to the core spending shown above, there were expenditures through reappropriations of \$92,164,622 in FY03 and \$156,658,631 in FY04. In FY05, since there is no longer an operating reappropriation house bill, the core appropriations for these programs are estimated. The estimated appropriations are increased each year so that they can be used to encumber and pay obligations against these funds. The encumbrances roll over to the next fiscal year's core appropriation causing lapse of unexpended appropriation balances. Water and wastewater infrastructure projects are multi-year. The full amount of the project award is obligated in the state's financial system and that obligation is paid over several years.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Infrastructure PSDs

Program is found in the following core budget(s): Water Infrastructures PSDs

1. What does this program do?

The Water Infrastructure program provides grants and low-interest loans to Missouri communities for the construction of new, and the improvement of existing, drinking water, domestic wastewater, animal wastewater, stormwater control and rural water supply and sewer systems. These systems protect the water quality of the state and supply its citizens with affordable, safe drinking water and protection from stormwater damage. The Water Protection Program's Financial Assistance Center issues these grants and low-interest loans through the Clean Water and Drinking Water State Revolving Funds and through funding sources made available in Constitutional Amendment 7 passed in 1998. From 1989 through 2005 the department's Clean Water and Safe Drinking Water State Revolving Loan Funds have provided more than \$1.5 billion dollars to Missouri communities, through low-interest loans, saving them more than \$494 million in interest costs, and has helped to create approximately 81,000 construction jobs and 32,000 permanent jobs.

These programs provide Missourians with affordable, safe drinking water and wastewater services and protect streams and lakes from pollution. New and improved infrastructure results in jobs that promote economic vitality.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Safe Drinking Water Act with 1996 Amendments

Missouri Constitution Article III, Section 37(c), (e), (g), & (h)

RSMo Chapter 644

RSMo 640.100 through 640.140

Water Pollution Control and Stormwater Control Bonds

Missouri Clean Water Law

Missouri Drinking Water Law

3. Are there federal matching requirements? If yes, please explain.

Special Infrastructure Grant

25% State/20% Local

Clean Water State Revolving Fund Capitalization Grant

20%

Drinking Water State Revolving Fund Capitalization Grant

20%

4. Is this a federally mandated program? If yes, please explain.

This budget item contains several different pass through programs to enhance water and wastewater infrastructure. The programs funded through this budget item with federal mandates include Clean Water State Revolving Fund and Drinking Water State Revolving Fund.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Infrastructure PSDs

Program is found in the following core budget(s): Water Infrastructures PSDs

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

There were large unexpended balances in FY03 and FY04 because during FY03 and FY04 expenditures for the Water Infrastructure PSD programs were made through reappropriations as well as core appropriations due to the multi-year nature of the projects. In addition to the core spending shown above, there were expenditures through reappropriations of \$92,164,622 in FY03 and \$156,658,631 in FY04. In FY05, since there is no longer an operating reappropriation house bill, the core appropriations for these programs are estimated. The estimated appropriations are increased each year so that they can be used to encumber and pay obligations against these funds.

The federal funds from the Clean Water and Drinking Water State Revolving Fund Capitalization Grants flow through the Water and Wastewater Loan Fund (0649) which is categorized as Other Funds.

6. What are the sources of the "Other " funds?

Other Funds: Water Pollution Control Fund (0385 & 0301); Water and Wastewater Loan Fund (0649); Water and Wastewater Loan Revolving Fund (0602); Stormwater Control Fund (0302 & 0387); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755)

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Infrastructure PSDs

Program is found in the following core budget(s): Water Infrastructures PSDs

7a. Provide an effectiveness measure.

Amount of low-interest loans awarded to eligible local governments for construction and improvement of their water infrastructure and for controlling urban stormwater.

Notes: At this time, no stormwater control or rural water and sewer bond sales are projected for fiscal years 2006, 2007 or 2008. Applications for Clean Water SRF have been received and listed in the state fiscal year Intended Use Plan (IUP) beyond the award amounts estimated through FY 2008 above.

Total amount of grants awarded to eligible local governments for construction and improvement of their water infrastructure and for controlling urban stormwater.

Notes: FY 2003 stormwater applications were not awarded until FY 2004. No bond sales occurred in fiscal years 2004 and 2005. Awards are being made from balance of previous bond sales. At this time, no bond sales projected for FY 2006, FY 2007 or FY 2008. However, appropriation authority is requested to allow payment of outstanding obligations. Stormwater awards in FY 2006 will be made from deobligations of previous awards. Forty Percent Grants provide 40% of the cost of the project to small communities that cannot afford to finance the entire cost of construction of a facility.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Infrastructure PSDs

Program is found in the following core budget(s): Water Infrastructures PSDs

Infrastructure Loans And Grants Awarded Fiscal Years 2003, 2004 & 2005

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Infrastructure PSDs

Program is found in the following core budget(s): Water Infrastructures PSDs

7b. Provide an efficiency measure.

Savings to communities through use of leveraged Clean Water and Drinking Water State Revolving Fund loan programs

FY 2003 Actual \$67,611,778

FY 2004 Actual \$72,878,392

FY 2005 Actual \$26,260,785

Note: The bond pool for FY05 was approximately \$55 million; significantly lower than in the previous two fiscal years. It is anticipated that the bond pool for FY 2006 will increase.

7c. Provide the number of clients/individuals served, if applicable.

Number of communities utilizing the Infrastructure Loans and Grants program

Notes: Stormwater control grants - Funds are allocated only to first class counties and to any city within a first class county with population greater than 25,000 and to the Metropolitan St. Louis Sewer District (MSD). The number of stormwater loans and grants awarded includes all awards within each first class county. This was a new measure in FY05, therefore prior year projections are not available.

Total population served by the communities utilizing the Infrastructure Loans and Grants program

	2003	2004	2005
Public wastewater treatment facilities	1,889,453	1,004,523	1,638,412
Rural water, Sewer & Other	28,646	6,278	9,623
Drinking water systems	137,836	18,387	84,278

7d. Provide a customer satisfaction measure, if applicable.

Other Funds: Natural Resources Protection Fund -Water Pollution Permit Fee Subaccount (0568); Safe Drinking Water Fund (0679)

Note: Estimated appropriations are requested for Federal Funds.

2. CORE DESCRIPTION

This item requests core funding to help protect the integrity of public water systems and the quality of groundwater, streams and lakes. Projects, subgrants, and contracts are administered by the Water Protection Program of the Division of Environmental Quality (DEQ) to protect water quality.

Public Drinking Water Sample Analysis ensures that public water systems are routinely tested for possible contamination, thereby ensuring that the drinking water supplied by public water systems is safe and the health of Missouri's citizens is protected. Water Quality Studies gather information that is used to develop strategic initiatives toward protection of the quality of Missouri's groundwater, streams and lakes. These water resources are important to the state's citizens and economy for beneficial uses such as drinking water, recreation, and support of aquatic life.

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Water Quality Studies and Drinking Water Analysis Core

Budget Unit 79405C

3. PROGRAM LISTING (list programs included in this core funding)

Water Quality Studies and Drinking Water Analysis

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	9,501,369	9,791,369	14,792,176	9,791,369	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	9,501,369	9,791,369	14,792,176	N/A	
Actual Expenditures (All Funds)	4,818,501	4,778,460	4,019,740	N/A	
Unexpended (All Funds)	4,682,868	5,012,909	10,772,436	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	4,642,364	4,794,785	10,652,541	N/A	
Other	40,504	218,124	119,895	N/A	

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) FY06 appropriations are \$9,494,925 "E" for Water Quality Studies; \$296,444 for Drinking Water Analysis. Estimated appropriations are needed to allow encumbrances of projects which pay out over multiple fiscal years. The encumbrances roll over into the next fiscal year's core appropriation causing lapse of the unexpended appropriation balances.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Quality Studies and Drinking Water Analysis

Program is found in the following core budget(s): Water Quality Studies and Drinking Water Analysis

1. What does this program do?

Public Drinking Water Sample Analysis: Drinking water can be a principal agent in the transmittal of communicable diseases caused by various microorganisms, including viruses, bacteria, and protozoa's. In addition, drinking water can be a significant catalyst to humans for exposure to dozens of man-made and naturally occurring chemicals that cause increased risk to cancer and other toxic effects. In Missouri there are approximately 1,471 community and 1,256 non-community public water systems serving more than 90% of the state's population. These systems must be routinely inspected and samples from each must be frequently analyzed to assure the integrity of public water systems.

Water Quality Studies: Missouri has 104,329 miles of streams, with 22,203 miles classified for various uses. Missouri has more than 293,000 acres of classified lakes that permanently support aquatic life, as well as 1,100 identified springs. Water quality studies and projects funded by the department provide funds to regularly monitor, assess, protect and restore the quality of Missouri's waters. Most of the activities funded under this program are conducted by other government entities, watershed groups, universities, nonprofit organizations, and others through contracts with the department. The Water Protection Program provides guidance and oversight of these contracts to ensure efficient use of funds and appropriate focus of effort.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Section 319(h)	Federal Clean Water Act
Section 604(b)	Federal Clean Water Act
Section 104(b)(3)	Federal Clean Water Act
RSMo Chapter 640	Missouri Safe Drinking Water Law
RSMo 640.100.3 and 640.120	Water Testing Required

3. Are there federal matching requirements? If yes, please explain.

Section 319 Water Quality Studies Grants	40% State
Multiple Section 104(b)(3) Grants	Current grant match is 5% State/Local
Section 604(b) Grants	No match requirements, however the state must have federal delegation for a State Revolving Fund program in order to receive this funding.

4. Is this a federally mandated program? If yes, please explain.

Water Quality Studies support the federally mandated Clean Water Act (CWA) through CWA 305(b) reporting, CWA 303(d) list development, CWA Total Maximum Daily Load (TMDL) development, and CWA 402 National Pollution Discharge Elimination System (NPDES) permit development. Water Quality projects and studies will promote improvement in water quality when performed in accordance with federal 319 requirements and TMDL's.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Quality Studies and Drinking Water Analysis

Program is found in the following core budget(s): Water Quality Studies and Drinking Water Analysis

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 Planned is shown as full appropriation level: \$9,494,925 "E" for Water Quality Studies; \$296,444 for Drinking Water Analysis. Estimated appropriations are needed to allow encumbrances of projects which pay out over multiple fiscal years.

6. What are the sources of the "Other" funds?

Natural Resources Protection Fund -Water Pollution Permit Fee Subaccount (0568); Safe Drinking Water Fund (0679)

7a. Provide an effectiveness measure.

Notes : This was a new measure in FY05, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Quality Studies and Drinking Water Analysis

Program is found in the following core budget(s): Water Quality Studies and Drinking Water Analysis

Percentage of stream miles and lake acres safe and usable for the designated beneficial purposes

Note: Data collected and reported on bi-annual basis.

Total amount of grants awarded for water quality studies

Note: All grant funds available are not awarded each state fiscal year due to timing of receipt of federal award and sub-project application review and negotiation process. This was a new measure in FY05, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

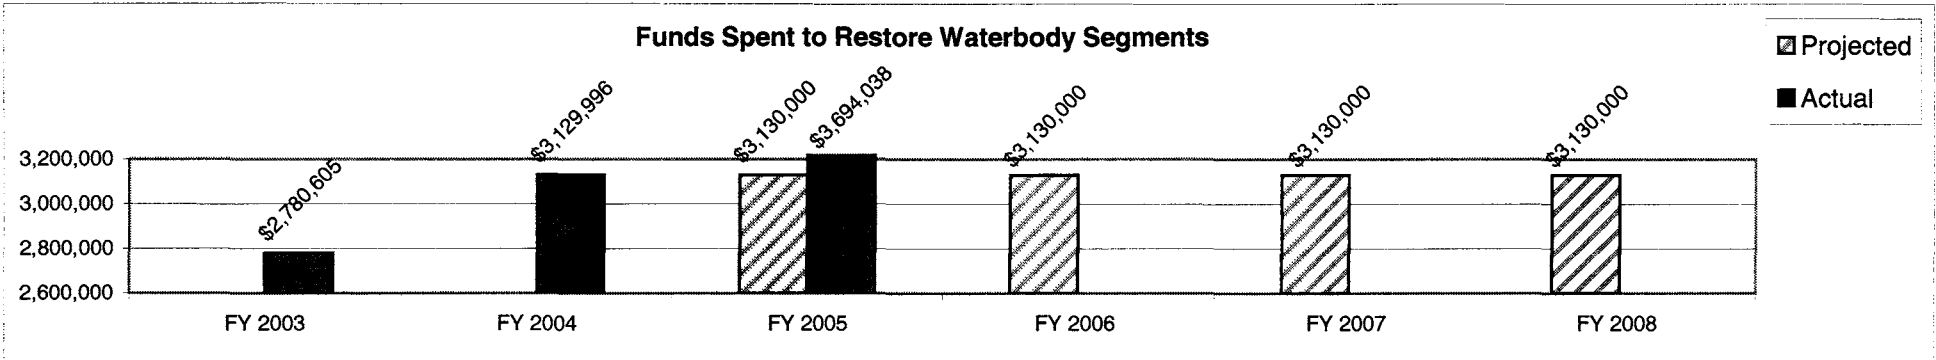

Department of Natural Resources

DEQ - Water Quality Studies and Drinking Water Analysis

Program is found in the following core budget(s): Water Quality Studies and Drinking Water Analysis

7b. Provide an efficiency measure.

Total amount of funds expended to fully or partially restore impaired waterbody segments identified on the 303(d) list pursuant to the Clean Water Act

Note: This efficiency measure is very similar to that required by Office of Management & Budget (OMB) in the Program Assessment Rating Tool. OMB requested that the efficiency measure relate dollar figures to outcomes. This was a new measure in FY05, therefore some prior year projections are not available.

Waterbody segments removed from the 303(d) list due to restoration

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Projected
Waterbody Segments Restored and Removed	26*	0**	0**	34***

Notes: The 303(d) list is developed every two years.

The 1998 303(d) list is used as a baseline and had 174 segments listed. The 26 restored or removed in the chart above relate to this list.

* The 2002 303(d) list was submitted by the department in August 2002 (FY2003). The segments on the list may be added or removed as data becomes available or criteria changes. Therefore the listed segments change with each list. Final EPA action on that list was not taken until December 2003 (FY2004). EPA stated that no 303(d) list was required for Missouri for 2000.

** During 2004, the Clean Water Commission directed the department to establish new methodology for development of the 303(d) list. This has resulted in an effort to combine 2004 303(d) list with the 2006 303(d) list which is expected to be completed in April 2006.

*** Includes waters where data indicates that the waterbody now meets water quality standards and those waterbodies where permit action is expected to result in elimination of impairment.

Other Funds: Concentrated Animal Feeding Operation Indemnity Fund (0834)									
2. CORE DESCRIPTION									
This appropriation allows expenditure of money in the Concentrated Animal Feeding Operation Indemnity Fund (0834) for closure of certain lagoon structures that have been placed in the control of government due to bankruptcy, failure to pay property taxes or abandonment. Pursuant to Section 640.745 RSMo, the owner of each Class I-A CAFO is to remit 10 cents per animal unit permitted to the fund on a yearly basis for a period of 10 years. The fund is administered by the department and is to be expended on the closure of Class IA, Class IB, Class IC or Class II CAFO wastewater lagoons. In the event the department determines that the owner has successfully closed the CAFO, all moneys paid by such operation into the fund are to be returned to the owner.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - CAFO Closures

Program is found in the following core budget(s): CAFO Closures

1. What does this program do?

Concentrated animal feeding operations (CAFO) that are subject to mandatory permits are designed to protect or avoid adverse impact on water quality in Missouri's lakes, streams and groundwater. Without appropriate treatment, CAFO wastewater would degrade Missouri's surface and groundwater resources, which will harm recreation and tourism, endanger public health, and require costly remediation to make those waters useable again. Assuring proper management of animal manure is a high priority of the Missouri Department of Natural Resources. Pursuant to Section 640.745 RSMo, the owner of each Class I-A CAFO is to remit 10 cents per animal unit permitted to the Concentrated Animal Feeding Operation Indemnity Fund on a yearly basis for a period of 10 years. The fund is administered by the department and is to be expended on the closure of Class IA, Class IB, Class IC or Class II CAFO wastewater lagoons. The appropriation allows the department to address the closure of lagoons when the control of a facility has been placed in control of the government due to bankruptcy, failure to pay property taxes or abandonment. To promptly begin closure, the department must have an existing appropriation to spend monies from the fund.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.740 – 640.747 Concentrated Animal Feeding Operation Closure of Wastewater Lagoons

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - CAFO Closures

Program is found in the following core budget(s): CAFO Closures

6. What are the sources of the "Other " funds?

Concentrated Animal Feeding Operation Indemnity Fund (0834)

7a. Provide an effectiveness measure.

Number of abandoned lagoons needing this funding to insure Missouri's water quality is protected

	FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Abandoned Lagoons	0	0	0	0	0	0	0	0	0

7b. Provide an efficiency measure.

Not applicable

7c. Provide the number of clients/individuals served, if applicable.

Number of CAFO operations required to provide this fee

	FY 2003 Actual	FY 2004 Actual	FY 2005 Projected	FY 2006 Projected	FY 2007 Projected	FY 2008 Projected
Class IA CAFO	15	15	15	15	15	11

Note: FY08 projection has been reduced due to a statutory provision that this fee can only be collected from Class IA facilities for 10 years.

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund - Damages Subaccount (0555), Missouri Air Pollution Control Fund (0691)

2. CORE DESCRIPTION

The Air Pollution Control Program (APCP) strives to maintain and improve the quality of Missouri's air to protect public health, general welfare and the environment. The APCP operates according to the Clean Air Act, State Implementation Plans and Rules. The APCP reviews construction and operating permits to help ensure facilities are built in compliance with the laws and rules and that they will not cause violations of ambient air quality standards. The APCP, working with the department's regional office staff, identifies facilities that are not in compliance and works with them to reach compliance. Should those efforts prove to be unsuccessful, the program will start enforcement action. By collecting air monitoring and emission inventory data, the APCP provides benchmark data for the state's air quality planning efforts. Air monitoring data can be measured against that benchmark to provide an indicator of whether air pollution control in Missouri is successful. The APCP helps ensure that the ozone levels in the St. Louis area, which has not attained ambient air quality standards, improve and eventually meet federal health-based air standards.

3. PROGRAM LISTING (list programs included in this core funding)

Air Pollution Control Program

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Air Pollution Control Program Core

Budget Unit 78865C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds)	5,561,858	5,414,579	5,428,614	5,170,002
Less Reverted (All Funds)	(15,271)	0	0	N/A
Budget Authority (All Funds)	5,546,587	5,414,579	5,428,614	N/A
Actual Expenditures (All Funds)	4,854,891	4,304,677	4,085,233	N/A
Unexpended (All Funds)	691,696	1,109,902	1,343,381	N/A
Unexpended, by Fund:				
General Revenue	57	0	0	N/A
Federal	221,093	542,273	542,093	N/A
Other	470,546	567,629	801,288	N/A
	(1)	(1),(2)	(1)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) The majority of the lapse was in E&E partly due to FY03 and FY04 expenditures for MOEIS (electronic reporting system) being less than anticipated for those years. The majority of the FY05 lapse was in E&E; program expenditures were restricted.
- (2) Prior to FY04, General Revenue provided over \$300,000 in funding; this funding was core reduced in FY04.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

1. What does this program do?

The Air Pollution Control Program (APCP) strives to maintain and improve the quality of Missouri's air to protect public health, general welfare and the environment. The APCP operates according to the Clean Air Act, State Implementation Plans and Rules. The APCP reviews construction and operating permits to help ensure facilities are built in compliance with the laws and rules and that they will not cause violations of ambient air quality standards. The APCP, working with the department's regional office staff, identifies facilities that are not in compliance and works with them to reach compliance. Should those efforts prove to be unsuccessful, the program will start enforcement action. By collecting air monitoring and emission inventory data, the APCP provides benchmark data for the state's air quality planning efforts. Air monitoring data can be measured against that benchmark to provide an indicator of whether air pollution control in Missouri is successful. Three areas within the state are designated non-attainment, including, the St. Louis Ozone Non-attainment area, the St. Louis PM_{2.5} Non-attainment area, and the Herculaneum Lead Non-attainment area. We are working to attain these federal standards.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMO 643.010 through 643.220	Prevention, abatement, and control of air pollution
RSMO 643.225 through 643.265	Asbestos abatement
Federal Clean Air Act, with amendments, 1990	

3. Are there federal matching requirements? If yes, please explain.

Ambient Air Monitoring Network Project (PM 2.5) Grant	100% Federal
National Air Toxic Trends Site Grant	100% Federal
The Performance Partnership Grant requires the state to provide a continuing level of state funding.	Approximately 40% for the current year

4. Is this a federally mandated program? If yes, please explain.

The department is delegated federal authority to ensure compliance with the Federal Clean Air Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.
FY06 Planned expenditures are shown at full appropriation spending.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

6. What are the sources of the "Other" funds?

Natural Resources Protection Fund-Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund-Air Pollution Permit Fee Subaccount (0594), Missouri Air Pollution Control Fund (0691); Natural Resources Protection Fund (0555)

7a. Provide an effectiveness measure.

Number of major sources, inspections, NOV's, settlements and referrals for large sources holding operating permits

Sources are facilities who have a operating permit. Sources are classified as Intermediate, Basic, or Part 70 facilities. NOV stands for Notice of Violation; the majority of NOV's are resolved without monetary penalty. A settlement is when the APCP resolves a NOV with a paid or suspended monetary penalty. Referrals occur when the APCP sends an unresolved NOV to the Attorney Generals Office for further enforcement action. This was a new measure in FY 2005, therefore some prior year projections are not available.

Quarterly averages for lead samples

Note: The National Ambient Air Quality Standard for lead is 1.5 ug/m3 averaged over a calendar quarter. The first quarters of CY05 were high because two violations of the NAAQS were recorded in the first two quarters of 2005. Operations have ceased indefinitely at the Glover Big Creek site, therefore future projections are at 0.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

The eight-hour National Ambient Air Quality Standard is 85 ppb, to be determined as follows: For each site, the fourth highest daily eight-hour average for each year of a consecutive three-year period are averaged. The site with the highest value determines the design value for the area. If the design value is 85 ppb or greater the area is in violation.

The National Ambient Air Quality Standard for PM 2.5 is 15.0 ug/m3, averaged over a three year period. Meteorological conditions in 2004 were conducive to lower PM 2.5, which may not occur in 2005.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

7b. Provide an efficiency measure.

Reduce average days required for construction permit issuance

Note: This was a new measure in FY05, therefore some prior year projections are not available.

7c. Provide the number of clients/individuals served, if applicable.

Missourians with Asthma (can be triggered by air pollutants)

Asthma is a chronic disease which can range from mild to life-threatening. Allergens, respiratory infections, heavy exercise, exposure to chemicals, fumes, and smoke can all trigger asthma attacks. Although there is no cure for asthma yet, medication and avoiding a known trigger can reduce the number of attacks and their severity.

4,249,841 Total Missourian adults, age 18 or older, in the year 2003.
1,431,398 Total St. Louis Non-attainment area adults, age 18 or older, in the year 2000.
505,731 Missourian adults have reported being diagnosed with asthma.
123,452 St. Louis Non-attainment area adults have reported being diagnosed with asthma in the year 2003.
397,696 Missouri households where at least one child had asthma in the year 2001.
57,459 Older Missourians (age 65 or older) reported being diagnosed with asthma in the year 2003.
288,247 Missourians visited the emergency room for asthma between the years 1993 and 2002.
128,677 St. Louis Non-attainment area citizens visited the emergency room for asthma between the years 1993 and 2002.
64,111 Missourians were hospitalized due to asthma between the years 1993 and 2001.
30,696 St. Louis Non-attainment area citizens were hospitalized due to asthma between the years 1993 and 2002.
1,212 Missourians died due to asthma between the years 1993 and 2002.
419 St. Louis Non-attainment area citizens died due to asthma between the years 1993 and 2002.
\$16,100,000,000 - Estimated annual health care cost associated with asthma (source: American Lung Association).

Corresponding data for children and other years are currently not available. The Missouri Department of Health and Senior Services does not have a system in place to completely measure the burden of asthma amounts in children in Missouri. Corresponding costs for asthma in Missouri is currently not available. The Missouri Department of Health and Senior Services provides the Asthma statistics and this data is the most current available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

Total population of area served by the Missouri Department of Natural Resources and Local Agencies and the vulnerable population of Missouri

Missouri Residents Served by MDNR and Local Air Agencies

Total Population = 5.5 Million

Notes: The chart shows the number of people residing in the counties within the various local agency jurisdictions. In these jurisdictions, the respective local agency performs inspections, permitting and air monitoring (except Kansas City.) DNR performs those functions in the remaining counties not served by a local agency. The 2000 Census information for the total population is the most current data.

Missouri Population that are Extremely Vulnerable to Air Pollutants

Missourians over 75 years old	362,000
Missouri Adults with Asthma	505,731
Minimum number of Missouri Children with Asthma	397,696
Total	1.26 million
Total Population of Missouri	5.5 million
Percent of Missourians Extremely Vulnerable to Air Pollutants	23%

7d. Provide a customer satisfaction measure, if available.

Other Funds: Natural Resources Protection Fund-Air Pollution Permit Fee Subaccount (0594); Natural Resources Protection Fund-Air Pollution Asbestos Fee Subaccount (0584)									
Note: An estimated appropriation is requested for the \$2,102,000 from Federal Funds and Other Funds. In addition, we request the appropriation language be changed to allow contract expenditures from Federal Funds and Other Funds.									
2. CORE DESCRIPTION									
The Air Pollution Control Grants core program supports four local governmental agencies. The Missouri Air Conservation Commission granted certificates of authority to four local government agencies to implement the Missouri Air Conservation Law. Grants to these four local government air agencies in Kansas City, St. Louis City, St. Louis County and Springfield help fund their air monitoring and pollution control activities. Local agencies issue air permits, maintain their own air monitoring networks, perform inspections and respond to citizen inquiries. The local air agencies provide these additional services in the most heavily populated areas of the state. The department maintains oversight of the locals through routine audits, constant communication, and review of inspection reports and administrative orders. In addition, grants are given to agencies such as the metropolitan planning organizations (East-West Gateway Coordinating Council in the St. Louis area and Mid-America Regional Council in the Kansas City area) to carry out planning activities that reduce air pollution. In addition, the department may utilize contractors to assist with air monitoring and pollution control activities.									
3. PROGRAM LISTING (list programs included in this core funding)									
Air Pollution Control Grants and Contracts									

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Grants and Contracts

Program is found in the following core budget(s): Air Pollution Control Grants and Contracts

1. What does this program do?

The Missouri Air Conservation Commission granted certificates of authority to four local governments agencies to implement the Missouri Air Conservation Law. Grants to these four local government air agencies in Kansas City, St. Louis City, St. Louis County and Springfield help fund their air monitoring and pollution control activities. Local agencies issue air permits, maintain their own air monitoring networks, perform inspections and respond to citizen inquiries. The local air agencies provide additional services in the most heavily populated areas of the state. Grants are also given to agencies such as the metropolitan planning organizations (East-West Gateway Coordinating Council in the St. Louis area and Mid-America Regional Council in the Kansas City area) to carry out planning activities directed at reducing air pollution. In particular, ozone and PM 2.5 levels are a measure of effectiveness for these areas. In addition, the department may utilize contractors to assist with air monitoring and pollution control activities.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMO 643.225 through 643.265

Asbestos Abatement

RSMO Chapter 643

Prevention, Abatement, and Control of Air Pollution

Federal Clean Air Act, with amendments (1990)

3. Are there federal matching requirements? If yes, please explain.

Ambient Air Monitoring Network Project (PM 2.5) Grant

100% Federal

National Air Toxic Trends Site Grant

100% Federal

The Performance Partnership Grant requires the state to provide a continuing level of state funding.

Approximately 40% for the current year

4. Is this a federally mandated program? If yes, please explain.

The department is delegated federal authority to ensure compliance with the Federal Clean Air Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. The FY04 total expenditures are low compared to FY03 because the Kansas City local air agency is no longer performing air monitoring duties; the department is currently handling those duties. FY06 expenditures are shown as spending at full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Grants and Contracts

Program is found in the following core budget(s): Air Pollution Control Grants and Contracts

6. What are the sources of the "Other " funds?

Natural Resources Protection Fund-Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund-Air Pollution Permit Fee Subaccount (0594)

7a. Provide an effectiveness measure.

Reducing design values in the Kansas City, St. Louis and Springfield Metropolitan Statistical Areas (MSA)

The eight-hour National Ambient Air Quality Standard is 85 ppb, to be determined as follows: For each site, the fourth highest daily eight-hour average for each year of a consecutive three-year period are averaged. The site with the highest value determines the design value for the area. If the design value is 85 ppb or greater the area is in violation.

The National Ambient Air Quality Standard for PM 2.5 is 15.0 ug/m3, averaged over a three year period. Meteorological conditions in 2004 were conducive to lower PM 2.5, which may not occur in 2005.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Grants and Contracts

Program is found in the following core budget(s): Air Pollution Control Grants and Contracts

Inspections performed by local agencies

7b. Provide an efficiency measure.

Grant awards (Program Specific Distribution dollars/sources)

Area	PSD Dollars	Sources
Springfield	\$304,167	143
Kansas City	\$478,860	286
St. Louis County	\$714,397	423
St. Louis City	\$1,030,748	403

Note: Sources equals the number of installations in the Local Agency jurisdiction. PSD Dollars represents Federal Funds and Fees.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Air Pollution Control Grants and Contracts

Program is found in the following core budget(s): Air Pollution Control Grants and Contracts

7c. Provide the number of clients/individuals served, if applicable.

Missouri Residents Served by MDNR and Local Air Agencies

Total Population = 5.5

Missouri Population Extremely Vulnerable to Air Pollutants

Missourians over 75 years old	362,000
Missouri Adults with Asthma (18 or older)	505,731
Minimum number of Missouri Children with Asthma	397,696
Total	1.26 million

Total Population of Missouri 5.5 million

Percent of Missourians Extremely Vulnerable to Air Pollutants 23%

The chart shows the number of people residing in the counties within the various local agency jurisdictions. In these jurisdictions, the respective local agency performs inspections, permitting and air monitoring (except Kansas City.) DNR performs those functions in the remaining counties not served by a local agency. The 2000 Census information for the total population is the most current data.

7d. Provide a customer satisfaction measure, if available.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

	FY 2007 Governor's Recommendation			
	GR	Fed	Other	Total
PS	0	3,563,936	1,572,697	5,136,633
EE	0	491,984	255,516	747,500
PSD	0	0	0	0
Total	0	4,055,920	1,828,213	5,884,133
FTE	0.00	94.47	43.71	138.18

Est. Fringe	0	1,742,408	768,892	2,511,300
--------------------	---	-----------	---------	-----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Underground Storage Tank Regulation Program Fund (0586); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Hazardous Waste Fund (0676); Dry-cleaning Environmental Response Trust Fund (0898); and Mined Land Reclamation Fund (0906)

2. CORE DESCRIPTION

The goal of the Hazardous Waste Program is to protect human health and the environment from threats posed by hazardous waste and other contaminants. To accomplish this goal, the program: encourages the reduction of hazardous waste generation, regulates the management of hazardous waste, oversees the cleanup of contamination, promotes property re-use, regulates the management, removal and cleanup of petroleum storage tanks and insures long term stewardship of sites where contamination remains. The Hazardous Waste Program:

- Is responsible for ensuring compliance with laws and regulations designed to prevent pollution.

- Issues permits to facilities that treat, store or dispose of hazardous waste and oversees cleanups at those facilities.

- Assesses contaminated sites and oversees the cleanup of contamination at sites subject to federal Superfund law and other laws.

- Oversees cleanups of chemical and radiological contamination at federally owned sites, primarily those controlled by the United States Department of Defense or the Department of Energy.

- Registers and regulates underground storage tanks and oversees the cleanup of releases from petroleum storage tanks.

- Provides oversight services for those who wish to voluntarily clean up contamination to bring these sites back into productive use.

- Administers the drycleaner environmental cleanup program.

- Engages in long-term stewardship activities to insure that cleanup decisions made today are safe for future generations.

- Registers and receives reporting from sites in Missouri that generate hazardous waste.

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Hazardous Waste Program Core

Budget Unit 78870C

3. PROGRAM LISTING (list programs included in this core funding)

Hazardous Waste Program

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds) (1)	6,855,283	7,048,113	7,410,534	6,240,339
Less Reverted (All Funds)	(4,141)	0	0	N/A
Budget Authority (All Funds)	6,851,142	7,048,113	7,410,534	N/A
Actual Expenditures (All Funds)	6,129,506	6,264,402	6,747,047	N/A
Unexpended (All Funds)	721,636	783,711	663,487	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	265,602	290,942	149,966	N/A
Other	456,034	492,769	513,521	N/A
	(2)	(2)	(2), (3)	(4)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) Due to budget reductions, no General Revenue remained in this program budget after FY03.

(2) Lapse amounts are due to the hiring of only critical positions in an effort to manage state funding concerns.

(3) In addition to pay plan, FY05 appropriations were increased due to core reallocations from other programs within the Air and Land Protection Division to provide more emphasis on hazardous waste compliance issues and to allow for more direct assistance with hazardous waste systems related efforts.

(4) FY06 appropriations do not include PSTIF (0585) appropriations. Beginning in FY06, PSTIF-related appropriations are budgeted in the Petroleum Related Activities core. FY06 appropriations also reflect the transfers related to IT Consolidation.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

1. What does this program do?

The three functions of the Hazardous Waste Program are:

Pollution Prevention – The program works with businesses that generate and transport hazardous wastes to ensure safe handling and disposal. The program issues identification numbers, certifications and permits to companies that treat, store and dispose of hazardous wastes. In reporting year 2004, Missouri companies generated about 165,000 tons of hazardous waste. Approximately 65% of this was treated or disposed of in Missouri. During this same period, Missouri received almost 204,000 tons of hazardous waste from outside the state. Over 95% of this imported waste was burned by Missouri cement kilns in their cement making operations as a substitute for coal. The program oversees the operation of over 3,700 underground storage tank sites.

Cleanup – The program exists to address contamination not caused by nature. The program implements laws that require responsible parties to be accountable for the contamination they cause. The program also works with voluntary parties seeking to clean up contamination. In all cases, the department provides oversight for investigating and remediating contamination. Examples are: Brownfields, gas stations, major oil refineries, abandoned lead mine sites, major industrial areas, wood treaters, Superfund sites and many others.

Long Term Stewardship – Because most cleanups leave some residual contamination, the program implements long-term stewardship measures to insure that cleanup decisions result in safe and productive reuse of properties for future generations. Examples of long-term stewardship tools include: engineered controls to isolate contamination, property controls to limit activities, governmental controls such as zoning or permits, informational devices and regular inspections.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Pollution Prevention

Resource Conservation and Recovery Act of 1976, as amended, Public Law 94-580

Solid Waste Disposal Act of 1976

Toxic Substances Control Act, as amended, Section 28 and 404 (g), Public Law 102-550

RSMo 260.350 through 260.434

Hazardous Waste Facility Permits - Permitting, Inspection and Enforcement; Resource Conservation and Recovery Act (RCRA)

RSMo 260.375

Hazardous Waste Transporter Licensing

RSMo 260.390

Commercial Hazardous Waste Facility Inspection Program

RSMo 260.396

PCB Inspections

RSMo 319.100 through 319.139

Petroleum Storage Tanks

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

Remediation and Long-term Stewardship

Comprehensive Environmental Response, Compensation, and Liability Act of 1980,
Public Law 96-510, as amended

Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499

Atomic Energy Act of 1954, as amended, Section 21, Public Law 83-703

Energy Reorganization Act of 1974, Public Law 93-438

Department of Energy Organization Act of 1977, as amended; Public Law 95-604

Energy Policy Act of 1992, Title X and XI

Small Business Liability Relief and Brownfields

Revitalization Act

RSMo 260.435 through 260.480

RSMo 260.565 through 260.609 and RSMo 447.700 through 447.708

RSMo 260.900 through 260.965

RSMo 319.100 through 319.139

Abandoned or Uncontrolled Sites (Registry)

Voluntary Remediation including Brownfields

Drycleaner Remediation

Petroleum Storage Tanks

3. Are there federal matching requirements? If yes, please explain.

Performance Partnership Grant - RCRA	25% State
Performance Partnership Grant - UST	25% State
Performance Partnership Grant - Toxic Substances Control Act (TSCA) PCB	25% State
Bee Cee Superfund Site Cooperative Agreement	10% State
Brownfields Targeted Assessment Cooperative Agreement	100% Federal
Brownfields 128 (A)	100% Federal
Defense/State Memorandum of Agreement (DSMOA)	100% Federal
Ellisville Superfund Cooperative Agreement	100% Federal
Airborne Hyperspectral Imagery Pilot Grant Agreement	100% Federal
U.S. Army Corps of Engineers Formerly Utilized Sites Remedial Action Project (FUSRAP)	100% Federal
Federal Facilities Management Assistance Cooperative Agreement (MACA)	100% Federal
General Services Administration (GSA) Bannister Complex	100% Federal
Inventory of Abandoned Smelter Sites	100% Federal

(continued on following page)

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

3. Are there federal matching requirements? If yes, please explain.

Continued:

U.S. Department of Energy - Kansas City Plant Grant	100% Federal
Oak Grove Village Well Site Remedial Investigation/Feasibility Study	100% Federal
St. Louis Army Ammunition Plant Funding Agreement	100% Federal
Superfund Enforcement Cooperative Agreement	100% Federal
Superfund Consolidated Program Cooperative Agreement (MACA and PA/SI portions of the consolidated CA are 100% federally funded)	10% State
Weldon Spring Site Remedial Action Project (WSSRAP)	100% Federal
Whiteman Air Force Base Minuteman II Memorandum of Agreement	100% Federal
Leaking Underground Storage Tank Trust Fund	10% State

4. Is this a federally mandated program? If yes, please explain.

Work performed under the Resource Conservation and Recovery Act (RCRA) for hazardous waste and underground storage tanks; the Comprehensive Environmental Response Compensation, and Liability Act (CERCLA) for Superfund; Solid Waste Disposal Act and TSCA; and federal facility site cleanups are all mandated by the U.S. government.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Due to budget reductions, no General Revenue remained in this program budget after FY03. FY06 appropriations do not include PSTIF (0585) appropriations. Beginning in FY06, PSTIF-related appropriations are budgeted in the Petroleum Related Activities core. FY06 appropriations also reflect the transfers to IT Consolidation. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 Planned is shown at full appropriation.

6. What are the sources of the "Other " funds?

Natural Resources Protection Fund - Damages Subaccount (0555); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Underground Storage Tank Regulation Program Fund (0586); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Hazardous Waste Fund (0676); Hazardous Waste Remedial Fund (0690); Dry-Cleaning Environmental Response Trust Fund (0898); and Mined Land Reclamation Fund (0906).

Note: SB 225 (2005) combines the Hazardous Waste Remedial Fund (0690) into the Hazardous Waste Fund (0676), therefore eliminating the HWRF starting in FY06.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure.

Percentage of Resource Conservation and Recovery Act (RCRA) Inspections that do not Result in Issuance of Notice of Violation

Note: The Hazardous Waste Program and Regional Office staff conduct inspections to ensure that regulated businesses manage their wastes in a safe manner. Until recently, staff also conducted inspections to ensure that regulated facilities also operated their petroleum storage tanks in a safe manner. As of July 1, 2005, the department no longer has funding to conduct petroleum underground storage tank inspections. In past years, petroleum underground storage tank sites were less likely to receive a Notice of Violation than were hazardous waste generators. Consequently, beginning July 1, 2005, the percentage of inspections resulting in Notice of Violation issuance will increase. Because the department has a consistent inspection/enforcement presence, most regulated sites are in compliance with the laws and regulations. Program selected initiatives change from year-to-year, sometimes focusing on problem sites, sometimes on those facilities that have not previously been inspected and sometimes on specific industry sectors. Therefore, decreases in the number of facilities that warrant a notice of violation cannot be viewed as the only indicator of program success. This was a new measure in FY05 therefore some prior year projections are not available.

Annual Cleanup of Underground Petroleum Storage Tank Sites

Notes: These sites may have residual groundwater or soil contamination after clean-up and, therefore, may still require long-term stewardship to monitor, maintain or control future land use (e.g. industrial vs. residential). Cleanups per year will exceed yearly releases through 2016, gradually reducing the current inventory.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

Note: After 2017, projected cleanups per year will equal new releases.

Reduction in Elevated Blood Lead (EBL) in Children at Jasper County and St. Francois County Superfund Sites

Notes: (1) Data gathered from a one-time controlled study performed by the Department of Health. (2) Data from voluntary blood screening at St. Francois County Health Department. The program continues to be actively involved in the cleanup of lead sites in Missouri.

PROGRAM DESCRIPTION

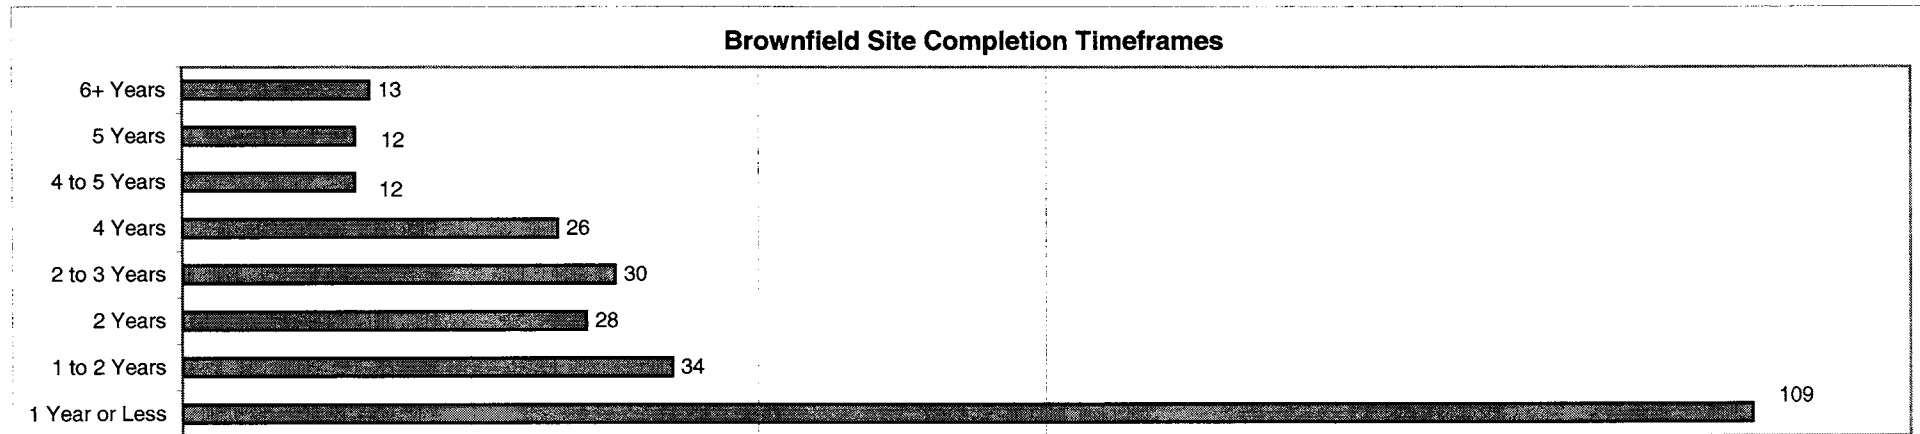

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7b. Provide an efficiency measure.

Number of Brownfields/Voluntary Cleanup Program Sites Completed (Cumulative)

Notes: Approximately 40% of Brownfield sites are cleaned up in a year or less and over 65% of Brownfield sites are cleaned up within 2 years.
This chart reflects sites completed from 1995 - 2005.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7c. Provide the number of clients/individuals served (if applicable)

Clients Served	FY 2005
Treatment, Storage, & Disposal sites	100
Resource Recovery sites	29
Underground Storage Tanks (UST)/Leaking USTs	3,757
Federal Facility sites	292
Drycleaner sites	337
Brownfields/Voluntary Cleanup sites	202
Hazardous Waste Generators	4,100
Superfund sites	280
Totals	9,097

Notes: SB225 and SB170 (2005) exempt drycleaner facilities that use non-chlorinated solvents. Therefore the number of regulated sites has decreased.

7d. Provide a customer satisfaction measure, if available.

Not available

NEW DECISION ITEM

RANK: 006 OF 009

Department of Natural Resources Division of Environmental Quality General Revenue Transfer to Hazardous Waste Fund	Budget Unit <u>79240C</u> 1780002
---	--

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Department of Natural Resources requests \$1,945,725 in General Revenue for transfer to the Hazardous Waste Fund to pay the state's share of Superfund cleanups at the Jasper County lead sites. A Legislative Interim Committee examined funding shortfalls of the Hazardous Waste Program during 2004 and concluded it was unfair to ask presently-operating hazardous waste generators to pay the entire cost for cleaning up improper or illegal waste handling or disposal by past generators or transporters. Since the public benefits from cleanup of past contaminated sites, the Committee recommended the public should bear a portion of the cost. One of the mechanisms for that public contribution is the use of general revenue to pay the state share of Superfund cleanups. Senate Bill 225 passed during the 2005 legislative session states "...the department shall request an annual appropriation of general revenue equal to any state match obligation to the U.S. Environmental Protection Agency (EPA) for cleanup performed pursuant to the authority of the Comprehensive Environmental Response, Compensation and Liability Act of 1980(CERCLA)." (RSMo 260.391.7). This General Revenue appropriation request meets that obligation.

Failure to repay EPA for the state's share of Superfund obligations could cause EPA to cease putting Missouri's projects in the queue to receive federal remediation funding. Currently, the department is aware of seven future Superfund cleanups that will require a 10% state match obligation. This state match is expected to range from \$3 million to \$10 million. These monies will leverage cleanups that in total could cost between \$50 to \$100 million.

MDNR received a letter dated June 10, 2005 from EPA documenting the State of Missouri's 10% match obligation for remedial action conducted at the Jasper County Lead Superfund Site. Total federal expenditures were \$19,457,252, with a state share of \$1,945,725. The state share may be paid in a single payment or in 3 annual payments of \$648,575.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

RSMo 260.391.7 states "...the department shall request an annual appropriation of general revenue equal to any state match obligation to the U.S. Environmental Protection Agency for cleanup performed pursuant to the authority of the Comprehensive Environmental Response, Compensation and Liability Act of 1980." This appropriation request is to fund the match obligation to the U.S. EPA for activities at the Jasper County Lead Sites. The EPA has agreed to consider additional work at the Jasper County Lead Sites conducted by DNR as "in-kind" work which can be applied as a direct reduction to Missouri's required share of the Jasper County lead site cleanup.

NEW DECISION ITEM
RANK: 006 OF 009

Department of Natural Resources	Budget Unit 79240C
Division of Environmental Quality	
General Revenue Transfer to Hazardous Waste Fund	1780002

The June 2005 letter from the U.S. EPA addressed the use of phosphate stabilization as an alternative treatment method in certain situations for Jasper County lead sites. The U.S. EPA has agreed that test results indicate that this method of treatment is effective. They have further agreed to allow MDNR to proceed with treatment of certain sites in Jasper County and apply the amount spent on phosphate treatment to the 10 percent state match owed on this project. The EPA stated that this treatment would eliminate the need for long-term health education at the site, thereby reducing the overall costs associated with lead-contaminated residential yards in Missouri and the nation. If this decision item and the option of using "in kind" work as an alternative to the direct cash payment to EPA is approved the department will hire and oversee third-party contractors to perform this work.

The total match obligation is \$1,945,725; the June 10, 2005 letter from EPA requests payment of the state's portion of the costs for superfund cleanup at the Jasper County lead sites. The letter states that the amount of the 10% match is to be paid within ninety days of appropriation as one sum of \$1,945,725 or three payments of \$648,575. The use of "in kind" work is another alternative to meeting this outstanding obligation.

Appropriated Transfer \$1,945,725 General Revenue 0.00 FTE

Department of Natural Resources	Budget Unit	<u>79240C</u>
Division of Environmental Quality		
General Revenue Transfer to Hazardous Waste Fund	1780002	

6c. Provide the number of clients/individuals served, if applicable.

2005 Jasper County Population

All Persons: 106,416

Under the age of 14: 21,098

Note: Approximately 76% of the Jasper County population or 81,000 live in or adjacent to the Jasper County Superfund Site. Approximately 20% or 16,000 of this population are under the age of 14. Young children are the group most vulnerable to the effects of lead. The population of children is forecasted to increase by 10% over the next 10 years. Therefore, this work benefits both current and future residents.

6d. Provide a customer satisfaction measure, if available.

Not available

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

Collaborate with the Environmental Protection Agency to administer CERCLA in Missouri.

Work with landowners and developers and others to remediate lead-affected properties.

Other Funds: Hazardous Waste Fund (0676); Dry-cleaning Environmental Response Trust Fund (0898). With the passage of SB 225 in the 2005 legislative session the Hazardous Waste Remedial Fund (0690) was consolidated into the Hazardous Waste Fund (0676).

Notes: Estimated appropriations are requested on Federal Funds, Hazardous Waste Fund and Dry-cleaning Environmental Response Trust Fund.

2. CORE DESCRIPTION

The Hazardous Waste Program exists in part to address environmental contamination caused by human activity at sites such as Brownfields, gas stations, major oil refineries, old mining sites, wood treaters, and other sites. In most cases, the program sets standards and oversees other entities who perform the needed investigation and cleanup activities. These entities include responsible parties, voluntary businesses and developers and federal, state and local governments. However, in some cases, the program takes direct control of the investigation or cleanup at a site using funds provided for that purpose from federal or state sources. The program uses these resources to engage consultants and contractors to perform fieldwork and prepare workplans and reports.

Leaking Underground Storage Tanks: The federal government provides resources to states to address contamination from underground tank releases in situations where there is a threat to human health and the environment but no willing, viable, responsible party can be found. The federal government also allows the state to use these funds to assist cities where abandoned underground tanks are an impediment to revitalization efforts.

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Brownfields & Other Hazardous Site Cleanups

Budget Unit 79445C

Drycleaner Environmental Cleanup: Senate Bill 577, passed in 2000, created the Dry-cleaning Environmental Response Trust (DERT) Fund to assist in the cleanup of contaminated drycleaner sites. The first four years of the program were dedicated to building the fund and the program. The Joint Committee on Administrative Rules disapproved the rulemaking on September 16, 2004. Senate Bill 170 and Senate Bill 225 (2005) reauthorized the DERT Fund with changes. The program is currently addressing three pilot sites and is set for full implementation in FY 2006, focusing on contaminated groundwater sites. The DERT program is a reimbursement program. The department will reimburse eligible parties for qualifying investigation and cleanup expenses over the \$25,000 deductible.

Hazardous Substance Cleanup: The federal government and the state provide resources to address hazardous substance sites in Missouri where there is no willing, viable responsible party. In the past two years the majority of this appropriation has been used to investigate massive regional contamination resulting from the improper disposal of thousands of gallons of hazardous waste solvent in a very geologically complex area of the state. This contamination has polluted or threatened multiple municipal and private drinking water resources. The investigation, which is nearing its final stage, is needed to identify responsible parties and needed interim measures to ensure that drinking water is safe. Funds have also been used to investigate several radiological contaminated sites. The program will continue to utilize federal brownfield resources to conduct activities at eligible sites which are inclusive of, but not limited to brownfields sites contaminated with hazardous and/or petroleum substances. lead-based-paint. asbestos. and controlled substances and mine-scarred lands.

3. PROGRAM LISTING (list programs included in this core funding)

Leaking Underground Storage Tanks
Drycleaner Environmental Cleanup
Hazardous Substance Cleanup

CORE DECISION ITEM

Department of Natural Resources	Budget Unit	79445C
Division of Environmental Quality		
Brownfields & Other Hazardous Site Cleanups		

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds) (1),(2)	2,021,274	2,021,274	2,385,274	1,641,274 E
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	2,021,274	2,021,274	2,385,274	N/A
Actual Expenditures (All Funds)	764,723	480,227	1,423,229	N/A
Unexpended (All Funds)	1,256,551	1,541,047	962,045	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	1,040,790	1,329,545	751,311	N/A
Other	215,761	211,502	210,734	N/A
	(3)	(3)	(3)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Appropriations and expenditures no longer include the Cleanup of Controlled Substances appropriations. In the FY06 budget, the Cleanup of Controlled Substances appropriations were reallocated to the Hazardous Substances and Emergency Response budget. To provide comparable data, the historical data is reflected accordingly. The remaining FY06 appropriations are: Leaking Underground Storage Tanks at \$420,000; Drycleaner Cleanups at \$200,000 "E"; and Hazardous Substances Cleanups at \$1,021,274 "E".

(2) Due to the need to use funds to perform timely cleanup of Superfund sites the department requests retention of the "E" appropriations on the Clean Up of Hazardous Waste Sites PSD appropriations. Lapse appropriation may occur due to the timing of these issues.

(3) Lapsed appropriations in FY 2003, FY 2004 and FY 2005 in Other Funds includes \$200,000 from the Dry-cleaning Environmental Response Trust Fund while the program was being setup and the fund balance began to build. The "E" is requested due to the uncertainty of the number of sites and estimated contracted costs for cleanup.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Leaking Underground Storage Tanks

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

1. What does this program do?

The federal government provides resources to states to address contamination from underground tank releases in situations where there is a threat to human health and the environment but no willing, viable responsible party can be found. The federal government also allows the state to use these funds to assist cities where abandoned underground tanks are an impediment to revitalization efforts.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Solid Waste Disposal Act of 1976, as amended, Section 9003(h)	Leaking Storage Tank Trust Fund Amendments of 1997
RSMo 319.100 through 319.139	Petroleum Storage Tanks

3. Are there federal matching requirements? If yes, please explain.

Leaking Underground Storage Tank (LUST)	10% State
---	-----------

4. Is this a federally mandated program? If yes, please explain.

Work performed under the Solid Waste Disposal Act is mandated by the U.S. government. If the state did not perform the activities required in the provisions of this Act, these activities would revert back to the federal Environmental Protection Agency.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Due to the development and anticipated release of the Risk Based Corrective Action document for petroleum storage tanks, work planned for FY04 was delayed or halted. Staff vacancies and re-training also contributed to the decrease in work and expenditures in FY04. In the FY06 budget request, a voluntary reduction of \$380,000 was taken in the Leaking Underground Storage Tanks PSD appropriation. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 planned is shown at current appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Leaking Underground Storage Tanks

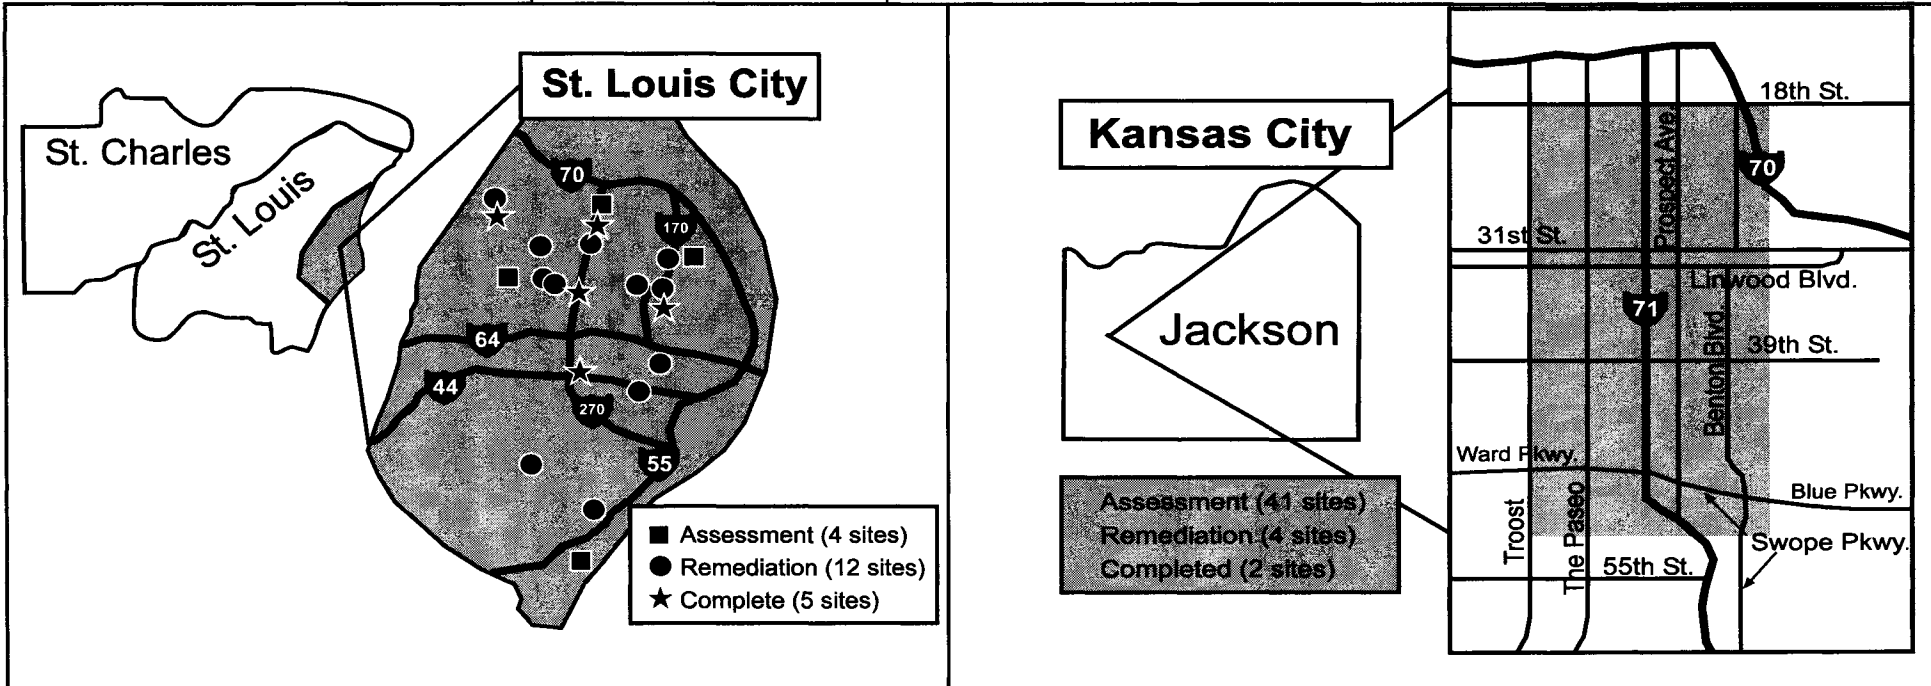

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

6. What are the sources of the "Other " funds?

Not applicable

7a. Provide an effectiveness measure.

Petroleum Brownfields Initiatives - To return petroleum brownfields sites to productive use.

The department partnered with the Cities of St. Louis and Kansas City to identify and address old tank sites that are impediments to productive reuse and revitalization in a pilot effort. These maps show the status of this ongoing effort. In FY05 for the Kansas City project, cleanup was completed at one site and significant cleanup and tank removal actions were performed at a second site. In FY05 for the St. Louis project, cleanup was completed at five sites. The sites that have been successfully cleaned up are now available for productive reuse. Additional data will be included and available over the life of this project.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Leaking Underground Storage Tanks

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

7b. Provide an efficiency measure.

LUST Site Cleanup Cost Comparison –FY05			
	Cost Per Cleanup	Number of Sites	Cost Savings
Traditional Cleanup	\$51,113	382	N/A
DNR-Lead Cleanup	\$24,234	10	\$268,790

The department uses these funds to investigate and respond to high priority releases at abandoned sites. During the previous two fiscal years, a portion of the federal LUST funds have been used by the department to assess petroleum brownfield sites in St. Louis and Kansas City. In partnership with municipal redevelopment officials, department contractors identified numerous former petroleum sites and assessed available remediation cleanup funding options for each site. Many of these blighted properties were too great a liability for private interests to take on, yet their presence was hindering other redevelopment in their respective areas. To address this need, in FY05, the department utilized LUST funds to engage contractors to perform state lead cleanups of these properties. In FY05, ten such properties have been cleaned up and returned to productive use. These small properties, once clean, can make the difference in corridor or neighborhood redevelopment efforts. In these cases, the socio-economic community benefits far transcend the cost of cleanup. Note: This is a new measure and previous projections and actuals are not available.

PROGRAM DESCRIPTION

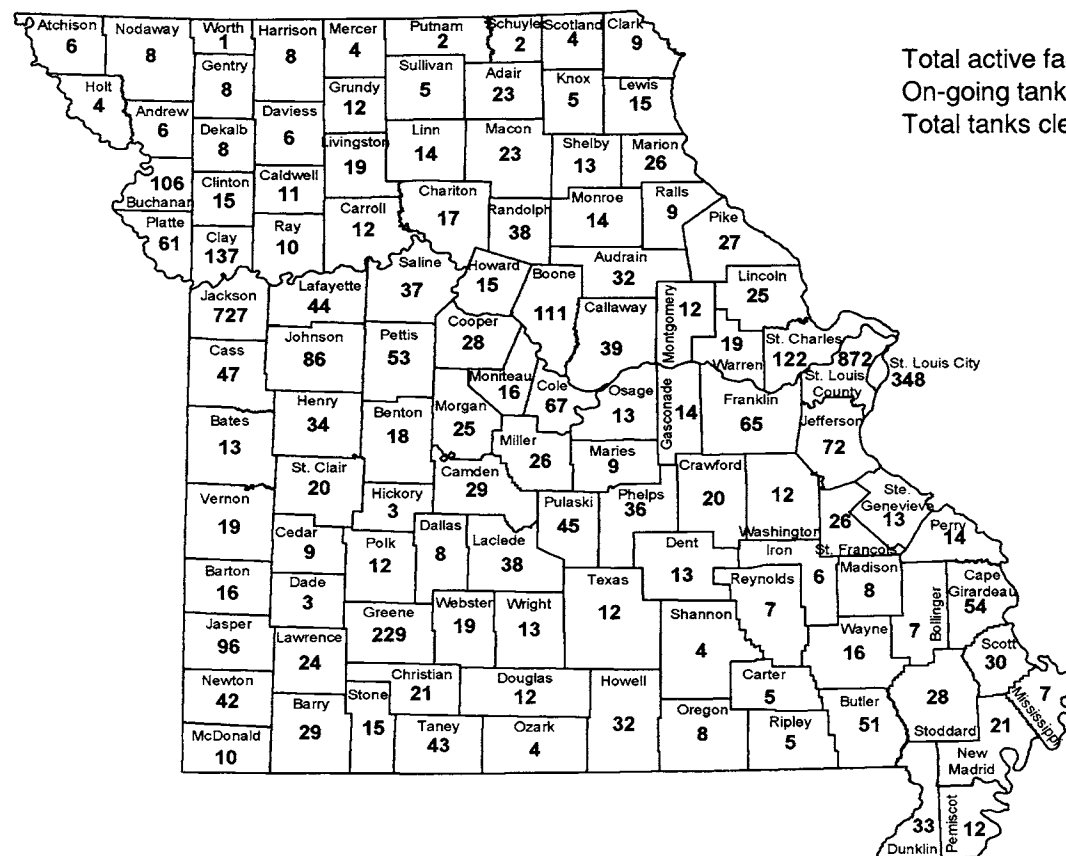

Department of Natural Resources

Division of Environmental Quality - Leaking Underground Storage Tanks

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

7c. Provide the number of clients/individuals served (if applicable)

This map represents the number of petroleum storage tank site cleanups by county through June 2005.

Total active facilities with underground storage tanks = 3,757

On-going tank cleanups = 1,589

Total tanks cleanups completed = 4,916

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Drycleaner Environmental Cleanups

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

1. What does this program do?

Senate Bill 577, passed in 2000, created the Dry-cleaning Environmental Response Trust (DERT) Fund to assist in the cleanup of contaminated drycleaner sites. The first four years of the program were dedicated to building the fund and the program. The Joint Committee on Administrative Rules disapproved the rulemaking on September 16, 2004. Senate Bill 170 and Senate Bill 225 (2005) reauthorized the DERT Fund with changes. The program is currently addressing three pilot sites and is set for full implementation in FY 2006, focusing on contaminated groundwater sites. The department will reimburse eligible parties for qualifying investigation and cleanup expenses over the \$25,000 deductible.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 260.900 through 260.965 Drycleaner Remediation

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: This appropriation was new in FY 2003. Lapsed appropriations in FY 2003, FY 2004, and FY 2005 occurred while the program was being setup. The FY 2006 Planned is shown at core appropriation level. The "E" is requested due to the uncertainty of the number of sites and estimated contracted costs for cleanup.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Drycleaner Environmental Cleanups

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

6. What are the sources of the "Other " funds?

Dry-cleaning Environmental Response Trust Fund (0898)

7a. Provide an effectiveness measure.

Number of drycleaner sites returned to productive use.

Note: Under the current legislation the department will only collect enough fees to provide cleanup for approximately 45 out of the 167 potentially contaminated drycleaner sites around the state. From FY 2002 through FY 2006, the drycleaner program has been in the program development stage. Three pilot projects are currently underway.

7b. Provide an efficiency measure.

Since the drycleaner program is in the start-up phase and the Hazardous Waste Program has not completed a cleanup thus far, data is not available for an efficiency measure. The general revenue appropriation to hire staff dedicated to work on DERT fund regulations was not allocated during the FY 2002 budget and delayed the implementation of the program. Once data becomes available, we will measure the number of sites we are able to cleanup in a fiscal year to a projected number of sites.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Drycleaner Environmental Cleanups

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

7c. Provide the number of clients/individuals served (if applicable)

Number of Registered Drycleaner Facilities in Missouri by County

The number of registered drycleaners in fiscal year 2005 was 334. Of the 334 facilities an estimated 167 are potentially contaminated. The number of facilities declined from fiscal year 2004 based on statutory revisions to the program in the 2005 legislative session.

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Hazardous Substance Cleanup

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

1. What does this program do?

Pollution and public health problems have resulted from the mismanagement of waste at abandoned or uncontrolled hazardous waste sites and federal facility sites in Missouri. The department, in coordination with EPA, may remediate these sites solely or by the responsible party with state oversight. The state also pursues clean ups independently of the federal government when EPA has not ranked a site as a priority. This PSD will be used to hire contractors to perform clean up work or to perform relevant environmental studies at these sites

For example, in the past three years, the majority of this appropriation has been used to investigate massive regional contamination resulting from the improper disposal of thousands of gallons of hazardous waste solvent in a very geologically complex area of the state. The department has contracted with a consulting company to complete the Remedial Investigation/Feasibility Study (RI/FS) for the Oak Grove Village Well site located in Franklin County. The site is listed on the Superfund National Priority List due to the presence of trichloroethylene (TCE) in the municipal wells of Oak Grove Village and Sullivan. The completed RI/FS will determine responsible parties, extent of contamination and provide alternatives for remediation of the drinking water. The RI/FS is scheduled to be completed by Fall 2005. Funds have also been used to investigate several radiological contaminated sites. The program will continue to utilize federal brownfield resources to conduct assessment and cleanup activities at eligible Brownfields sites which are inclusive of, but not limited to brownfields sites contaminated with hazardous and/or petroleum substances, lead-based-paint, asbestos, and controlled substances and mine-scarred lands.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Comprehensive Environmental Response, Compensation, and Liability Act
of 1980, Public Law 96-510, as amended

Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499

Atomic Energy Act of 1954, As amended, Section 21, Public Law 83-703

Energy Reorganization Act of 1974, Public Law 93-438

Department of Energy Organization Act of 1977. As amended; Public Law 95-604

Energy Policy Act of 1992, Title X and XI

Small Business Liability Relief and Brownfields Revitalization Act

RSMo 260.435 through 260.480

RSMo 260.565 through 260.609 and RSMo 447.700 through 447.708

Abandoned or Uncontrolled Sites (Registry)

Voluntary Remediation including Brownfields

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Hazardous Substance Cleanup

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

3. Are there federal matching requirements? If yes, please explain.

Superfund Consolidated Grant (portions)	10% State
EPA Brownfields 128(A) grant	100% Federal
Departments of Energy and Defense Grants	100% Federal

4. Is this a federally mandated program? If yes, please explain.

Work performed under the Comprehensive Environmental Response Compensation, and Liability Act (CERCLA), as well as cleanup oversight at Federal Facilities sites, is mandated by the U.S. government.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Appropriations and expenditures no longer include the Cleanup of Controlled Substances appropriations. In the FY06 budget request, the Cleanup of Controlled Substances appropriations have been core reallocated to the Hazardous Substances and Emergency Response budget. To provide comparable data, the historical data is reflected accordingly.

Due to the need to use funds to perform timely cleanup of Superfund sites the department requests retention of the "E" appropriations on the Clean Up of Hazardous Waste Sites PSD appropriations. FY06 Planned is shown at core appropriation level.

6. What are the sources of the "Other" funds?

Hazardous Waste Remedial Fund (0690); Note: SB 225 (2005) combines the Hazardous Waste Remedial Fund (0690) into the Hazardous Waste Fund (0676). Other fund sources for FY06 will be the Hazardous Waste Fund (0676).

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Hazardous Substance Cleanup

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

7a. Provide an effectiveness measure.

Notes: FY 2000 through FY 2005 are actual data; FY 2006 through FY 2008 are projections. Prior year projections are not available.

Cleanup Oversight costs include PSD contractual charges for remedial investigation work at Oak Grove Village, radiological sampling analysis for Federal Facilities sites, Brownfield Targeted Assessments, remediation of residential yards involved in the Jasper County site and Missouri Department of Health review of project documents with health implications.

Infrastructure and Research costs include PSD contractual charges for data management and development of Risk Based Corrective Action guidelines.

FY 2005 costs include a \$174,947 payment made to the Environmental Protection Agency in December 2004 for the state's share of costs associated with the clean up at Kem Pest. Remedial work at the Kem Pest site has been completed and this Superfund site has been closed.

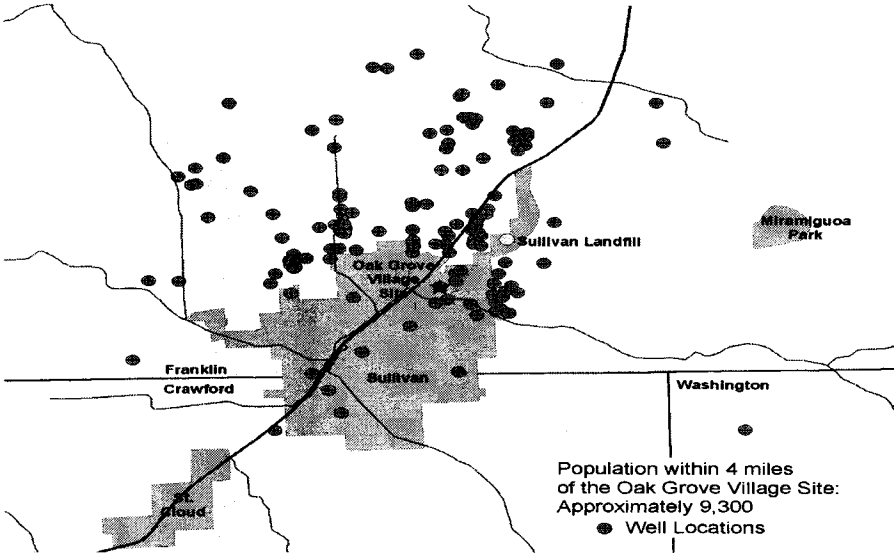

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Hazardous Substance Cleanup

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

The Oak Grove Village site has been the major focus of this budget area in the last two years. Contamination had affected drinking water wells.

Note: This site is being used as an example of the effectiveness of DNR Hazardous Site Cleanup funding. This appropriation is generally used on a few large sites at a time. Cleanup of these sites may take several years. The Oak Grove site has been the most active site under this appropriation in the last few years. Extensive area-wide contamination has impacted public and private drinking water supplies in and around Oak Grove Village in Franklin County. The department is using this appropriation to identify both the source and extent of contamination. This information will help the department identify those parties responsible, as well as engineer and construct a solution for the problem.

7b. Provide an efficiency measure.

Jasper County Superfund Site Residential Yard Cleanup Costs as of the End of FY04

	<u>Cost Per Clean up</u>	<u>Number of Sites</u>	<u>Cost Savings</u>
USEPA Traditional	\$ 10,000	2,600	N/A
MDNR Phosphate Cleanup Method	\$ 3,000	500	\$3,500,000

Note: In a pilot project with EPA at Jasper County Superfund Site Residential Yard Clean Up, DNR tested a cost-efficient means of cleanup. Lead mining in Jasper County has resulted in vast areas covered with toxic lead contamination. The Environmental Protection Agency remediated 2,600 properties with soil contamination over 800 parts per million (ppm) lead by removing contaminated soil and replacing it with clean soil. Recently department staff, along with the University of Missouri Columbia, studied whether phosphate treatment would be an effective remedy that would also reduce costs.

The result: phosphate treatment is a viable remedy for property with low levels of contamination (under 1000 parts per million lead). Thanks to these research efforts, the department is proposing to use this application to address the remaining 500 properties at 30% - 50% of the cost of traditional methods. Should the General Revenue new decision item be approved, those funds would allow the department to use this method to address the remaining 500 properties.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Hazardous Substance Cleanup

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

Note: A Phase I is an environmental site assessment to evaluate existing environmental problems from past operations and potential environmental problems from current or proposed operations at a site. In some cases, there is a large area that requires a Phase I assessment. In these cases conducting an area-wide study is more cost effective than individual Phase I's.

The federal Brownfields Petroleum Assessment Grant funded the Troost Avenue Feasibility Study. This study included a Phase I site assessment for 204 petroleum sites, named the Troost Corridor, and extends along Troost Avenue from 27th to 71st Street including a two-block area to the east and west of Troost Avenue in Kansas City, Missouri (Jackson County). The study proved useful in evaluating the financial and technical feasibility of the site cleanup and redevelopment process. Environmental investigations such as soil and groundwater investigations and sampling will continue on the sites through 2006 with efforts to cleanup contamination discovered as a result of the study. The costs associated with the cleanup process continues to be funded through the Leaking Underground Storage Tank Grant.

This was a new measure in FY05, therefore projections for some prior years are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Hazardous Substance Cleanup

Program is found in the following core budget(s): Brownfields & Other Hazardous Site Cleanups

7c. Provide the number of clients/individuals served (if applicable)

Each dot represents one site in Missouri, each site impacts many Missourians. A recent example would be clients the served by remediation at the Oak Grove Village site which impacted 2,644 households totaling 6,972 individuals in the Oak Grove Village and Sullivan areas.

7d. Provide a customer satisfaction measure, if available.

Not available

2. CORE DESCRIPTION									
The Solid Waste Management Program operates a federally authorized regulatory program (federal Subtitle D regulations) and coordinates a statewide network of partners who help to ensure that solid waste generated by Missouri citizens, businesses and institutions is managed effectively, economically and in a manner that protects the environment. Subtitle D is a federal regulation governing the design and construction of municipal solid waste landfills including requirements for groundwater monitoring, landfill gas management, landfill leachate collection, site selection restrictions and financial assurance for closure and post closure. The program permits solid waste facilities (e.g., landfills and transfer stations) to help ensure that they are designed and operated to protect public health and safety, and the environment. The program inspects permitted facilities and enforces solid waste laws and rules that assure that the solid waste industry meets requirements. The program provides grants to solid waste management districts for their operation and for the funding of local waste reduction and recycling projects. The program investigates and pursues the cleanup of illegal dumps. The program provides workshops and training for districts; provides landfill operator certification; develops, maintains and updates a statewide solid waste plan, including data on wastes, information on innovative technologies; and provides technical assistance. The Scrap Tire Unit has been reestablished and will again oversee scrap tire dump cleanup activities as well playground grants in FY06. The Scrap Tire Unit also conducts scrap tire dump investigations and reviews tire hauler, processor and site permits.

Solid Waste Management Program									

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Solid Waste Management Program Core

Budget Unit 78875C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds)	2,746,549	2,021,176	2,135,696	2,007,153
Less Reverted (All Funds)	(902,200)	0	0	N/A
Budget Authority (All Funds)	1,844,349	2,021,176	2,135,696	N/A
Actual Expenditures (All Funds)	1,759,629	1,761,234	1,741,409	N/A
Unexpended (All Funds)	84,720	259,942	394,287	N/A
Unexpended, by Fund:				
General Revenue	2	0	0	N/A
Federal	13,606	7,863	3,757	N/A
Other	71,112	252,079	390,530	N/A
	(1)	(2)	(2)	(2)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) The FY03 appropriation level is elevated because the Solid Waste Management Fund appropriations were increased through flexible authority to allow for significant General Revenue withholdings due to shortfalls statewide. There were no appropriations from General Revenue in FY04, FY05 or FY06. The appropriations were made from the Solid Waste Management Fund, Federal Funds and the Scrap Tire Subaccount instead.

(2) Appropriations include Solid Waste Management Fund - Scrap Tire Subaccount (Fund 0569). The primary fee for the scrap tire fund was reauthorized through passage of SB 225 in the 2005 legislative session. The collection of the fee will begin on October 1, 2005.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

1. What does this program do?

The Solid Waste Management Program operates a federally authorized regulatory program (federal Subtitle D regulations) and coordinates a statewide network of partners who help to ensure that solid waste generated by Missouri citizens, businesses and institutions is managed effectively, economically and in a manner that protects the environment. Subtitle D is a federal regulation governing the design and construction of municipal solid waste landfills including requirements for groundwater monitoring, landfill gas management, landfill leachate collection, site selection restrictions and financial assurance for closure and post closure. The program permits solid waste facilities (e.g., landfills and transfer stations) to help ensure that they are designed and operated to protect public health and safety, and the environment. The program inspects permitted facilities and enforces solid waste laws and rules that assure that the solid waste industry meets requirements. The program provides grants to solid waste management districts for their operation and for the funding of local waste reduction and recycling projects. The program investigates and pursues the cleanup of illegal dumps. The program provides workshops and training for districts; provides landfill operator certification; develops, maintains and updates a statewide solid waste plan, including data on wastes, information on innovative technologies; and provides technical assistance. The Scrap Tire Unit has been reestablished and will again oversee scrap tire dump cleanup activities as well playground grants in FY06. The Scrap Tire Unit also conducts scrap tire dump investigations and reviews tire hauler, processor and site permits.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number if applicable.)

RSMo 260.200 through 260.345 and RSMo 260.270 through 260.281 Solid Waste Management and Waste Tires
 Subtitle D of Resource Recovery and Conservation Act
 Solid Waste Disposal Act

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

Federal requirements for the management of solid waste are met through the work of the program. Missouri currently has EPA approval to implement Subtitle D landfill regulations under the federal Resource Conservation and Recovery Act and Solid Waste Disposal Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. (Notes continued on following page.)

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

FY2006 Planned is shown at full appropriation level and includes Solid Waste Management Fund - Scrap Tire Subaccount (Fund 0569). The Scrap Tire Unit has been reestablished and will again oversee scrap tire dump cleanup activities, permit reviews and playground grants in FY06.

6. What are the sources of the "Other " funds?

Solid Waste Management Fund (0570); Solid Waste Management Fund - Scrap Tire Subaccount (0569)

7a. Provide an effectiveness measure.

Permit activities by Solid Waste Management Program

Annual Number of SWMP Landfill Permit Activities

Notes: This graphic includes all activities on landfill permits including construction and operating permits, closures, remediation and enforcement, violation disclosure statements, financial assurance reviews, permit modifications, groundwater monitoring reports and exemptions. This was a new measure in FY 2005, therefore some prior year projections are not available.

Solid waste managed in Missouri

Annual Disposal and Annual Diversion VS. Estimated Generated Waste

Note: The total waste generated in Missouri is estimated. The waste disposed includes waste generated by Missourians but shipped out-of-state for disposal. This was a new measure in FY 2005, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure.

The number of Missouri communities with recycling services has increased from 51 in 1989 to 415 in 2003.

Recycling Collection Services in Missouri Communities

Note: Actual data is based on biennial inventories of solid waste services submitted to the department by Missouri's twenty solid waste management districts. Inventories are conducted for even numbered years and submitted in odd numbered years. 2003 data on recycling services will not be available until the end of calendar year 2005.

7b. Provide an efficiency measure.

DNR Staff Cost Per Waste Tire Cleaned Up

Notes: Larger sites are less costly per tire cleaned up than smaller sites. Due to the sunset of the tire fee on January 1, 2004, only \$2,773 of operating costs were charged to the fund for FY05 resulting in the low staff cost reflected in the above chart. With the passage of SB 225 during the 2005 legislative session, the Scrap Tire Unit will be reestablished and will again oversee scrap tire dump cleanup activities, permit reviews and playground grants during FY06. The projections for FY07 are higher than FY06 because scrap tire staff will be paid for the entire fiscal year as opposed to a partial year during FY06. The projections for FY08 are based on estimates of newly located (although not investigated) tire dumps, unknown tire dumps and the historical underestimation of the number of tires at known sites. We estimate approximately one million scrap tires will be discovered, of which, 720,000 are estimated to be cleaned up in FY08.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

Scrap Tire Dumps and Tires Cleaned Up

Fiscal Year	2003	2004	2005		2006	2007	2008
	Actual	Actual	Projected	Actual	Projected	Projected	Projected
Dumps	76	100	50	75	76	80	75
Tires	1,670,133	891,860	500,000	622,422	730,000	719,877	720,000

Note: The remaining number of tires is an estimate of scrap tires at known and unknown sites. Newly reported waste tire dumps have not been investigated since January 2004 due to the expiration of the Scrap Tire Fee. As a result, we expect additional sites to be discovered as we resume our field investigations. The projection shows that all known tire dumps will be cleaned up at the end of FY07 but this assumes our estimated number of tires is correct, we have access to the site (which may require litigation), and we are successful getting clean up contractors. The projections for FY08 are based on estimates of newly located (although not investigated) tire dumps and unknown tire dumps.

7c. Provide the number of clients/individuals service, if applicable.

Completed Waste Tire Clean-Up Sites by County

453 Scrap Tire Dump cleanups have been completed since the beginning of the program in 1990. 12,899,286 tires have been cleaned at scrap tire dumps as of August 19, 2005.

7d. Provide a customer satisfaction measure, if available.

The program recently completed drafting the Missouri Solid Waste Management Plan, which considered information from a public opinion survey and input from over 150 stakeholders. In a public opinion survey conducted in 2000, 82% said that they were satisfied with the department's management of solid waste activities.

Note: Estimated appropriations are requested for Other Funds.

2. CORE DESCRIPTION

During 2004, Missourians generated approximately 12 million tons of waste. Nearly 47% of this waste was diverted and put to good use instead of being buried in landfills. Since 1990, this percentage of diversion has risen from 10% to 47% because of an increase in recycling and yard waste services and more markets for the materials. More Missourians now have recycling and composting services in their communities, providing the public a convenient and affordable alternative to disposal. These services were funded in part through grants from the Solid Waste Management Fund.

Through grants the department encourages waste reduction, reuse, recycling, energy recovery and efficient processing of Missouri's solid wastes. Grants include funds for the state's twenty solid waste management districts for projects in their areas. Funds also support the financial and technical assistance of the Environmental Improvement and Energy Resources Authority to promote the development of markets for recovered materials.

This core also supports the removal of illegally dumped scrap tires. The passage of SB 225 during the 2005 legislative session reauthorized the Scrap Tire Fee. The Scrap Tire Unit has been reestablished and will again oversee scrap tire dump cleanups, playground cover grants, inspections, hauler, processor and site permits.

Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	0	0	0	N/A	
Other	7,781,588	5,118,117	6,848,362	N/A	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

Expenditures prior to FY05 for the Solid Waste Management PSD programs have been made through operating reappropriations as well as core appropriations due to the multi-year nature of the projects. For FY03, there were reappropriation expenditures of \$9,798,662 in addition to the core spending shown above. For FY04, there were reappropriation expenditures of \$7,862,940 in addition to the core spending shown above. The Solid Waste Management Fund (0570) core appropriation amount for FY06 is \$6,300,000 "E" for solid waste law activities. The SWMF-Scrap Tire Subaccount (0569) core appropriation for FY06 is \$1,636,999 "E" for waste tire activities. As of July 1, 2005 the Solid Waste Management Fund (0570) obligations are estimated to be approximately \$13.2 million. The estimated appropriations will be used to encumber and pay obligations against the funds. Project payments may span multiple fiscal years.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program PSDs

Program is found in the following core budget(s): Solid Waste Management PSDs

1. What does this program do?

During 2004, Missourians generated approximately 12 million tons of waste. Nearly 47% of this waste was diverted and put to good use instead of being buried in landfills. Since 1990, this percentage of diversion has risen from 10% to 47% because of an increase in recycling and yard waste services and more markets for the materials. More Missourians now have recycling and composting services in their communities, providing the public a convenient and affordable alternative to disposal. These services were funded in part through grants from the Solid Waste Management Fund. Through grants the department encourages waste reduction, reuse, recycling, energy recovery and efficient processing of Missouri's solid wastes. Grants include funds for the state's twenty solid waste management districts for projects in their areas. Funds also support the financial and technical assistance of the Environmental Improvement and Energy Resources Authority to promote the development of markets for recovered materials. This core also supports the removal of illegally dumped scrap tires. The passage of SB 225 during the 2005 legislative session reauthorized the Scrap Tire Fee. The Scrap Tire Unit has been reestablished and will again oversee scrap tire dump cleanups, playground cover grants, inspections, hauler, processor and site permits.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMO 260.200 through 260.345 Solid Waste Management, Batteries, Waste Tires, Plastic Containers, Cellulose Casings, SWM Districts

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Past expenditures for the Solid Waste Management PSD programs have been made through operating reappropriations as well as core appropriations due to the multi-year nature of the projects. For FY03, there were reappropriation expenditures of \$9,798,662 in addition to the core spending shown above. For FY04, there were reappropriation expenditures of \$7,862,940 in addition to the core spending shown above. The estimated appropriations will be used to encumber and pay obligations against the funds. The Solid Waste Management Fund (0570) core appropriation amount for FY06 is \$6,300,000 "E" for solid waste law activities. As of July 1, 2005 the Solid Waste Management Fund (0570) obligations are estimated to be approximately \$13.2 million. The SWMF-Scrap Tire Subaccount (0569) core appropriation for FY06 is \$1,636,999 "E" for waste tire activities. Project payments may span multiple fiscal years.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program PSDs

Program is found in the following core budget(s): Solid Waste Management PSDs

6. What are the sources of the "Other" funds?

Solid Waste Management Fund (0570); Solid Waste Management Fund - Scrap Tire Subaccount (0569)

7a. Provide an effectiveness measure.

Solid waste managed in Missouri

Note: The total waste generated in Missouri is estimated. The waste disposed includes waste generated by Missourians but shipped out-of-state for disposal. Historical projections of these exact criteria were not available therefore the projections are beginning with FY04. This was a new measure in FY05, therefore some prior year projections are not available.

Note: The remaining number of tires is an estimate of scrap tires at known and unknown sites. There is a significant chance that the largest scrap tire dump will contain as many as two million scrap tires although we estimate one million at this site. Historically, the number of tires at large sites have been underestimated due to difficulties of estimating compressed scrap tires. Also, newly reported waste tire dumps have not been investigated since January 2004 due to the expiration of the Scrap Tire Fee. As a result, we expect additional sites to be discovered as we resume our field investigations. The projection shows that all known tire dumps will be cleaned up at the end of FY07 but this assumes our estimated number of tires is correct, we have access to the site (which may require litigation), and are successful getting a contractor hired to clean up the largest dump. The projections for FY 2008 are based on estimates of newly located (although not investigated) tire dumps and unknown tire dumps.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program PSDs

Program is found in the following core budget(s): Solid Waste Management PSDs

7b. Provide an efficiency measure.

Cost per ton of solid waste diverted from landfills through grant programs

Cost Per Ton for Waste Diverted From Landfills Through Grant Programs

Notes: FY 2004 actuals are not available because some projects are still active and others have not submitted their final reports with the tonnage diversion numbers. FY 2004 - 2008 are projections. The FY 2004 numbers will not be available until all multi-year grants from this period have been completed and data has been analyzed.

Percentage of solid waste generated by Missourians that is reused, recycled and composted

Percentage of Waste Generated by Missourians Recycled or Reused (Diverted)

Note: In 1990, the passage of SB 530, Section 260.225.2(1), set a department goal to achieve a reduction of 40% in solid waste disposed by weight by January 1, 1998. This goal has been surpassed. The actual FY 2004 rate was 47%. This was a new measure in FY05, therefore some prior year projections are not available.

General Revenue	445	888	2,245	N/A	
Federal	0	0	0	N/A	
Other	136,961	141,219	138,513	N/A	
	(2)	(2)	(2)		

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) The retention of the estimated (E) appropriation from General Revenue is requested for current and future forfeitures. Each facility closure will include expenditures that may be ongoing for over a 30-year period and involve forfeited financial assurance instruments (FAI) including interest accruals to the original forfeited amount. The retention of the estimated (E) appropriation from the Post-Closure Fund is requested to allow for expenditures of the total forfeited amount and any interest accruals. Expenditures from this fund could be ongoing over a minimum of a 30-year period for each forfeited FAI.
- (2) Lapse for the Post-Closure Fund is due to the multi-year nature and timing of the forfeiture expenditures. During post-closure maintenance, extraordinary expenses can occur at any time and require immediate attention. However, if those expenses do not occur, the appropriation balance may lapse.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Financial Assurance Instruments (FAI) Forfeitures

Program is found in the following core budget(s): Solid Waste Forfeitures

1. What does this program do?

Effective financial assurance mechanisms are necessary to ensure that closure and/or post-closure activities for solid waste facilities will be conducted when needed to protect Missourian's health and the environment. A financial assurance instrument (FAI) provides funds when a solid waste or waste tire facility owner fails to properly implement either closure or post-closure within a reasonable time. The forfeiture shall be all or that part of the operator's collateral necessary to implement the closure and post-closure plans. Forfeited securities shall be placed into the General Revenue fund to be appropriated to and expended by the department to implement the closure and/or post-closure care activities to prevent a public nuisance and to protect public health.

In addition, a Consent Judgment and Order of the Circuit Court of Warren County decreed the funds from the forfeited financial assurance instruments from specific solid waste facilities be placed in an interest-bearing account to be established and called the "Post-Closure Fund". Only the expenses relating to closure and post-closure activities at these specific landfills are to be paid from the Post-Closure Fund. Upon conclusion of the post-closure period, any funds remaining in the Post Closure Fund for these facilities are to be paid to the "Treasurer of Warren County as Custodian of the Warren County School Fund."

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 260 Landfill Closure/Post-Closure

RSMo 260.275 Waste Tire Site Closure Plan

40 CFR Part 258.70 -.74

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

Although not federally mandated, 40 CFR Parts 257 and 258, "Criteria for Solid Waste Landfills", strongly encourage each state to adopt RCRA Subtitle D. Missouri currently has EPA approval to implement Subtitle D landfill regulations, thereby having the authority to approve new landfills and expansion of existing landfills.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Financial Assurance Instruments (FAI) Forfeitures

Program is found in the following core budget(s): Solid Waste Forfeitures

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 Planned is shown at core appropriation level.

6. What are the sources of the "Other " funds?

Post-Closure Fund (0198)

7a. Provide an effectiveness measure.

93% of solid waste facilities with FAI's are in compliance with regulations.

Number of facilities that have forfeited Financial Assurance Instruments		
	(Cumulative) Projected	Actual
FY 2003	9	9
FY 2004	9	9
FY 2005	9	11
FY 2006	9	N/A
FY 2007	11	N/A
FY 2008	11	N/A

Notes: Number of facilities includes waste tire processing facilities, sanitary and demolition landfills and scrap tire facilities. Solid waste transfer stations are not required to have FAI's. The post-closure period of landfills are a minimum of 30 years for most landfills.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Financial Assurance Instruments (FAI) Forfeitures

Program is found in the following core budget(s): Solid Waste Forfeitures

7b. Provide an efficiency measure.

Of the six sanitary and three demolition landfills and two scrap tire facilities, none have obtained official closure status by the department and therefore have not entered their post-closure period.

7c. Provide the number of clients/individuals served, if applicable.

Counties with facilities that have forfeited their financial assurance instruments (FAIs)

County	Number of facilities
Warren	3
Adair	2
Grundy	1*
Carroll	1
Camden	1
Maries	1
Newton	1
Callaway	1

* occurred due to the sale of real estate

7d. Provide a customer satisfaction measure, if available.

Other Funds: Metallic Minerals Waste Management (0575); Coal Mine Land Reclamation (0684); Mined Land Reclamation (0906)

2. CORE DESCRIPTION

The Land Reclamation Commission regulates the surface mining of coal and industrial minerals, the reclamation of coal mine lands on which bonds were forfeited, and administers the reclamation of coal mine lands which were abandoned prior to 1977.

For coal and industrial minerals (barite, tar sands, clay, limestone, sand and gravel, granite, trap rock, etc.) the program ensures that all exploration and surface mining operations are conducted in a manner that will not be detrimental to public health or safety, or cause environmental pollution. To obtain a permit from the Land Reclamation Commission, mine operators must submit operation and reclamation plans that demonstrate that the land will be returned to productive use. Operators must also submit a reclamation bond. This bond provides a financial guarantee that lands will be reclaimed after mineral extraction. Inspections revealing violations result in various efforts depending on the degree of danger to public health and safety or the environment. These efforts generally begin with informal efforts and may lead to formal enforcement, permit revocation or eventual bond forfeiture.

The program implements the Metallic Minerals Waste Management Act (lead, iron, zinc, copper, gold and silver).

General Revenue funds that were a required match for the coal program were part of budget reductions in FY 2004 and 2005. In FY 2006, Mined Land Reclamation (0906) funds will be used to match the federal grant. These funds are estimated to last through FY 2008.

The reclamation activities related to abandoned mines and bond forfeitures are further described in the PSD Core Decision item.

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Land Reclamation Program Core

Budget Unit 78880C

3. PROGRAM LISTING (list programs included in this core funding)

Land Reclamation Program

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds) (1)	1,616,687	1,354,956	1,311,913	1,274,692
Less Reverted (All Funds)	(11,136)	(3,278)	0	N/A

Actual Expenditures (All Funds)	1,265,413	976,853	936,060	N/A
Unexpended (All Funds)	340,138	374,825	375,853	N/A
Unexpended, by Fund:				
General Revenue	53	940	0	N/A
Federal	100,985	106,212	135,825	N/A
Other	239,100	267,673	240,028	N/A
	(2)	(2)	(2)	

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) General Revenue reductions for the coal program were taken in FY03 and FY04. No General Revenue remains in the Land Reclamation Program budget.
 (2) Lapses primarily relate to vacancies and reduction of other expenditures to mitigate future funding concerns in this program.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

1. What does this program do?

The coal and industrial mineral programs perform permitting and inspection for all surface mining operations. (This includes 873 sites, 27,177 acres for Industrial Minerals and 38 inspectible units, 7,833 acres for Coal). Quarries and coal mines create concern related to blasting and truck traffic, noise, hours of operation, and water runoff. Gravel mines create concern due to the impacts to Missouri streams and farmlands. Many of these concerns can be addressed through public meetings allowing an exchange of information, public hearings, or permit conditions.

The metallic minerals program regulates lead mining waste management sites (11 sites, 4,558 acres). Missouri has the largest lead mining district in the United States, but the key issue for our state is to ensure that these areas are properly reclaimed.

Coal bond forfeiture and Abandoned Mine Land (AML) staff supervise engineering and technical contracts for the design and reclamation of abandoned and bond forfeiture sites, conduct field investigations, and supervise construction according to those plans and specifications. Through FY05, 121 AML reclamation projects, involving 4,184 acres, have been funded through AML grants. These efforts are further described in the Land Reclamation Program PSD Program Description forms.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 444.350 through 444.380	Metallic Minerals
RSMo 444.760 through 444.790	Industrial Minerals
RSMo 444.800 through 444.970 and 30 CFR Part 700.01 through 955.17	Coal, Bond Forfeiture and Abandoned Mine Lands

3. Are there federal matching requirements? If yes, please explain.

Coal Administration and Enforcement Grant	50% match
---	-----------

4. Is this a federally mandated program? If yes, please explain.

Coal is a federal program with a 50% match but not a mandatory program. Abandoned Mine Lands is a 100% federal funded program reserved for those states that operate a Coal regulatory program. Bond forfeiture is required to reclaim coal mined lands where coal mining permits were revoked and the operator did not complete reclamation. The state has federal delegation to operate the bond forfeiture program.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

6. What are the sources of the "Other " funds?

Metallic Minerals Waste Management (0575); Coal Mine Land Reclamation (0684); Mined Land Reclamation (0906)

7a. Provide an effectiveness measure.

Acres of mined land reclaimed (cumulative for all commodities and past/present mining)

Note: Most of the mined acres (about 136,900) were affected prior to regulation and could be reclaimed through the federal Abandoned Mine Lands program. However, the federal funds available will be limited to a fixed dollar amount (approximately \$1.5 million annually); so mined areas will be prioritized using the Office of Surface Mining priority ranking (considers health, public safety and environmental impacts of a site).

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

Acres of mined land reclaimed since the passage of mining laws (industrial minerals and coal began in 1972; metallic minerals in 1991)

Notes: Metallic minerals permits are issued for the life of the operation, since most of these sites are still operating, reclamation has not started. About 50% of all industrial minerals and coal acres have already been reclaimed. This chart was included to show only the acres impacted since the passage of mining laws and to reflect the reclamation by type of mining activity. This is a cumulative measure so no historical data or trend analysis is included.

Inspections and enforcement at quarries and gravel mines (Inspections lead to better compliance with reduced enforcement)

Note: This was a new measure in FY05, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7b. Provide an efficiency measure.

Days to issue quarry permits. The program issues about 316 permits annually covering over 800 mining sites.

Notes: The statute, 444.772 to 444.773, RSMo, requires a minimum 60 day public comment period for new permits and expansions. If public meetings and hearings are held, substantially more than 60 days are needed to satisfy the law and the rights of those requesting the meetings. Therefore new permits and expansions will always be a lengthy process under this law, and this time frame is beyond the control of the agency. Permit renewals are issued when the operator has filed a complete application. FY05 actuals are unusually low due to a low number of hearing requests on permits.

This was a new measure in FY05, therefore some prior year projections are not available.

7c. Provide the number of clients/individuals served (if applicable)

Industrial Minerals (Quarries and Gravel Mines)	
816 Sites @ an estimated 45 people per site	36,720
363 Permits @ 1 company per permit	363
Total Clients Served	37,083

Metallic Minerals (Lead Mines)	
The residents of four counties in Southeast Missouri: Iron, Jefferson, Reynolds and Washington.	
Missourians in those four counties	244,506
Companies that hold permits	3
Total Clients Served	244,509

Notes: The Industrial Minerals chart reflects estimates of the public protected from the effects of rock mining. When we have public meetings we have from 10 to 80 people present. We conduct about a half dozen meetings per year. There are quarries in every county of the state, some are rural and some are urban in population.

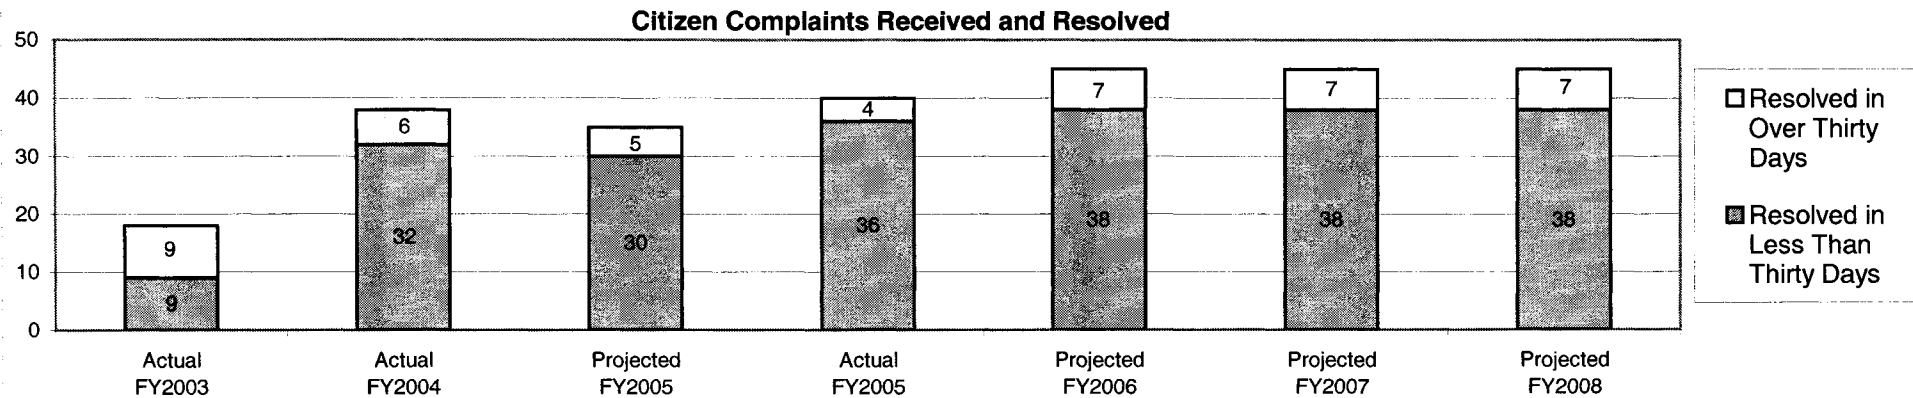

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7d. Provide a customer satisfaction measure, if available.

Note: Historically this measure included complaints for industrial and metallic minerals and those related to the coal program. The Land Reclamation Program did not regulate the coal program in FY04 and FY05, therefore, complaints relating to coal were not reported during these years. With the reinstatement of the coal program, projected FY06 and subsequent year projections have been revised to include complaints regarding coal.

Other Funds: Coal Mine Land Reclamation (0684); Mined Land Reclamation (0906)									
2. CORE DESCRIPTION									
The Land Reclamation Commission works to oversee the reclamation of abandoned mine sites in Missouri.									
Where bonds have been forfeited on permit-revoked mine sites, the Mined Land Reclamation Fund (MLRF) and Coal Mined Land Reclamation Fund (CMLRF) PSD's provide the appropriation authority for reclamation of these bond forfeited sites. The program may collect the reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond holder to perform the reclamation in the place of the original permit holder.									
For coal sites mined prior to 1977, the program had access to federal funds to directly contract for the reclamation activities at these sites. Funding for this activity is currently based on funds obtained prior to the loss of the coal regulatory program. Currently the Office of Surface Mining, US Department of Interior implements the coal regulatory program. Missouri is in the process of re-establishing the program; state implementation should be complete January 2006.									
The regulation of metallic minerals relates only to regulation of the metallic mineral waste disposal areas of the mining operations. The program confers with all other environmental programs to ensure that all appropriate environmental laws are met in the construction and reclamation of these waste disposal areas.									
3. PROGRAM LISTING (list programs included in this core funding)									
Abandoned Mine Land Reclamation Land Reclamation Bond Forfeitures									

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Land Reclamation Program PSDs Core

Budget Unit 79465C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds) (1),(3)	5,950,000	4,950,000	4,050,000	4,050,000
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority	5,950,000	4,950,000	4,050,000	N/A
Actual Expenditures (All Funds)	816,445	1,470,732	1,284,744	N/A
Unexpended (All Funds)	5,133,555	3,479,268	2,765,256	N/A
Unexpenditure, by Fund:				
General Revenue	0	0	0	N/A
Federal	2,919,834	1,461,317	678,445	N/A
Other	2,213,721	2,017,951	2,086,811	N/A
	(2)	(2)	(2)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) Due to a reduction of federal funds, in FY 2004 and FY 2005 appropriations were reduced to reflect funding available for the PSD efforts. Due to the General Revenue reductions of FY 2004 and FY 2005, and the loss of federal grant funds, appropriations were reduced again. No General Revenue remains in this program budget.
- (2) Abandoned Mine Land grants are three year grants. Appropriations were set to allow the department to encumber all contracts in place at any one time even though the expenditures could occur over a three year period.
- (3) FY 2006 budget consists of: \$2,250,000 for Land Reclamation Bond Forfeitures; \$1,750,000 for Abandoned Mine Land Reclamation; and \$50,000 for Small Operator Assistance Program.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Abandoned Mine Land Reclamation

Program is found in the following core budget(s): Land Reclamation PSDs

1. What does this program do?

The Abandoned Mine Lands (AML) program has reclaimed 4,184 acres of AML lands, including closing 216 dangerous mine shafts, removing 76 acres of trash dumps, extinguishing 26 acres of mine fires, eliminating 73,702 feet of dangerous high wall, improving 10.8 miles of streams, and stabilizing 5.9 acres of subsiding ground beneath homes and roads.

The program has also conducted 15 emergency investigations and abatement projects since 1998.

There are still 80 AML eligible mine sites consisting of 8,350 acres containing public health and safety problems that must be addressed. The estimated cost for reclamation at sites with public health and safety problems is \$41 million.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 444.800 through 444.970 and Coal, Bond Forfeiture and Abandoned Mine Lands
30 CFR Part 700.01 through 955.17

3. Are there federal matching requirements? If yes, please explain.

AML has no match, it is 100% federal dollars. However, the state must implement a coal regulatory program to qualify for AML dollars. There is currently no general revenue in the Land Reclamation Program budget to maintain a coal regulatory program, however, existing eligible state matching funds are being used through FY08.

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2006 shown at full appropriation for the Abandoned Mine Land Reclamation program.

6. What are the sources of the "Other" funds?

Not applicable

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Abandoned Mine Land Reclamation

Program is found in the following core budget(s): Land Reclamation PSDs

7a. Provide an effectiveness measure.

Abandoned Mine Land Inventory of Issues Reclaimed versus Total Sites in Missouri

Notes: Information is from the US Department of Interior Office of Surface Mining Reclamation and Enforcement (OSM) Abandoned Mine Land Inventory System at September 23, 2005. This information is updated and sites are reclassified; per the OSM historical data is not maintained. See 7b for projections in total. The listing shows the type of abandoned mine problems in Missouri and the total areas reclaimed based on federal priority 1, 2 and 3 sites (ranked based on risk to human health or environment; level 1 is most serious). The units of measurement within the graphs change based on the category of site, some are measured by site, others by feet or acres effected. Those measured in acres are in the second chart. Note that the bulk of remaining work is in subsidence acres, most of which are in the St. Louis area. The other large areas of remaining effort are high walls and abandoned mine shafts. The estimated cost to complete priority 1 sites is \$41 million while the estimate to complete all reclamation sites exceeds \$120 million.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Abandoned Mine Land Reclamation

Program is found in the following core budget(s): Land Reclamation PSDs

7b. Provide an efficiency measure.

Note: Throughout the existence of the program 72% of the high priority sites have been cleaned up. As of FY 2005 only 28% of the sites were left. In this area, efficiency could be seen as reclaiming high priority sites first. These are sites that pose the greatest risk to public health or the environment. The chart above in 7a shows areas that are high priority. This chart reflects the percent of the remaining priority 1 (extreme danger to human health, safety and general welfare) and priority 2 (serious danger to human health, safety, and general welfare) sites cleaned up each year.

7c. Provide the number of clients/individuals served (if applicable)

Abandoned Mine Lands Reclaimed During the Last Three Years

County	Number of Projects
Henry	1
Jasper	4
Newton	2
Lawrence	1
Barton	1
Boone	1
Callaway	2
Franklin	1
Putnam	1
Macon	1

Note: this is not an all inclusive list, the state as a whole benefits from the health and safety concerns alleviated through abandoned mine reclamation, particularly local residents and individuals enjoying outdoor activities in the area.

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Bond Forfeitures

Program is found in the following core budget(s): Land Reclamation PSDs

1. What does this program do?

To receive a permit, mining companies are required to obtain bonds to ensure land is reclaimed. Companies that cannot complete reclamation must make their reclamation bonds available to Missouri to pay for reclamation. The coal bond forfeiture program reclaims lands that have had their reclamation bonds forfeited (21 forfeited sites with 5,635 acres remaining to be reclaimed). The program may collect the reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond holder to perform the reclamation in the place of the original permit holder. When the surety bond holder performs the reclamation, the program provides inspection and oversight of the work completed. All reclamation work must follow complex and intensive state and federal laws and regulations.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 444.800 through 444.970 and Bond Forfeiture and Abandoned Mine
30 CFR Part 700.01 through 955.17 Lands

3. Are there federal matching requirements? If yes, please explain.

Coal Administration and Enforcement Grant 50% match

4. Is this a federally mandated program? If yes, please explain.

Bond forfeiture is required to reclaim coal mined lands where coal mining permits were revoked and the operator did not complete reclamation. The state has federal delegation to operate this program.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2006 Planned shown as full appropriation for the Land Reclamation Bond Forfeiture program. No program description form was submitted for the Small Operator Assistance Program; the program is not used.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Land Reclamation Bond Forfeitures

Program is found in the following core budget(s): Land Reclamation PSDs

6. What are the sources of the "Other" funds?

Mined Land Reclamation Fund (0906); Coal Mined Land Reclamation Fund (0684)

7a. Provide an effectiveness measure.

Note: Initial reclamation has been started on 40% of land in the bond forfeiture program.

7b. Provide an efficiency measure.

100% of the cost of reclamation is covered with no additional cost to taxpayers. Mined Land Reclamation Fund dollars are provided by the operator through an insurance bonding company to pay for final reclamation costs. The bond forfeiture program (MLRF) covers approximately 75% of the cost of reclamation. Any additional funds required to complete reclamation come from the Coal Mined Land Reclamation Fund (CMLRF). This fund contains fees paid by operators on the first 100,000 tons mined each year.

Remaining Bond Forfeiture Sites Funding		
Total Cost	Forfeited Bonds-MLRF	Bond Pool CMLRF Needed
\$11,417,520	\$8,514,421	\$2,903,099

7c. Provide the number of clients/individuals served (if applicable)

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds)	5,209,164	3,433,569	3,273,562	2,603,928
Less Reverted (All Funds)	(123,274)	(3,909)	(6,203)	N/A
Budget Authority (All Funds)	5,085,890	3,429,660	3,267,359	N/A
Actual Expenditures (All Funds)	2,488,850	2,295,789	2,191,534	N/A
Unexpended (All Funds)	2,597,040	1,133,871	1,075,825	N/A
Unexpended, by Fund:				
General Revenue	194	1,209	361	N/A
Federal	2,272,435	798,076	861,917	N/A
Other	324,411	334,586	213,547	N/A
	(1), (2)	(1), (2)	(1), (2)	(3)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. In FY 2003 additional General Revenue (GR) funds were withheld to help balance state funding shortfalls.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) In FY 2006 portions of the Air and Land Protection Division and Water Protection and Soil Conservation Division were consolidated to create the Division of Environmental Quality. To provide comparable data, the prior year and current year financial information for these two administration groups have been combined and reported here.

(2) Federal EE appropriations have historically been set at a level to take advantage of potential federal funding opportunities. In addition, expenses were held to a minimum in FY 2004 and FY 2005 based on state funding shortfalls.

(3) A voluntary core reduction of \$150,000 in EE was taken in the FY 2006 budget.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

1. What does this program do?

The Administration of the Division of Environmental Quality (DEQ) is responsible for the integration, direction, coordination and other management functions for the direct programs' statutory mandates. In addition, administration provides coordination with other DNR divisions and external stakeholders including the general public, community organizations and regulated businesses. Division staff also represent programs and the department in negotiations with federal and state agencies. Staff are committed to the continuous improvement of the effectiveness of the programs through administrative support, policy direction, fiscal management and legal reviews. Division staff communicate with citizens, business, media and legislators to provide information and respond to specific inquiries on environmental issues. Staff also perform duties such as inter-program permitting for major facility siting, rulemakings, environmental management systems and enforcement coordination, risk-based corrective action, quality assurance and strategic plans. The Division of Environmental Quality was reorganized to include the Air Pollution Control Program (APCP), Land Reclamation Program (LRP), Hazardous Waste Program (HWP), Solid Waste Management Program (SWMP), and the Water Protection Program (WPP) which includes the Water Pollution Control, Public Drinking Water, Operator Certification and Wellhead Protection functions.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The Division of Environmental Quality administers programs that protect human health, public welfare and the environment. These programs are authorized by state and federal laws noted in the direct programs. These laws deal with air quality, solid and hazardous wastes, mining, voluntary cleanup, petroleum, clean water and drinking water.

3. Are there federal matching requirements? If yes, please explain.

Federal grants are managed at the program level.

4. Is this a federally mandated program? If yes, please explain.

The Division Administration oversees and coordinates programmatic responsibilities for which the state has elected through environmental statutes to seek delegation of federal programs.

5. Provide actual expenditures for the prior three fiscal years.

Program Expenditure History

Note: Through reorganization portions of the Air and Land Protection Division and the Water Protection and Soil Conservation Division were combined to form the Division of Environmental Quality. To provide comparable data these numbers have been restated to reflect the combined administrative expenditures. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2006 Planned is shown at full appropriation level.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

6. What are the sources of the "Other " funds?

Cost Allocation Fund (0500)

7a. Provide an effectiveness measure.

Involving Missourians in Solving Environmental Problems

Note: Portions of the former Divisions of Air and Land Protection and Water Protection and Soil Conservation were combined to form the Division of Environmental Quality. The DEQ strives to maintain public awareness and involvement in the issues affecting Missourians' environment. The number of public meetings was higher than projected in FY 2005 to involve more Missouri citizens in environmental issues.

Fiscal Note Reviews Provided for Proposed Legislation

Notes: The division administration is responsible for projecting impacts of proposed legislation involving any program function. The Division adds valuable input on the affects of potential legislation or amended regulations through a procedure allowing each program to provide comments on technical aspects, cost impacts and feasibility. The Division then provides information in a consolidated format to the Department.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7b. Provide an efficiency measure.

**Staff with the Division Over One Year
(at fiscal year end)**

Notes: The goal of the division is to recruit and retain the best people. Through communication and division support the intent is to enable staff to do their jobs and provide a work environment that will promote employee retention. It is the goal of the division to retain productive quality staff by providing these staff with the communication, training, infrastructure and resources to continue to do their jobs in an effective way and in a professional working environment.

Division Administration in Relation to Total Division FTE

Division Administration Expenditures in Relation to Total Division Expenditures

Note: FY 2006, FY 2007 and FY 2008 are projected based on spending full appropriation allocated to the division through the reorganization. Due to division reorganization in FY 2006, historical information is not available. These projections include operations spending only, pass through expenditures are not included.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7c. Provide the number of clients/individuals served (if applicable)

The Division serves the line programs:

Air Pollution Control, Hazardous Waste Management, Land Reclamation, Solid Waste Management, and Water Protection (including Water Pollution Control, Public Drinking Water, Operator Certification and Wellhead Protection).

Division FY 2007 Department Request FTE by Program
Total 478.41

Division FY 2007 Operating Appropriations by Program
Total \$26,666,865

Note: The Division serves the programs by aiding in resource maximization. The division administration staff work with the programs to ensure adequate appropriations are available to meet needs.

7d. Provide a customer satisfaction measure, if available.

Not available

<i>Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.</i>					<i>Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.</i>				
Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568)									
Note: Retention of the "E" is requested for Other Funds.									
2. CORE DESCRIPTION									
Violations of water pollution, air pollution, hazardous waste, solid waste, and other environmental laws can affect the quality of life of the citizens and have a long lasting effect on the state's natural resources. Violators are liable and must compensate the state for the damage to the environment caused by their actions. These funds are then available to help repair damage or provide background data to help measure or mitigate similar future actions that may damage the environment.									
Funds received as a result of natural resource damages, per statute, are deposited 10% to the Chemical Emergency Preparedness Fund (RSMo 640.235), with the remaining funds deposited to the Natural Resources Protection Fund - Damages Subaccount (0555). Occasionally, a court ordered settlement will be directed by the judge to be deposited to the Natural Resources Protection Fund – Water Pollution Permit Fees Subaccount (0568). The department will use appropriations from these funds for monitoring, repair or replacement of damaged state natural resources.									
This appropriation allows the department to conduct studies to assess source impacts and better understand the interaction of pollutants and the environment and conduct monitoring and assessment to ensure appropriate and timely remediation of resources that are showing deterioration.									
3. PROGRAM LISTING (list programs included in this core funding)									
Environmental Damages									

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Environmental Damages

Budget Unit 79345C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	269,711	269,711	644,709	269,711	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	269,711	269,711	644,709	N/A	
Actual Expenditures (All Funds)	65,000	216,997	546,157	N/A	
Unexpended (All Funds)	204,711	52,714	98,552	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	0	0	0	N/A	
Other	204,711	52,714	98,552	N/A	
	(2)	(2)	(2)		

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) The department requests retention of the "E" appropriations on the Natural Resources Protection Fund – Damages Subaccount (0555) and the Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568) to allow the department to expend funds received from natural resource damages in a timely and efficient manner for the purposes intended.

(2) Unknown settlements and level of work required each year may trigger an "E" increase (as seen in FY05) or lapse of unexpended appropriation in any given year.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

1. What does this program do?

Violations of water pollution, air pollution, hazardous waste, solid waste, and other environmental laws can affect the quality of life of the citizens and have a long lasting effect on the state's natural resources. Violators are liable and must compensate for the damage to the environment caused by their actions. Funds are then available to help repair damage, provide improvements to offset the damage, or provide background data to help measure or mitigate similar future actions that may damage the environment.

Funds received as a result of natural resource damages, per statute, are deposited 10% to the Chemical Emergency Preparedness Fund (RSMo 640.235), with the remaining funds deposited to the Natural Resources Protection Fund - Damages Subaccount (0555). Occasionally, a court ordered settlement will be directed by the judge to be deposited to the Natural Resources Protection Fund - Water Pollution Permit Fees Subaccount (0568). The department will use appropriations from these funds for monitoring, repair or replacement of damaged state natural resources.

The Volunteer Water Quality Monitoring Program, a subset of the Missouri Stream Team Program, is a cooperative project with the Departments of Natural Resources and Conservation, and the Conservation Federation of Missouri. Citizen volunteers may attend a series of five training workshops, from introductory level progressing through levels 1-4 on sample collection procedures. Having qualified volunteer monitors that are properly trained in quality assurance/quality control supplements the data collected by the department. The data collected is critical to the department's efforts to assess the waters of the state where water may have been impacted by pollutants and to assist in focusing further sampling efforts in waters that may be threatened. Volunteers that have attended the Level 4 training on sample collection and preservation and chain-of-custody procedures may collect samples that generate water chemistry data for the department. Data collected for some parameters from on-site analysis of these samples is used for making regular assessments. State environmental laboratory analysis can be done where an even higher data credibility is essential. The sample kits that these volunteers use are purchased through the core appropriation.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapters 640 and 644	Missouri Clean Water Law
RSMo Chapter 640	Missouri Safe Drinking Water Law
RSMo 260.350 through 260.434	Hazardous Waste Facility Permits – Permitting, Inspection and Enforcement
RSMo 260.435 through 260.480	Abandoned or Uncontrolled Sites (Registry)
RSMo 643.010 through 643.192	Air Pollution Control
RSMo 260.200 through 260.255	Solid Waste Management
RSMo 640.235	Natural Resources Protection Fund Damages

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

The department is requesting retention of the "E" appropriations on the Natural Resources Protection Fund – Damages Subaccount (0555) and the Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568) to allow the department to expend funds received from natural resource damages in a timely and efficient manner for the purposes intended. FY06 Planned is shown at core appropriation level.

6. What are the sources of the "Other" funds?

Natural Resources Protection Fund – Damages Subaccount (0555); Natural Resources Protection Fund – Water Pollution Permit Fee Subaccount (0568)

7a. Provide an effectiveness measure.

Number of volunteer monitors who received training in order to conduct water quality monitoring activities of the state's water resources

Note: There are 5 levels of training available to volunteers that want to monitor the state's water resources. Each level of training is a prerequisite for the next higher level.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

Hazardous Waste Sites with Natural Resource Damage Activity

Note: Funds recovered as a result of Natural Resource Damage (NRD) claims and/or settlements are deposited into the Natural Resource Protection Fund Damages Subaccount (0555). These funds are used to restore, replace, rehabilitate or acquire the equivalent of the injured natural resources so that the public can use and enjoy these natural resources. The chart above represents the number of sites where the department has worked with some type of NRD activity.

7b. Provide an efficiency measure.

Potential assessment of natural resource damages may provide replacement of or payment to the state for lost or damaged natural resources. The department is working in coordination with a federal trustee agency, Department of Interior Fish and Wildlife Service, to jointly review damages and assess environmental impacts. In addition, the department formed a workgroup to review potential reclamation projects and begin using damages recovered to conduct site specific reclamation activities. Working with others toward common goals will provide efficiencies for the department.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

Est. Fringe	0	0	0	0
--------------------	---	---	---	---

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

2. CORE DESCRIPTION

This core appropriation provides authority to fund expenses and to pass through funds for technical assistance grants, environmental education projects, and demonstration projects. This appropriation also allows the department to develop partnerships and pursue federal funds that often have a competitive application process.

3. PROGRAM LISTING (list programs included in this core funding)

Technical Assistance Grants

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Technical Assistance Grants Core

Budget Unit 79360C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	125,000	325,000	325,000	125,000	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	125,000	325,000	325,000	N/A	
Actual Expenditures (All Funds)	64,506	145,898	248,952	N/A	
Unexpended (All Funds)	60,494	179,102	76,048	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	60,494	179,102	76,048	N/A	
Other	0	0	0	N/A	

(2)

(2)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) An "E" is necessary because of the uncertain availability of funds and the timing of expenditures; grant commitments often span multiple fiscal years.

(2) We requested the estimated appropriation be increased by \$200,000 in FY04 and FY05 to account for increased federal grant activity and for the ability to encumber outstanding project grant commitments.

Language Change: We are requesting the reference to the Outreach and Assistance Center be removed. The house bill will be written "To the Department of Natural Resources, For funding environmental education, demonstration projects, and technical assistance grants, From ... "

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality

Program is found in the following core budget(s): Technical Assistance Grants

1. What does this program do?

This program helps people, businesses and local governments understand natural resource concepts and issues, comply with statutes and regulations, use pollution prevention strategies, and to certify public water supply and wastewater treatment operators. To more effectively accomplish these activities, the department pursues federal grant monies that may be available for pass through to the public, local governments, other agencies and other partners.

Educational activities, training, information dissemination and technology transfer methods, such as demonstration projects, are among the most effective ways to promote pollution prevention practices and develop an organization's technical, managerial, and financial capabilities. Funding this decision item enhances the ability to accomplish these goals for Missouri through demonstration projects; workshops; educational and training activities by enabling available federal grant monies to be passed through to public and private partners.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.010 – 640.758	Department of Natural Resources - Duties associated with environmental assistance on behalf of the department
RSMo 640.100 and 644.026	Drinking Water and Wastewater Operator Certification; Safe Drinking Water Act
RSMo 643.173 and 643.175	Small Business Technical Assistance Program

3. Are there federal matching requirements? If yes, please explain.

Drinking Water Operator Training Reimbursement	100% Federal
Pollution Prevention Incentives for States	50% State
Small Business Mentoring for Compliance Assistance Outcome Measurement	12% State
Brownfields Assessment Grant	100% Federal
Low Sulphur Coal Emissions Reduction Pilot	100% Federal
Other competitive grants may require various matching ratios	varies

4. Is this a federally mandated program? If yes, please explain.

Federal law mandates that operators of public drinking water systems be certified.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality

Program is found in the following core budget(s): Technical Assistance Grants

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other " funds?

Not applicable

7a. Provide an effectiveness measure.

Funding passed through by category

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Environmental Quality

Program is found in the following core budget(s): Technical Assistance Grants

7b. Provide an efficiency measure.

PS cost per training voucher redeemed (training for operators of drinking water facilities)

FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
N/A		N/A		\$17.50	\$13.56	\$13.50	\$13.25	\$13.25

Notes: Training vouchers were issued in early FY05, and were not redeemed until the later part of FY05.

This was a new measure in FY05, therefore prior year projected and actual data is not available.

7c. Provide the number of clients/individuals served (if applicable).

Number of individuals benefiting from these grants and projects

Other Funds: Missouri Air Emission Reduction Fund (0267)

2. CORE DESCRIPTION

The department's vehicle emission inspection program in the St. Louis ozone non-attainment area ensures cars and light duty trucks meet pollution standards. The main problem pollutant in St. Louis has been ground level ozone - a highly corrosive, reactive and energetic form of oxygen produced from other pollutants, like volatile organic compounds and nitrogen oxides, which are produced directly by many sources, including automobiles and factories. Ground level ozone causes breathing problems by damaging lung tissue and aggravating respiratory diseases such as asthma. Asthma rates, especially among children, have increased significantly in recent years. Fortunately, as a result of enormous efforts by citizens and businesses, the air quality has improved so much that in the spring of 2003, the Environmental Protection Agency (EPA) redesignated the St. Louis metropolitan area from nonattainment to attainment for the "1-hour" ozone National Ambient Air Quality Standard (NAAQS). However, air pollution must be reduced further in order to meet the new "8-hour" ozone standard, promulgated by EPA in 1997 to better protect public health.

(1)

(1)

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) The unspent funding was due to the inability to fill vacancies with qualified staff within salary range available and actual expense and equipment expenditures being less than projected.

PROGRAM DESCRIPTION

Department of Natural Resources

Enhanced Inspection and Maintenance Program

Program is found in the following core budget(s): Enhanced Inspection and Maintenance

1. What does this program do?

The department's vehicle emission inspection program in the St. Louis ozone non-attainment area ensures cars and light duty trucks meet pollution standards. The main problem pollutant in St. Louis has been ground level ozone- a highly corrosive, reactive and energetic form of oxygen produced from other pollutants, like volatile organic compounds and nitrogen oxides, which are produced directly by many sources, including automobiles and factories. Ground level ozone causes breathing problems by damaging lung tissue and aggravating respiratory diseases such as asthma. Asthma rates, especially among children, have increased significantly in recent years. Fortunately, as a result of enormous efforts by citizens and businesses, the air quality has improved so much that in the spring of 2003, the Environmental Protection Agency (EPA) re-designated the St. Louis metropolitan area from non-attainment to attainment for the "1-hour" ozone National Ambient Air Quality Standard (NAAQS). However, air pollution must be reduced further in order to meet the new "8-hour" ozone standard, promulgated by EPA in 1997 to better protect public health.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMO 643.300 through 643.360 Air Quality Attainment Act
Federal Clean Air Act, with amendments, 1990

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

The department is delegated federal authority to ensure compliance with the Federal Clean Air Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other" funds?

Missouri Air Emission Reduction Fund (0267)

PROGRAM DESCRIPTION

Department of Natural Resources

Enhanced Inspection and Maintenance Program

Program is found in the following core budget(s): Enhanced Inspection and Maintenance

7a. Provide an effectiveness measure.

Ozone exceedances in St. Louis

The eight-hour National Ambient Air Quality Standard is 85 ppb, to be determined as follows: For each site, the fourth highest daily eight-hour average for each year of a consecutive three-year period are averaged. The site with the highest value determines the design value for the area. If the design value is 85 ppb or greater the area is in violation.

7b. Provide an efficiency measure.

The below chart represents the average wait time for a vehicle at I/M stations in the St. Louis area. In 2000-2001 the average wait time per vehicle 11.19 min, in 2002-2003 the average wait time per vehicle was 9.75 min (13% reduction), and the average wait time per vehicle in 2004-2005 was 5.63 min (42% reduction).

Notes: The GCAP began in April 2000. January - April vehicles with even number model years were given extensions until later in the calendar year.
(Notes continued on following page.)

PROGRAM DESCRIPTION

Department of Natural Resources

Enhanced Inspection and Maintenance Program

Program is found in the following core budget(s): Enhanced Inspection and Maintenance

The test stations experienced high volumes and wait times in the first few months of the program. The average wait times of vehicles being emission tested each month varies depending on vehicle registration patterns. There are more vehicles registered in summer months and fewer vehicles registered in winter months. Average wait times increased in February 2002 as a result of the GCAP's change to the emission standards. IM240 passing standards were tightened as planned from phase-in standards to final standards. This change in test standards meant that more vehicles received full-length IM240 tests. Average wait times decreased in January 2003 as a result of the GCAP's change of the emission test method for 1996 and newer vehicles. Vehicles that pass the OBD II test (a 30 second test) are now allowed to bypass the IM240 test (a 240 second test). RSMo 643.310 states that no more than 5% of persons having an inspection should be required to wait more than 15 minutes for the inspection to begin. As of June 6, 2005, all 1996 and newer vehicles will be tested using solely OBD II. This program change is expected to dramatically drop the average wait times due to the elimination of the 240 second IM240 test for vehicles failing quicker OBDII test. An accurate three year prediction of just how dramatic a drop is not possible at this time due to the lack of historical data incorporating this program change, therefore data ends with 2005.

7c. Provide the number of clients/individuals served, if applicable.

Reducing Air Pollutants to reduce asthma triggers.

Missourians with Asthma (asthma can be triggered by air pollutants)

Asthma is a chronic disease which can range from mild to life-threatening. Allergens, respiratory infections, heavy exercise, exposure to chemicals, fumes, and smoke can all trigger asthma attacks. Although there is no cure for asthma yet, medication and avoiding a known trigger can reduce the number of attacks and their severity.

4,249,841 Total Missourian adults, age 18 or older, in the year 2003.

1,431,398 Total St. Louis Non-attainment area adults, age 18 or older, in the year 2000.
--

123,452 St. Louis Non-attainment area adults have reported being diagnosed with asthma in the year 2003.
--

128,677 St. Louis Non-attainment area citizens visited the emergency room for asthma between the years 1993 and 2002.

30,696 St. Louis Non-attainment area citizens were hospitalized due to asthma between the years 1993 and 2002.
--

419 St. Louis Non-attainment area citizens died due to asthma between the years 1993 and 2002.
--

\$16,100,000,000 - U.S. estimated annual health care cost associated with asthma (source American Lung Association)

Corresponding data for children and other years are currently not available. The Missouri Department of Health and Senior Services does not have a system in place to completely measure the burden of asthma amounts in children in Missouri. Corresponding costs for asthma in Missouri is currently not available.

2. CORE DESCRIPTION									
<p>Missourians who store petroleum in underground tanks are required to have a financial responsibility mechanism to pay for costs of cleanup and third party damages if the tank or piping leaks. Private insurance is unavailable or prohibitively expensive. The Petroleum Storage Tank Insurance Fund (PSTIF) provides an economical way for tank owners/operators to comply with this requirement. It is funded by a fee on all petroleum coming into the state, and is managed by an 11-member Board of Trustees. In addition, thousands of tank sites in the state were contaminated with petroleum in the past, before environmental laws and regulations were in place and before pollution liability insurance was required. These properties are not economically viable due to the environmental liability associated with the property. The Legislature authorized the PSTIF to pay for cleanup of these sites, subject to certain criteria, which stimulates redevelopment of these properties.</p> <p>This appropriation will fund the Board's staff and operating expenses, including application review and policy issuance, annual compliance reviews, loss prevention and inspection services, accounting, annual external audit, actuarial analyses and cash flow projections, data management and Board/staff expenses.</p>

Other	140,311	1,342,689	1,283,781	N/A

(1)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period expenditures.

NOTE:

(1) Reduced FY 04 expenditures resulted primarily from the shift of loss adjusting expenses (contracted costs to investigate and pay claims), to the Board's appropriation for claim payments/expenses. Contracted lost adjusting costs were rebid in FY 04; FY 05 was the first full year of the new contract.

Other Funds: Petroleum Storage Tank Insurance Fund (0585)									
Note: An estimated appropriation is requested for the Petroleum Storage Tank Insurance Fund.									

2. CORE DESCRIPTION

Missourians who store petroleum in underground tanks are required to have a financial responsibility mechanism to pay for costs of cleanup and third party damages if the tank or piping leaks. Private insurance is unavailable or prohibitively expensive. The Petroleum Storage Tank Insurance Fund (PSTIF) provides an economical way for tank owners/operators to comply with this requirement. It is funded by a fee on all petroleum coming into the state and is managed by an 11-member Board of Trustees. In addition, thousands of tank sites in the state were contaminated with petroleum in the past, before environmental laws and regulations were in place and before pollution liability insurance was required. These properties are not economically viable due to the environmental liability associated with the property. The Legislature authorized the PSTIF to pay for cleanup of these sites, subject to certain criteria, which stimulates redevelopment of these properties.

This appropriation will authorize investigation, adjudication and payment of claims for cleanup and third party damages. Because of the difficulty of predicting claims, an estimated appropriation is requested. In addition, this appropriation authorizes payment of premium refunds when necessary.

3. PROGRAM LISTING (list programs included in this core funding)

PROGRAM DESCRIPTION

Department of Natural Resources

Petroleum Storage Tank Insurance Fund Board of Trustees

Program is found in the following core budget(s): Staff and Operating Expenses, Claims Costs and Erroneous Receipts

1. What does this program do?

Missourians who store petroleum in underground tanks are required to have a financial responsibility mechanism to pay for costs of cleanup and third party damages if the tank or piping leaks. Private insurance is unavailable or prohibitively expensive. The Petroleum Storage Tank Insurance Fund (PSTIF) provides an economical way for tank owners/operators to comply with this requirement, and pays claims made by its policyholders.

In addition, thousands of tank sites in the state were contaminated with petroleum in the past, before environmental laws and regulations were in place and before pollution liability insurance was required. These properties are not economically viable due to the environmental liability associated with the property. The Legislature has authorized the PSTIF to pay for cleanup of these sites, subject to certain criteria. PSTIF funding for cleanup stimulates redevelopment of these properties.

The PSTIF is funded by a fee on all petroleum coming into the state, and is managed by an eleven member Board of Trustees.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 319.129-132

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY03-FY05 expenditures are as follows: FY03 - Staff & Operating Expenses \$2,698,000, Claims Costs & Refunds \$14,740,710; FY04 - Staff & Operating Expenses \$1,045,535, Claims Costs and Refunds \$15,464,422; FY05 - Staff & Operating Expenses \$1,108,043, Claims Costs & Refunds \$15,425,817. FY06 appropriations shown as budgeted: Staff and Operating Expenses \$2,273,524, Claim Costs and Refunds \$25,000,000 "E".

PROGRAM DESCRIPTION

Department of Natural Resources

Petroleum Storage Tank Insurance Fund Board of Trustees

Program is found in the following core budget(s): Staff and Operating Expenses, Claims Costs and Erroneous Receipts

6. What are the sources of the "Other " funds?

Petroleum Storage Tank Insurance Fund (0585)

7a. Provide an effectiveness measure.

Percentage of underground tank sites insured by PSTIF

Note: The PSTIF works to persuade tank owners to buy insurance, so there will be money available if a leak occurs. This assures better protection of the environment and public health.

Number of open Underground Storage Tank (UST) claims

Note: "Number of open claims" indicates how many property owners are being helped by the program at any one time.

PROGRAM DESCRIPTION

Department of Natural Resources

Petroleum Storage Tank Insurance Fund Board of Trustees

Program is found in the following core budget(s): Staff and Operating Expenses, Claims Costs and Erroneous Receipts

Number of open Aboveground Storage Tank (AST) claims

7b. Provide an efficiency measure.

PSTIF administrative costs as a percentage of revenue

Note: One of the Board's goals is to maximize the portion of its revenues available for cleanups by minimizing its administrative costs.

7c. Provide the number of clients/individuals served, if applicable.

	FY02	FY03	FY04	FY05
No. of Owners Insured	1,576	1,642	1,693	1,705
No. of Claimants Paid Benefits (cumulative)	1,248	1,428	1,590	1,743

7d. Provide a customer satisfaction measure, if available.

Not available

2. CORE DESCRIPTION									
The goal of the department's Underground Storage Tank (UST) efforts is to protect human health and the environment through the regulation of underground storage tank systems. This mission is accomplished by registering USTs, properly closing unused tanks, investigating and cleaning up contamination from leaking tanks, and ensuring compliance with state and federal UST laws.									
Environmental Services coordinates state, federal and local efforts during an environmental emergency and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY05, approximately 3,488 hazardous substance spills, leaks and other chemical-related incidents were reported to the department through the statewide emergency response telephone. Many of these incidents were managed by providing technical assistance over the telephone, but a substantial number required an on-scene response to assess the situation, provide technical assistance to on-site responders, and ensure that the hazardous substance release was properly cleaned up. The department estimates that 50% of these incidents are petroleum related.									
3. PROGRAM LISTING (list programs included in this core funding)

General Revenue	N/A	N/A	N/A	N/A
Federal	N/A	N/A	N/A	N/A
Other	N/A	N/A	N/A	N/A
	(1)	(1)	(1)	(2)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) Prior to FY06 PSTIF (0585) funding was included in various budgets throughout the department.

(2) The current agreement between the department and the Petroleum Storage Tank Insurance Fund Board provides \$1,000,000 to be used for petroleum tank related activities and environmental emergency response. Since the \$1,000,000 must also cover fringe benefit costs, the actual Personal Services and Expense and Equipment expenditures will be lower than the \$1,000,000 appropriation authority.

PROGRAM DESCRIPTION

Department of Natural Resources

Agency Wide Operations

Agency Wide Operations - Petroleum Related Activities

1. What does this program do?

The department regulates over 3,700 underground storage tank (UST) facilities to reduce the incidence of releases and to ensure detection of releases that do occur. Requiring a financial responsibility instrument assures that funds will be available if a tank owner has a leak or spill. The department oversees the reporting, investigation, closure and cleanup of releases from USTs and aboveground storage tanks (ASTs). In addition, data is captured and managed regarding operating UST sites.

Environmental Services coordinates state, federal and local efforts during an environmental emergency, and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY05, approximately 3,488 hazardous substance spills, leaks and other chemical-related incidents were reported to the department through the statewide emergency response telephone. Many of these incidents were managed by providing technical assistance over the telephone, but a substantial number required an on-scene response to assess the situation, provide technical assistance to on-site responders, and ensure that the hazardous substance release was properly cleaned up.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 319.100 through 319.139

Petroleum Storage Tanks

RSMo 260.500 through 260.552

Hazardous Substance Emergency Response

RSMo 260.818 through 260.819

Oil Spill Response, National Contingency Plan

Oil Pollution Act of 1990

3. Are there federal matching requirements? If yes, please explain.

No.

4. Is this a federally mandated program? If yes, please explain.

No.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 Planned expenditures are shown at full appropriation spending.

Prior to FY06 PSTIF (0585) funding was included in various budgets throughout the department.

PROGRAM DESCRIPTION

Department of Natural Resources

Agency Wide Operations

Agency Wide Operations - Petroleum Related Activities

6. What are the sources of the "Other " funds?

Petroleum Storage Tank Insurance Fund (0585)

7a. Provide an effectiveness measure.

UST Financial Responsibility (FR) Compliance

Note: The financial responsibility (FR) requirement is a vital component of state regulations which assures that money will be available for cleanup if a UST leak occurs. Financial responsibility is required for all regulated tanks currently in use. Temporarily closed tanks, while regulated, do not require financial responsibility. The number of underground storage tank facilities with an acceptable form of financial responsibility continues to increase each year due to the department's efforts.

This is a new measure and therefore historical projections are not available.

Number of EER Incidents Reported and Number Requiring On Site Response By Year

Note: The department estimates about 50% of Environmental Emergency Responses (EER) are petroleum related.

PROGRAM DESCRIPTION

Department of Natural Resources

Agency Wide Operations

Agency Wide Operations - Petroleum Related Activities

7b. Provide an efficiency measure.

Petroleum underground storage tank owners and operators are required to have the financial means to pay for the cleanup and other damages that may occur from a release from their UST systems. This requirement is known as financial responsibility (FR). Department staff efforts to increase the number of insured tanks show continued success. Facilities in compliance reduces the uninsured liability on owners and the state.

7c. Provide the number of clients/individuals served, if applicable.

The department's Environmental Emergency Response efforts include providing assistance to fire services, hazardous materials teams, homeland security teams, law enforcement, local emergency management committees, elected officials, local, state and federal agencies, private business/industry, and the citizens of Missouri, through the department's 24-hour emergency line, interaction and communication on a daily basis. Approximately 50% of emergency responses are petroleum related. Since this measure relates to public calls regarding emergencies the data represents actual calls. Projections are not shown as the only basis is the historical numbers given above.

7d. Provide a customer satisfaction measure, if available.

Not available.

This page was intentionally left blank.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit	78510C
Division of Geology and Land Survey		
Division of Geology and Land Survey Operations Core		

1. CORE FINANCIAL SUMMARY

	FY 2007 Budget Request			
	GR	Federal	Other	Total
PS	679,533	621,351	1,222,207	2,523,091
EE	110,882	311,045	216,593	638,520
PSD	0	0	0	0
Total	790,415	932,396	1,438,800	3,161,611
FTE	18.13	17.07	36.29	71.49

Est. Fringe	332,224	303,779	597,537	1,233,539
--------------------	---------	---------	---------	-----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

	FY 2007 Governor's Recommendation			
	GR	Fed	Other	Total
PS	679,533	621,351	1,222,207	2,523,091
EE	110,882	311,045	216,593	638,520
PSD	0	0	0	0
Total	790,415	932,396	1,438,800	3,161,611
FTE	18.13	17.07	36.29	71.49

Est. Fringe	332,224	303,779	597,537	1,233,539
--------------------	---------	---------	---------	-----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fees (0568); Solid Waste Management Fund (0570); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Drycleaner Environmental Response Trust Fund (0898)

Notes: This decision item provides operational funding for the Division of Geology and Land Survey. Prior to FY07 each program (Geological Survey, Water Resources, Land Survey and Administration and Support) was budgeted separately. In the FY07 budget, Water Resources will continue to be budgeted separately (budget unit 78518C); the Wellhead Protection Unit of the Geological Survey Program will be transferred to the Division of Environmental Quality Water Protection Program's budget (budget unit 78847C). The remaining programs will be budgeted as DGLS Operations.

The division requests 25% General Revenue flexibility for FY 2007.

2. CORE DESCRIPTION

Headquartered in Rolla, Missouri, the Division of Geology and Land Survey investigates the state's geology and provides geologic and hydrologic information and expertise to assist with economic and environmental decisions relating to site remediation, contaminant migration, subsurface investigations and geologic hazards. The division also determines the character and availability of the state's water, energy, and mineral resources. The division is responsible for restoring and maintaining the U.S. Public Land Survey System in Missouri and serves as a repository for the state's land survey records. Division management represents the state through the Association of American State Geologists and Central U.S. Earthquake Consortium.

3. PROGRAM LISTING (list programs included in this core funding)

Division of Geology and Land Survey

CORE DECISION ITEM

Department of Natural Resources
Division of Geology and Land Survey
Division of Geology and Land Survey Operations Core

Budget Unit 78510C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds) (1)	6,361,074	5,927,583	5,968,548	5,243,305
Less Reverted (All Funds)	(406,978)	(71,241)	(151,462)	N/A
Budget Authority (All Funds)	5,954,096	5,856,342	5,817,086	N/A
Actual Expenditures (All Funds)	5,114,419	4,946,948	4,814,805	N/A
Unexpended (All Funds)	839,677	909,394	1,002,281	N/A
Unexpended, by Fund:				
General Revenue	36,241	26,953	139,426	N/A
Federal	538,939	549,437	559,394	N/A
Other	264,497	333,004	303,461	N/A
	(2)	(2)	(2)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

- (1) Prior Year and Current year appropriations and expenditures for the DGLS programs (Geological Survey, Water Resources, Land Survey and Administration and Support) have been combined. Prior to the FY07 budget each program was budgeted separately. To provide comparable data, the historical data is reflected accordingly.
- (2) The division lapsed \$139,425 in General Revenue in FY05. This lapse was the result of several vacancies including engineers for dam safety inspections, hydrologist for river basin work and fiscal personnel.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78510C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: DGLS OPERATIONS	DIVISION: GEOLOGY AND LAND SURVEY

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

Due to reductions in General Revenue Expense & Equipment (E&E) budgets, the division anticipates using the flexibility in General Revenue Personal Service and E&E for basic operational needs. As in FY 2004 and FY 2005, we anticipate uses to include utility costs, fuel, field expenses, supplies and telephone charges. The program continues to see increases in ongoing expenses for such items as utilities, fuel, gas, etc. without a corresponding increase in E&E. The flexibility language allows the division to address these issues without a permanent increase in appropriation levels. This flexibility could also accommodate special equipment purchases (such as drill rods needed for subsurface investigations) without a permanent increase in appropriation levels. The flexibility also enhances the division's ability to address the state's needs when a specific but unanticipated problem or issue arises and requires additional staff time to gather certain data to analyze the problem.

DEPARTMENT REQUEST					GOVERNOR RECOMMENDATION				
DGLS is requesting 25% flexibility based on GR funding for FY 2007. The information below shows a 25% calculation of both the PS and E&E FY 2007 budgets.					The Governor recommended 25% flexibility on both PS and E&E.				
Section	PS or E&E	Core	% Flex Requested	Flex Request Amount	Section	PS or E&E	Core	% Flex Gov Rec	Flex Gov Rec Amount
	PS	\$679,533	25%	\$169,883		PS	\$679,533	25%	\$169,883
	E&E	\$110,882	25%	\$27,721		E&E	\$110,882	25%	\$27,721

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78510C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: DGLS OPERATIONS	DIVISION: GEOLOGY AND LAND SURVEY

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
<p>\$24,322 General Revenue PS \$ 0 General Revenue EE</p> <p>Note: In FY 2005, the DGLS was budgeted at the program level. This amount represents the flexibility used for the Geological Survey and the Administration and Support Programs.</p>	<p>Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly.</p> <p>FY 2006 Flex Approp (Estimate 25% of GR PS) \$186,041</p>	<p>Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly.</p> <p>FY 2007 Flex Request (25% of GR PS) \$169,883</p>

3. Was flexibility approved in the Prior Year Budget or the Current Year Budget? If so, how was the flexibility used during those years?

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
<p>In FY 2005, the division strived to maintain a consistent field presence in light of significant fuel price increases, increasing vehicle repair costs due to an aging fleet and other ongoing operational expenses.</p>	<p>In FY 2006, DGLS flexibility will be used to cover increased fuel costs, vehicle maintenance and other field and office expenses.</p>

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

1. What does this program do?

The Division of Geology and Land Survey (DGLS) performs a wide variety of activities and services that assist citizens, industry and government in the prudent use of Missouri's natural resources to achieve a higher standard of living and provide for a healthy natural environment. The DGLS maintains a wealth of geological data that describes and interprets the state's vast geological resources. The division works closely with the DNR environmental regulatory programs to evaluate conditions at sites where geologic information is essential for proper environmental planning and decision-making. The division is also conducting geologic and hydrologic assessments for redevelopment purposes at brownfield sites. Staff perform subsurface investigations at groundwater contamination sites to determine the source of the contamination. They also work to prevent future environmental problems by evaluating the geologic suitability of proposed landfills, waste disposal options for large subdivisions, wastewater disposal facilities and other sensitive sites prior to their permitting and/or construction. The division also performs a variety of geological data collection activities, such as geological mapping, mineral resource assessment, and landslide, collapse potential and earthquake hazard evaluations.

Another major responsibility of the division is to maintain the United States Public Land Survey System (USPLSS). The corners of the USPLSS are the framework from which all surveyors and property owners must rely for the determination of all land boundaries. In the early 1960's, land owners, title companies, and land surveyors saw an alarming trend in the inability to accurately and economically locate land boundaries. The corners, physical monumentation on which land surveys were based, had been either accidentally or intentionally destroyed. In many instances, land survey records were not preserved, maintained or recorded. Since 1969, an effort has been put forth to reverse the trends of high loss of land corners. These records provide the basis for the accurate and economic location of property boundaries in the state and for other resources that affect land ownership.

The division's leadership is responsible for providing overall management, policy, fiscal direction, guidance and support services. Functions include procurement, payables, personnel, grant administration, vehicle use monitoring and reporting, fixed assets, time accounting, building/grounds maintenance, publication and map sales, tracking and analyzing new legislation and policy decisions. Division management represent the State in numerous discussions, negotiations, organizations and projects with other states and with federal agencies. Overall division information sharing is coordinated and integrated which helps the division manage map and technical data for state and nationwide distribution.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.409	Surface and Groundwater Monitoring Program
RSMo 256.050	Geologic Assistance, Geologic Information and Maps
RSMo 256.112	Mine Map Repository
RSMo 256.170-256.173	Geologic Hazard Assessment
RSMo 319.200	Ground Shaking Notification
RSMo 256.090	Minerals, Rocks and Fossils
RSMo 578.200-578.225	Cave Resources Act
RSMo 260.925	Dry-Cleaning Facilities
RSMo 60.510.1 through 60.510.7	Powers and duties of department related to land survey
RSMO 60.321	Restoration of USPLSS
RSMo 256.010-256.080	Provides technical and administrative oversight of all direct program statutory mandates

3. Are there federal matching requirements? If yes, please explain.

National Coal Resource Data System	43% Federal (USGS)
State Geologic Mapping Program	50% Federal (USGS)
St. Louis, Missouri Area Surficial Materials Database	75% Federal (USGS)

4. Is this a federally mandated program? If yes, please explain.

No

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. This decision item provides operational funding for the Division of Geology and Land Survey. Prior to FY07 each program (Geological Survey, Water Resources, Land Survey and Administration and Support) was budgeted separately. In the FY07 budget, Water Resources will continue to be budgeted separately (budget unit 78518C); the Wellhead Protection Unit of the Geological Survey Program will be transferred to the Division of Environmental Quality Water Protection Program's budget (budget unit 78847C). The remaining programs will be budgeted as DGLS Operations.

6. What are the sources of the "Other " funds?

DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Natural Resources Protection Fund-Water Permit (0568); Solid Waste Management Fund (0570); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Drycleaner Environmental Response Trust Fund (0898)

7a. Provide an effectiveness measure.

Number of geological investigations conducted to determine the geologic and hydrologic suitability of proposed landfills or to characterize the conditions at existing solid waste disposal facilities

	FY03		FY04		FY05		FY06	FY07	FY08
	Proj.	Actual	Proj.	Actual	Proj.	Actual	Proj.	Proj.	Proj.
Geologic Investigations of proposed landfills	N/A	5	N/A	3	7	4	5	6	7
Geologic Investigations at existing solid waste disposal facilities	N/A	50	N/A	52	32	27	30	30	30

Notes: While the number of geologic investigations of proposed landfills appears low, each new site requires extensive field investigations to determine its geologic suitability in order to keep waste isolated from drinking water. Geologic investigations conducted at existing solid waste disposal facilities encompass a variety of tasks such as the monitoring of groundwater, assessment of gas migration, dye tracing to track contaminant movement, and other activities. This was a new measure in FY05, therefore some prior year projections are not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

Number of geological evaluations conducted to determine geologic and hydrologic suitability of proposed liquid waste disposal facilities prior to construction

Notes: Siting evaluations include septic tank evaluations for subdivisions, evaluations for animal waste lagoons, municipal lagoons and point source discharges. This was a new measure in FY05, therefore some prior year projected data is not available.

Number of geo-hydrologic evaluations conducted at leaking underground storage tank sites

Notes: Each leaking underground storage tank site investigation is a highly complex and time consuming activity. Each site must be thoroughly investigated by drilling numerous borings into the subsurface to determine the source of and characteristics of groundwater contamination. This was a new measure in FY05, therefore some prior year projected data is not available.

Number of geo-hydrologic evaluations conducted at hazardous waste sites

Notes: Geo-hydrologic assistance includes work plan review, investigative reports, cleanup investigation and oversight and on-site assistance for Superfund, Federal Facilities, Resource Conservation Recovery Act, Dry Cleaner and voluntary cleanup sites. This was a new measure in FY05, therefore some prior year projected data is not available. Projections for FY06, 07 and 08 reflect the funding reductions associated with petroleum releases.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

Number of Geographic Reference System (GRS) stations established

Fiscal Year	Actual Stations per year	Projected Stations per year	Cumulative Actual Total	Projected Total Stations	Actual Sq. Miles per year	Projected Sq. Miles per year	Cumulative Actual Sq. Miles	Projected Total Sq. Miles
2003	149	N/A	2,094	N/A	4,519	N/A	21,399	N/A
2004	103	N/A	2,197	N/A	3,124	N/A	24,523	N/A
2005	164	130	2,361	N/A	4,974	N/A	29,497	N/A
2006	N/A	130	N/A	2,491	N/A	3,943	N/A	33,440
2007	N/A	130	N/A	2,621	N/A	3,943	N/A	37,383
2008	N/A	130	N/A	2,751	N/A	3,943	N/A	41,326

Note: Statewide coverage of 4 mile GRS densification is currently at 42.3% of the entire state.

Note: This was a new measure in FY05, therefore some prior year projected data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

Percent of land survey corners restored

Note: Corners are destroyed annually, which limits the cumulative gain in total corners restored.

Number of products available on the Internet or other electronic outlets (cumulative)

	FY2003		FY2004		FY2005		FY2006	FY2007	FY2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Number of products	82	65	70	73	75	88	100	120	140

7b. Provide an efficiency measure.

Number of maps and publications produced, and amount of geologic data collected

	FY03		FY04		FY05		FY06	FY07	FY08
	Proj.	Actual	Proj.	Actual	Proj.	Actual	Proj.	Proj.	Proj.
Maps (geological, surficial materials, wellhead advisory, etc)	N/A	34	N/A	19	11	14	10	15	6
Publications	N/A	5	N/A	8	8	6	8	8	4
Gaining/losing stream determinations	N/A	75	N/A	93	125	80	90	90	90
Water traces completed	N/A	3	N/A	3	4	2	4	4	4
Abandoned mines/smelters investigated	N/A	N/A	N/A	900	2,500	1,165	1,000	1,000	1,000
Paper files, maps or logs digitized or scanned	N/A	200	N/A	200	75	1,160	2,300	2,300	2,300

Note: This was a new measure in FY05, therefore some prior year projected and actual data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

Documents microfilmed, indexed and returned to county for public use

Note: Locally maintained documents have been destroyed by water, fire and contamination since the creation of this program. The Land Survey Repository can restore these records, providing security and avoiding economic loss to the citizens of those counties and state.

7c. Provide the number of clients/individuals served, if applicable.

The total number of individuals and organizations provided with geological assistance or information.

	FY2002	FY2003	FY2004	FY2005
Geologic inquiries	5,696	3,681	3,715	3,702
Education presentations	28	23	38	34
Field assistance with geologic problems	22	27	34	42

Number of counties whose records are copied for microfilming and scanning - 114 (as well as the City of St Louis)

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Oil and Gas Remedial Fund (0699)

Note: An estimated appropriation is requested for the Oil and Gas Remedial Fund.

2. CORE DESCRIPTION

Oil and gas have been produced in Missouri since the late 1800s. During the early years of oil and gas development, there were no regulations that mandated that wells no longer in operation be properly plugged. In many cases, the abandoned oil and gas wells were left uncovered or pushed over and buried without being properly closed. The results of yesterday's poor stewardship practices can be seen today in the abandoned oil and gas wells left in disarray. Some of these wells have the potential to impact surface and groundwater resources and have become a threat to human health and well-being by leaking natural gas into neighborhoods that have been built over improperly abandoned gas fields.

Regulation of oil and gas began in the mid 1960s. In an effort to prevent the improper abandonment of oil and gas wells these regulations required that a plugging bond be posted for each well that produces oil or gas. If the producer fails to properly close the wells at the conclusion of operations, the State has the ability to claim the bond and use the funds to properly plug the wells. Money from the forfeited bonds is deposited into the Oil and Gas Remedial Fund. These funds are then used to contract for plugging the wells. Revenues of the fund are also used to handle emergency situations as they arise, such as a leaking gas well. The bond money that is available for plugging wells is not always adequate to cover the cost of plugging the well. When this occurs, it is sometimes more prudent to actively seek a new operator that will assume liability for a well rather than proceed with plugging. This option is only considered in cases where the well in question does not pose a direct threat to surface or groundwater, or is not threatening human health and well being.

PROGRAM DESCRIPTION

Department of Natural Resources

DGLS - Oil & Gas Remedial Fund PSD

Program is found in the following core budget(s): Oil & Gas Remedial Fund

1. What does this program do?

Oil and gas have been produced in Missouri since the late 1800s. During the early years of oil and gas development, there were no regulations that mandated that wells no longer in operation be properly plugged. In many cases, the abandoned oil and gas wells were left uncovered or pushed over and buried without being properly closed. The results of yesterday's poor stewardship practices can be seen today in the abandoned oil and gas wells left in disarray. Some of these wells have the potential to impact surface and groundwater resources and have become a threat to human health and well-being by leaking natural gas into neighborhoods that have been built over improperly abandoned gas fields. Regulation of oil and gas began in the mid 1960s. In an effort to prevent the improper abandonment of oil and gas wells these regulations required that a bond be posted for each well that produces oil or gas. If the producer fails to properly close the wells at the conclusion of operations, the State has the ability to claim the bond and use the funds to properly plug the wells. These funds are then used to contract for plugging the wells. Revenues of the fund are also used to handle emergency situations as they arise, such as a leaking gas well. The bond money that is available for plugging wells is not always adequate to cover the cost of plugging the well. When this occurs, it is sometimes more prudent to actively seek a new operator that will assume liability for a well rather than proceeding with plugging. This option is only considered in cases where the well in question does not pose a direct threat to surface or groundwater, or is not threatening human health and well being.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 259 Oil & Gas Production

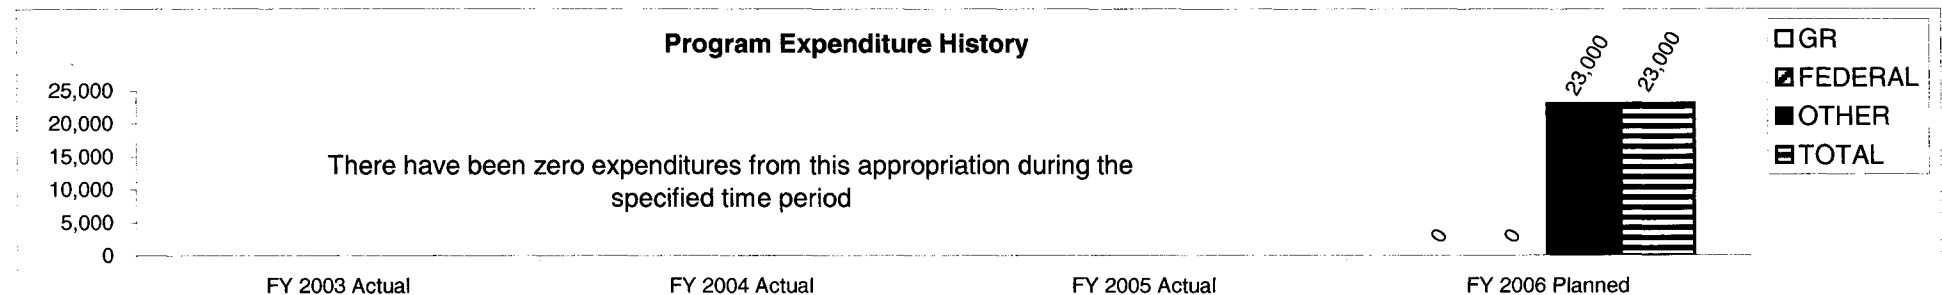

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

PROGRAM DESCRIPTION

Department of Natural Resources

DGLS - Oil & Gas Remedial Fund PSD

Program is found in the following core budget(s): Oil & Gas Remedial Fund

6. What are the sources of the "Other " funds?

Oil & Gas Remedial Fund (0699)

7a. Provide an effectiveness measure.

Percentage of known oil, gas, mineral and test holes in compliance with regulations (new and existing wells)

7b. Provide an efficiency measure.

Total number of oil & gas wells permitted annually in Missouri

Notes: The number of oil and gas wells drilled each year is a function of private sector activity and is related to the overall energy market and the demand for energy resources. The total number of wells in Missouri are very small compared to some states, resulting in great variability in the percentage of wells drilled from year to year. This was a new measure in FY05, therefore some prior year projected data is not available.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

DGLS - Land Survey Corner Restoration and Geodetic Survey Projects PSD

Program is found in the following core budget(s): Land Survey Corner Restoration & Geodetic Survey Projects PSD Core

1. What does this program do?

The United States Public Land Survey System was established in Missouri between 1815 and the 1850's. By the mid-1960s it was estimated that 90% of the General Land Office Corners were destroyed or obliterated due to development, road construction and the age of the survey monuments. The General Assembly established the Land Survey Program to reverse this trend and to restore the United States Public Land Survey System (U.S.P.L.S.S.) in Missouri. Each year contracts between the Land Survey Program, County Surveyors and Private Surveyors are used to re-establish or restore the corners, survey and monument county boundaries and survey and monument state boundaries.

This appropriation allows for the development and establishment of county wide Geographic Reference Systems projects. Each year 3 or 4 counties are densified with highly accurate geodetic control networks. These networks provide for land surveying, Cadastral mapping, aerial photography and other uses. The networks provide for the use of Global Positioning technology supporting the accurate determination of land boundaries, Geographic Information Systems and Land Information Systems.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 60.510.1 through 60.510.7 Powers and duties of department related to land survey

RSMO 60.321 Restoration of USPLSS

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

The department uses its Federal and Other Funds appropriation authority to enter into contracts with county commissions, county surveyors and private sector surveyors to restore corners of the United States Public Land Survey System.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

PROGRAM DESCRIPTION

Department of Natural Resources

DGLS - Land Survey Corner Restoration and Geodetic Survey Projects PSD

Program is found in the following core budget(s): Land Survey Corner Restoration & Geodetic Survey Projects PSD Core

6. What are the sources of the "Other " funds?

State Land Survey Program Fund (0668)

7a. Provide an effectiveness measure.

Number of corners monumented annually by county and private surveyors, as well as department staff.

7b. Provide an efficiency measure.

Land Survey Program cost vs. private cost per corner

Note: The Land Survey Program (LSP) cost represents the average annual cost to restore a corner through county surveyor contracts, county boundary or township corner restoration projects. Private costs represents the average annual cost charged by a private surveyor to re-monument corners.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

2. CORE DESCRIPTION									
The Division of Geology and Land Survey is responsible for general maintenance and repair for two office buildings, a core library building, and an acid lab building on the campus located in Rolla, Missouri. It is necessary to perform routine maintenance and keep these buildings fully operational as a public facility to serve the citizens of Missouri and to safeguard a state asset. Proper maintenance and repair of the buildings is essential to provide a safe, comfortable and efficient environment in which to conduct business. Maintenance of these facilities requires routine upkeep such as light bulb and fixture replacement, parts and filter replacement of HVAC systems, electric wiring upgrades, plumbing repair and plumbing fixture replacement, and a variety of building repairs and replacements.

PROGRAM DESCRIPTION

Department of Natural Resources

DGLS - Operational Maintenance and Repair

Program is found in the following core budget(s): Operational Maintenance & Repair

1. What does this program do?

This fund supports general maintenance and repair for two office buildings, a core library building, and an acid lab building on the campus located in Rolla, Missouri. It is necessary to perform routine maintenance and keep these buildings fully operational as a public facility to serve the citizens of Missouri and to safeguard a state asset. Proper maintenance and repair of the buildings is essential to provide a safe, comfortable and efficient environment in which to conduct business. Maintenance of these facilities requires routine upkeep such as light bulb and fixture replacement, parts and filter replacement of HVAC systems, electric wiring upgrades, plumbing repair and plumbing fixture replacement, and a variety of building repairs and replacements.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

This is an operational decision item. There is no specific statutory or constitutional reference.

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other " funds?

Facilities Maintenance and Reserve Fund (0124)

PROGRAM DESCRIPTION

Department of Natural Resources

DGLS - Operational Maintenance and Repair

Program is found in the following core budget(s): Operational Maintenance & Repair

7a. Provide an effectiveness measure.

Percent of DGLS facilities operating at the level that allows for safe usage and efficient operations

	FY2003		FY2004		FY2005		FY2006	FY2007	FY2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
% of facilities	80%	80%	90%	70%	70%	75%	80%	85%	95%

Note: During FY04 and FY05 the building's HVAC system was replaced with a ground source heat pump system that will be efficient and economical and allow the department to showcase a growing industry that utilizes Missouri's natural resources to provide an affordable energy source.

7b. Provide an efficiency measure.

Preventive maintenance on the heating/air conditioning systems

	FY2003		FY2004		FY2005		FY2006	FY2007	FY2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Frequency of maintenance	Daily	Daily	Daily	Daily	Daily	Daily	Monthly	Quarterly	Quarterly

7c. Provide the number of clients/individuals served, if applicable.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.					Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.				
Other Funds: State Park Earnings Fund (0415); Cost Allocation Fund (0500); Parks Sales Tax Fund (0613); Meramec-Onondaga State Parks Fund (0698); and Babler State Park Fund (0911)									
Note: An "E" is requested for the \$1 Parks Sales Tax E&E appropriation for levee district payments.									
2. CORE DESCRIPTION									
The Division of State Parks manages 83 state parks and historic sites plus the Roger Pryor Pioneer Backcountry. We manage approximately 140,000 acres and an extensive recreation easement agreement on 61,000 acres with the L-A-D Foundation. The total acreage of the state parks and historic sites is less than one half of 1% of the total acres in Missouri. Each park and site contains unique and diverse natural and cultural resources, yet the public demands consistent levels of visitor services, facility maintenance, security, and resource management. The mission of the division is to preserve and interpret the state's most outstanding natural features; to preserve and interpret the state's most outstanding cultural landmarks; and to provide compatible recreational opportunities in these areas.									
3. PROGRAM LISTING (list programs included in this core funding)									
Division of State Parks									

CORE DECISION ITEM

Department of Natural Resources
Division of State Parks
Division of State Parks Core

Budget Unit 78415C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	29,764,792	32,602,490	33,310,490	32,550,222	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	29,764,792	32,602,490	33,310,490	N/A	
Actual Expenditures (All Funds)	26,456,091	29,102,739	28,671,554	N/A	
Unexpended (All Funds)	3,308,701	3,499,751	4,638,936	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	75,451	35,621	13,871	N/A	
Other	3,233,250	3,464,130	4,625,065	N/A	
	(2)	(3)	(4)		

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1)** An "E" is requested for the \$1 Parks Sales Tax E&E appropriation for levee district payments. The "E" is needed since levee district fees can change and new levee districts where state parks or historic sites are located can be created.
- (2)** Fiscal uncertainties and hiring limitations have resulted in lower expenditures.
- (3)** The FY04 appropriation amount includes a transfer of \$2,152,500 from the Equipment Replacement Core to the Division of State Parks Operations Core. In addition, fiscal uncertainties and hiring limitations have resulted in lower expenditures.
- (4)** Fiscal uncertainties and hiring limitations, as well as delayed equipment replacement purchases, have resulted in lower expenditures. The division is recommending personal service and FTE reductions in FY07.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

1. What does this program do?

The mission of the Division of State Parks is to preserve and interpret the state's most outstanding natural features; to preserve and interpret the state's most outstanding cultural landmarks; and to provide compatible recreational opportunities in these areas. The division manages 83 state parks and historic sites plus the Roger Pryor Pioneer Backcountry. These state parks and historic sites are scattered throughout the state, each containing unique and diverse natural and cultural resources. The park system also includes five district offices, and five support programs. Standardization of public services; efficient management of fiscal, personnel and equipment resources; property management of State Park lands and structures; providing information services, publicizing special events and managing a souvenir sales program; and consistent care for natural and cultural resources and recreation facilities require closely coordinated supervision and administration. In addition, the division provides law enforcement services and protection to park visitors, their property and the cultural and natural resources of the division.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 253	State Parks and Historic Preservation
Missouri Constitution, Article IV, Sections 47(a)(b)(c)	Natural Resources - Parks and Soils Sales and Use Tax

3. Are there federal matching requirements? If yes, please explain.

Land and Water Conservation Fund Grant	50% Local
Recreational Trails Program	20% State/Local
Intermodal Surface Transportation Efficiency Act (ISTEA)	20-30% State
Water and Sewer Infrastructure Projects	45% State
Natural Resource Conservation Service-Watkins Mill Dam	35% State
Dept of the Interior/Fish and Wildlife Service	25-65% State
Federal Highway Administration/National Historic Covered Bridge Preservation Program	20% State
National Parks Service/Exhibits at Van Meter State Park	97% State
Dept of Education Teaching American History/Truman Birthplace State Historic Site and Prairie State Park	100% Federal

4. Is this a federally mandated program? If yes, please explain.

The Department administers the Land and Water Conservation Fund (LWCF) on behalf of the National Parks Service and the Recreational Trails Program (RTP) on behalf of the Federal Highway Administration.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other" funds?

State Park Earnings Fund (0415); Cost Allocation Fund (0500); State Facility Maintenance & Operation Fund (0501); Parks Sales Tax Fund (0613); Meramec-Onondaga State Parks Fund (0698); and Babler State Park Fund (0911).

7a. Provide an effectiveness measure.

Percentage of visitors satisfied with facility operation and maintenance

Note: Data collected by calendar year, therefore 2005 data will not be available until February, 2006.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

7b. Provide an efficiency measure.

Percentage of total State of Missouri budget allocated to state parks compared to regional and national averages.

Notes: Data source is the National Association of State Park Directors Annual Information Exchange. FY05 actual data will be available in April, 2006. National and regional figures do not necessarily include historic sites.

Average cost per state park visitor compared to regional and national averages

Notes: Data source is the National Association of State Park Directors Annual Information Exchange. FY05 actual data will be available in April, 2006.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

7c. Provide the number of clients/individuals served, if applicable.

Number of visitors at Missouri State Parks and Historic Sites

	FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Number of State Park System Visitors	18,700,000	17,060,086	17,500,000	17,120,989	17,500,000	17,317,708	17,750,000	18,000,000	18,250,000

7d. Provide a customer satisfaction measure, if available.

Voting Citizen Tax Renewal Approval Rate

Note: The Parks and Soils Sales Tax will be voted on again in 2006 as a result of the passage of SJR1. This joint resolution modifies the constitution, upon voter approval, by resubmitting the parks and soils sales tax to the voters every 10 years, beginning in 2006.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Bruce R. Watkins Cultural Heritage Center

1. What does this program do?

This core decision item allows the department, through a contractual agreement, to assist the Kansas City Board of Parks and Recreation Commissioners with the operation of the Bruce R. Watkins Cultural Heritage Center, which stands in tribute to the legacy of Kansas City's early African American pioneers and embodies the artistic, cultural and social history of the African American experience. The state is able to help provide cultural activities to residents of the Kansas City Metropolitan area.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 253

State Parks and Historic Preservation

Missouri Constitution, Article IV, Sec. 47(a)(b)(c)

Natural Resources-Parks and Soils Sales and Use Tax

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other " funds?

Parks Sales Tax Fund (0613)

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Bruce R. Watkins Cultural Heritage Center

7a. Provide an effectiveness measure.

2. CORE DESCRIPTION

The Division of State Parks receives funds from donors, insurance settlements, court awards, and other sources that are usually directed toward the accomplishment of a specific purpose. Section 253.040 RSMo authorizes the department "to accept gifts, bequests or contributions of money or other real or personal property to be expended for any of the purposes of Sections 253.010 to 253.100 RSMo.; except that any contribution of money to the Department of Natural Resources shall be deposited with the State Treasurer to the credit of the State Park Earnings Fund and expended upon authorization...". This request seeks that authorization from the General Assembly.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-Gifts to Parks

Program is found in the following core budget(s): Gifts to Parks

1. What does this program do?

The Division of State Parks receives funds from donors, insurance settlements, court awards, and other sources that are usually directed toward the accomplishment of a specific purpose. Section 253.040 RSMo authorizes the department "to accept gifts, bequests or contributions of money or other real or personal property to be expended for any of the purposes of Sections 253.010 to 253.100 RSMo.; except that any contribution of money to the Department of Natural Resources shall be deposited with the State Treasurer to the credit of the State Park Earnings Fund and expended upon authorization...". This request seeks that authorization from the General Assembly.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 253 State Parks and Historic Preservation

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

6. What are the sources of the "Other " funds?

State Park Earnings Fund (0415)

PROGRAM DESCRIPTION

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-Concession Default

Program is found in the following core budget(s): Parks Concessions Default

1. What does this program do?

Should a state park concessionaire be unable to complete the period of their contract or other emergency situations arise, such as not being able to award a contract or not having bidders for a contract, the division must operate and manage concession operations such as lodging, park stores, boat rentals, and other visitor services usually provided by contracted concessionaires until a new concessionaire contract can be awarded or the division obtains additional appropriation authority to operate the concession on a permanent basis so that customer service is uninterrupted.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 253 State Parks and Historic Preservation

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: The Division of State Parks has made every effort to ensure that parks with concessionaires complete their contracts and contracts are awarded each time they are bid. Our goal is to lapse the full appropriation each year. There were no expenditures in FY03, FY04 or FY05. FY06 is shown at full appropriation spending due to a known concession default.

6. What are the sources of the "Other " funds?

State Parks Earnings Fund (0415)

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-Concession Default

Program is found in the following core budget(s): Parks Concessions Default

7a. Provide an effectiveness measure.

	FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Dollar amount to operate concessions in default	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$200,000	\$100,000	\$100,000

7b. Provide an efficiency measure.

Number of times the facility manager and business manager met with the concessionaires annually.

Note: this was a new measure in FY05, therefore some prior year projected data is not available

7c. Provide the number of clients/individuals served, if applicable.

The last time this appropriation was used was in FY 2000. The two concession operations in default were Lake Wappapello and Washington State Parks. Visitation to these two parks during that year was 631,424.

7d. Provide a customer satisfaction measure, if available.

Not available

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

2. CORE DESCRIPTION

The Division of State Parks applies for federal funds to further enhance state parks and historic sites. The division identifies and pursues grants that are consistent with strategic priorities such as conservation assessment program grants, battlefield protection programs for historic sites, and Recreational Trails Program grants for state parks. By receiving federal grant awards, the department is able to use alternate funding sources to meet operational and resource needs of the state park system.

3. PROGRAM LISTING (list programs included in this core funding)

State Park Grants

CORE DECISION ITEM

Department of Natural Resources
Division of State Parks
State Park Grants Core

Budget Unit 78492C

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds)	350,000	350,000	350,000	350,000
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	350,000	350,000	350,000	N/A
Actual Expenditures (All Funds)	121,198	102,658	63,332	N/A
Unexpended (All Funds)	228,802	247,342	286,668	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	56,302	96,083	140,462	N/A
Other	172,500	151,259	146,206	N/A
	(1)	(1)	(1)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) This core is utilized for federal grant awards and match (beyond in-kind match), as well as non-federal grants. The division pursues various grants throughout the year and is unable to predict the number of grants that will be available. Sufficient appropriation authority is necessary should grants become available.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-State Park Grants

Program is found in the following core budget(s): State Park Grants

1. What does this program do?

The Division of State Parks applies for federal funds to further enhance state parks and historic sites. The division identifies and pursues grants that are consistent with strategic priorities such as conservation assessment program grants, battlefield protection programs for historic sites, and Recreational Trails Program grants for state parks. By receiving federal grant awards, the department is able to use alternate funding sources to meet operational and resource needs of the state park system.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 253 State Parks and Historic Preservation

3. Are there federal matching requirements? If yes, please explain.

The division applies for various small grants throughout the fiscal year (matching requirements vary by grant). Current grants are as follows:

Recreational Trails Program	20% State
Federal Highway Administration/National Historic	20% State
Covered Bridge Preservation Program	
National Parks Service/Exhibits at Van Meter State Park	97% State
Dept of Education Teaching American History/Truman Birthplace State	100% Federal
Historic Site and Prairie State Park	
Dept of the Interior/Fish and Wildlife Service	25-65% State

4. Is this a federally mandated program? If yes, please explain.

We apply for federal funds throughout the year to further enhance the state park system and provide more recreational opportunities to the general public.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-State Park Grants

Program is found in the following core budget(s): State Park Grants

6. What are the sources of the "Other " funds?

State Park Earnings Fund (0415). When matching funds are required beyond in-kind match, other funds such as State Park Earnings (0415) or Parks Sales Tax (0613) funds would be used.

7a. Provide an effectiveness measure.

Number of enhancements/new opportunities in the state park system as a result of grants received.

Note: this was a new measure in FY05, therefore some prior year projected data is not available

7b. Provide an efficiency measure.

Number of grants received compared to the federal dollar amount of grants spent.

Note: this was a new measure in FY05, therefore some prior year projected data is not available

Note: An "E" is requested for the \$2,324,034 Federal Funds.									
2. CORE DESCRIPTION									
This decision item provides federal matching grants through Land and Water Conservation Funds and Recreational Trails Program funds to develop parks and trails. The Land and Water Conservation Program offers funding for the acquisition and development of public outdoor recreation areas and facilities. The Recreational Trails Program provides funding to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail uses. The department uses this core appropriation to distribute these federal funds.									
3. PROGRAM LISTING (list programs included in this core funding)

Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	1,093,344	782,573	2,828,952	N/A	
Other	0	0	0	N/A	
	(2)	(3)	(4)		

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

- (1) The estimated appropriation authority was requested and approved in the FY2005 budget due to the discontinuation of the reappropriation authority for the outdoor recreation program and is needed to allow the department to encumber, obligate and pay all outstanding commitments, when due, for these multi-year projects.
- (2) Lapse due to payment timing issues for these multi-year projects. The FY03 unexpended amount (\$1,093,344) was reappropriated into FY2004.
- (3) FY04 expenditures do not reflect an additional \$662,161 expended from reappropriated funds.
- (4) We requested an "E" increase of \$2,614,343 in FY2005 so that all outstanding obligations (multi-year projects) could be encumbered in the SAM II financial system.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Recreation Assistance Grants

1. What does this program do?

This decision item provides federal matching grants through Land and Water Conservation funds and Recreational Trails Program funds to develop parks and trails. The Land and Water Conservation Program offers funding for the acquisition and development of public outdoor recreation areas and facilities. The Recreational Trails Program provides funding to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail uses. The department uses this core appropriation to distribute these federal funds.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 258 Outdoor Recreation

3. Are there federal matching requirements? If yes, please explain.

Land and Water Conservation Fund Grant	50% Local
Recreational Trails Program	20% Local

4. Is this a federally mandated program? If yes, please explain.

The Department administers the Land and Water Conservation Fund (LWCF) on behalf of the National Parks Service and the Recreational Trails Program (RTP) on behalf of the Federal Highway Administration.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Recreation Assistance Grants

6. What are the sources of the "Other " funds?

Not applicable

7a. Provide an effectiveness measure.

Number of grants awarded for Land & Water Conservation projects and for Recreational Trails projects

*RTP grant will be awarded in October 2005.

7b. Provide an efficiency measure.

Percentage of total project costs LWCF funded by local match

Percentage of total project costs RTP funded by local match

*RTP grant will be awarded in October 2005.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Recreation Assistance Grants

7c. Provide the number of clients/individuals served, if applicable.

In FY04, LWCF grant projects served an estimated 493,177 people in rural areas and 1,216,947 in urban areas.
RTP data is not available until October 2005.

7d. Provide a customer satisfaction measure, if available.

Other Funds: Historic Preservation Revolving Fund (0430)									
Note: The Governor's recommendation includes General Revenue core reductions/transfers of \$265,033 and 7.10 FTE. It should be noted the Governor's recommendations also includes a new decision item - a recommended fund shift to Other Funds of \$265,033 and 7.10 FTE.									
2. CORE DESCRIPTION									
The State Historic Preservation Office (SHPO) works with citizens and groups throughout the state to identify, evaluate and protect Missouri's diverse range of historic, architectural and archaeological resources. The SHPO coordinates nominations to the National Register of Historic Places, is responsible for Section 106 reviews, ensures that rehabilitation projects qualify for state and federal income tax credits, and responds to archaeological issues such as unmarked human burials.									
3. PROGRAM LISTING (list programs included in this core funding)									
State Historic Preservation Office									

CORE DECISION ITEM

Department of Natural Resources	Budget Unit	78420C
Division of State Parks		
State Historic Preservation Office Core		

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.
Appropriation (All Funds)	N/A	N/A	N/A	N/A
Less Reverted (All Funds)	N/A	N/A	N/A	N/A
Budget Authority (All Funds)	N/A	N/A	N/A	N/A
Actual Expenditures (All Funds)	N/A	N/A	N/A	N/A
Unexpended (All Funds)	N/A	N/A	N/A	N/A
Unexpended, by Fund:				
General Revenue	N/A	N/A	N/A	N/A
Federal	N/A	N/A	N/A	N/A
Other	N/A	N/A	N/A	N/A
	(1)	(1)	(1)	(1)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) As a result of the department's reorganization efforts, the State Historic Preservation Office, which was previously budgeted within the Outreach and Assistance Center, now reports to the Division of State Parks and will be budgeted separately. Prior year actual and current year data is included in the Outreach & Assistance Center Core, and therefore is not shown here.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): State Historic Preservation Office

1. What does this program do?

The State Historic Preservation Office (SHPO), in partnership with the U.S. Department of the Interior's National Park Service and local governments, is carrying out the mandates of the National Historic Preservation Act in Missouri. The SHPO works with citizens and groups throughout the state to identify, evaluate and protect Missouri's diverse range of historic, architectural and archaeological resources. The SHPO funds and coordinates surveys to identify historic, architectural and archaeological resources throughout the state. The most significant properties identified in the surveys are nominated to the National Register of Historic Places, the federal list of properties deemed worthy of recognition and protection. This office is responsible for Section 106 reviews of federally funded or assisted projects to ensure compliance with federal preservation legislation. The office works with property owners, architects and developers to ensure that rehabilitation projects qualify for rehabilitation tax credits. Currently, both state and federal income tax credits are available for the qualified rehabilitation of certain historic properties. SHPO staff are responsible for responding to cases involving the discovery of unmarked human burials. SHPO also provides educational services to the public to promote awareness and understanding of historic preservation.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

16 USC 470f - Section 106	National Historic Preservation Act
RSMo 194.400-194.410	Unmarked Human Burial Sites
RSMo 253.022	Department to administer the National Historic Preservation Act
RSMo 253.408-253.412	State Historic Preservation Act
RSMo 253.400-253.407	Historic Preservation Revolving Fund Act
RSMo 253.415	Local Historic Preservation Act
RSMo 253.420	Historic Shipwrecks, Salvage or Excavation Regulations
RSMo 253.545-253.561	Historic Structures Rehabilitation Tax Credit

3. Are there federal matching requirements? If yes, please explain.

Historic Preservation Fund Grant	40% State/Local
----------------------------------	-----------------

4. Is this a federally mandated program? If yes, please explain.

SHPO administers the National Historic Preservation Act of 1966, which specifies requirements for state historic preservation offices.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): State Historic Preservation Office

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

FY06 Planned expenditures are shown at full appropriation spending.

6. What are the sources of the "Other " funds?

Not applicable. See note above.

7a. Provide an effectiveness measure.

Note: Individual resources includes the cumulative total of all historic properties identified in listings and placed on the register such as buildings, sites, structures and objects identified in individual, group and district nominations.

PROGRAM DESCRIPTION

NEW DECISION ITEM
RANK: 999 **OF** 999

Department of Natural Resources	Budget Unit <u>78420C</u>
Division of State Parks	
Continuation of Historic Preservation Office Activities <u>1780006</u>	

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

This decision item requests a fund shift from the General Revenue Fund to the Historic Preservation Revolving Fund and the Economic Development Advancement Fund for the continuation of activities in the State Historic Preservation Office. The State Historic Preservation Office (SHPO) works with citizens and groups throughout the state to identify, evaluate, and protect Missouri's diverse range of historic, architectural and archaeological resources. The SHPO coordinates nominations to the National Register of Historic Places, is responsible for Section 106 reviews, ensures that rehabilitation projects qualify for state and federal income tax credits, and responds to archaeological issues such as unmarked human burials.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

Currently the State Historic Preservation Office work is partially funded from the General Revenue Fund. This request will retain the same level of effort in the State Historic Preservation Office work. The number of FTE requested reflects the FTE currently being funded from General Revenue to perform these work duties.

5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an effectiveness measure.

This decision item represents a fund shift from General Revenue funds to the Historic Preservation Revolving Fund and the Economic Development Advancement Fund; this does not represent additional funding. The activities funded through these appropriations are reported in the State Historic Preservation Office Core.

6b. Provide an efficiency measure.

See 6a.

6c. Provide the number of clients/individuals served, if applicable.

See 6a.

6d. Provide a customer satisfaction measure, if available.

See 6a.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

This decision item represents a fund shift from General Revenue funds to the Historic Preservation Revolving Fund and the Economic Development Advancement Fund; this does not represent additional funding. The activities funded through these appropriations are reported in the State Historic Preservation Office Core.

Other Funds: Not applicable									
2. CORE DESCRIPTION									
Senate Bill 724, passed in 1998, provided for the transfer of revenues from the state income tax generated from nonresident professional athletes and entertainers to the Historic Preservation Revolving Fund. Section 143.183 RSMo., provides that beginning in Fiscal Year 2000 and each subsequent fiscal year for a period of nine years, ten percent of the annual estimate of taxes generated from the nonresident entertainer and professional athletic team income tax shall be allocated annually to the Historic Preservation Revolving Fund.									
With this transfer, additional funding will be available for existing historic preservation efforts including financial assistance for endangered historic resources by providing up-front capital needed for acquisition or critical stabilization. The Fund also temporarily acquires properties in order to protect them until suitable owners can be found. The Historic Preservation Revolving Loan funds are also used for revolving loans to certified local governments; and program operations including property marketing, surveys, appraisals, and real estate commissions.									
3. PROGRAM LISTING (list programs included in this core funding)									
Not applicable. This core decision item is a transfer of funds to the Historic Preservation Revolving Fund. This transfer provides funding for appropriations/activities included in the State Historic Preservation Office Core.

Department of Natural Resources
Division of State Parks
Entertainer Tax Transfer to the Historic Preservation Revolving Fund 17800003
Budget Unit 78485C

6. PERFORMANCE MEASURES (If new decision item has an associated core, separately identify projected performance with & without additional funding.)

6a. Provide an effectiveness measure.

6b. Provide an efficiency measure.

6c. Provide the number of clients/individuals served, if applicable.

Provides financial assistance for endangered historic resources by providing up-front capital needed for acquisition or critical stabilization.

6d. Provide a customer satisfaction measure, if available.

None currently available. In future years, recipients will be surveyed.

7. STRATEGIES TO ACHIEVE THE PERFORMANCE MEASUREMENT TARGETS:

Develop programs and partnerships that promote awareness of the Historic Preservation Revolving Fund to build the funds' effectiveness as a positive preservation tool.

Develop partnerships with federal and state agencies that promote the protection and preservation of historic properties through joint projects and cross-training opportunities.

Advocate the development of local preservation programs. Encourage and provide guidance for locally initiated surveys and nominations.

2. CORE DESCRIPTION

This appropriation provides authority to pass federal funds through for historic preservation grants and contracts. Predominately, these grants are part of the department's grant from the federal Historic Preservation Fund and are used to support preservation activities in the State of Missouri. Occasionally federal funds are available for other projects. The National Historic Preservation Act of 1966 (NHPA) established a partnership between the federal government and the states to help identify and protect historic and cultural resources. In 1980, NHPA was amended to extend the preservation partnership to local governments. The amendments require that the states "pass-through" 10% of their federal allocation to help Certified Local Governments (CLG) carry out preservation activities in their communities. Pass through grants to local governments can be used for identification of historic resources and survey of those resources, National Register nomination, planning activities, and educational activities.

Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	114,448	308,246	417,267	N/A
Other	0	0	0	N/A
	(1)	(1)	(1)	

Actual Expenditures (All Funds)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

(1) These are multi-year commitments and expenditures generally do not occur in the year the project is awarded. Without an estimated appropriation, it is necessary to maintain the full appropriation authority to allow projects to be encumbered and to ensure that appropriation authority is available when the projects are completed. This also allows us to pursue discretionary or one-time grants that may become available. Additionally, beginning in FY04, pass-through grants were limited to Certified Local Governments, thus the reduction from FY03 to FY05.

Language Change: We are requesting the reference to the Outreach and Assistance Center be removed. The house bill will be written "To the Department of Natural Resources, For historic preservation grants and contracts, From Federal Funds"

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-Historic Preservation Grants

Program is found in the following core budget(s): Historic Preservation Grants

1. What does this program do?

The State Historic Preservation Office is responsible for encouraging and supporting statewide activities leading to the identification, evaluation, and protection of Missouri's prehistoric, historic, and cultural resources. To carry out these activities throughout the state and to promote public interest and involvement in the preservation of Missouri's heritage, 10% of the annual federal Historic Preservation Fund allocation is allotted for grants and contracts to Certified Local Governments. Occasionally other funds may be available for local governments, organizations and individuals for other projects. These grants and contracts provide a critical source of funds for historic preservation activities at the local and regional level. The National Historic Preservation Act of 1966 (NHPA), as amended, established a partnership between the federal government, states, local governments and Certified Local Governments to help identify and protect historic resources. The federal program requires that states "pass-through" 10% of their federal allocation to help participating local governments carry out preservation activities in their communities. Pass through grants to local governments can be used for historic resource identification and survey activities, National Register nomination, planning activities, and educational activities.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

16 USC 470	National Historic Preservation Act
RSMo 253.022	Department to Administer the National Historic Preservation Act
RSMo 253.408-253.412	State Historic Preservation Act
RSMo 253.415	Local Historic Preservation Act
RSMo 253.420	Historic Shipwrecks, Salvage or Excavation Regulations

3. Are there federal matching requirements? If yes, please explain.

Historic Preservation Fund Grant 40% State/Local

4. Is this a federally mandated program? If yes, please explain.

The State Historic Preservation Office administers the National Historic Preservation Act of 1966.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY06 expenditures are shown at full appropriation spending.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-Historic Preservation Grants

Program is found in the following core budget(s): Historic Preservation Grants

6. What are the sources of the "Other " funds?

Not applicable

7a. Provide an effectiveness measure.

Historic Preservation Fund Grants awarded. Number of applications received versus number of projects funded

Note: Beginning in FY 04, pass-through grants were limited to Certified Local Governments, thus the reduction from FY03 to FY04. This was a new measure in FY05, therefore some prior year projected data not available.

Historic Preservation Fund Grants awarded. Dollar amount of projects requested versus dollar amount of projects funded

Note: Beginning in FY 04, pass-through grants were limited to Certified Local Governments, thus the reduction from FY03 to FY04. This was a new measure in FY05, therefore some prior year projected data not available.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP-Historic Preservation Grants

Program is found in the following core budget(s): Historic Preservation Grants

7b. Provide an efficiency measure.

Program	FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Grant funded National Register listings	N/A	609	N/A	110	150	105	8	150	125
Grant funded properties surveyed	N/A	68	N/A	70	400	130	250	200	225

Note: This was a new measure therefore some prior year projected data not available.

Due to the volatility of the specific projects that are awarded, projected data can vary greatly from year to year. For example, one funded National Register nomination or property survey may list 5 resources, while another could list 1,000.

7c. Provide the number of clients/individuals served, if applicable.

	FY 2003		FY 2004		FY 2005		FY 2006	FY 2007	FY 2008
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Number of Communities	N/A	6	N/A	6	6	7	6	8	8
Persons reached through training and outreach activities	N/A	150	N/A	200	225	520	250	300	600

Note: This was a new measure therefore some prior year projected data not available.

7d. Provide a customer satisfaction measure, if available.

Customer Satisfaction Survey: Results indicate a 100% satisfaction rating for grant assistance received.

This page was intentionally left blank.

Other Funds: Not applicable									
Note: Because the amount of additional federal funding that the department may receive for Homeland Security activities is unknown, we are requesting estimated appropriation authority so that we can expediently expend federal funds received for Homeland Security Initiatives.									
2. CORE DESCRIPTION									
Attacks against our homeland have occurred and more are possible. This appropriation allows the department to receive federal funds for homeland security and protection. In the past, the department has received federal funds directed toward community water supplies and monitoring air quality. The department needs this appropriation to receive and expend federal dollars directed at environmental security threats.									
3. PROGRAM LISTING (list programs included in this core funding)									
Homeland Security									

CORE DECISION ITEM

Department of Natural Resources	Budget Unit <u>79615C</u>
Agency Wide Operations	
Homeland Security-Federal Grants Core	

4. FINANCIAL HISTORY

	FY 2003 Actual	FY 2004 Actual	FY 2005 Actual	FY 2006 Current Yr.	
Appropriation (All Funds) (1)	N/A	837,204	924,436	410,436	E
Less Reverted (All Funds)	N/A	0	0	N/A	
Budget Authority (All Funds)	N/A	837,204	924,436	N/A	
Actual Expenditures (All Funds)	N/A	375,295	430,195	N/A	
Unexpended (All Funds)	N/A	461,909	494,241	N/A	
Unexpended, by Fund:					
General Revenue	N/A	0	0	N/A	
Federal	N/A	461,909	494,241	N/A	
Other	N/A	0	0	N/A	

(2)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTE:

- (1) Because the amount of additional federal funding that the department may receive for Homeland Security activities is unknown, we are requesting estimated appropriation authority so that we can expediently expend federal funds received for Homeland Security initiatives.
- (2) The department received homeland security funding beginning in FY04.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Homeland Security-Federal Grants

Program is found in the following core budget(s): Homeland Security-Federal Grants

1. What does this program do?

The department's Water Protection Program oversees efforts to improve security at public water supply systems. These federal funds are used to ensure the quality of drinking water utility security enhancements, develop and oversee emergency response and recovery plans, and provide technical assistance, training and education to Missouri's public water supply systems. The department has also received federal Homeland Security funds for the installation and operation of a network of ambient air monitors.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.130	Emergencies (Drinking Water Supplies) - actions to be taken - penalties
RSMo 643.050	Power and duties of commission - rules, procedure
Public Law (107-117)	Recovery from and Response to Terrorist Attacks on the United States Act, 2002
H.R. 3338	Supplemental appropriation to support counter-terrorism coordination activities by states in protecting the country's public water systems continuation

3. Are there federal matching requirements? If yes, please explain.

Counter-Terrorism Coordination Grant	100% Federal (EPA)
Special Purpose Monitoring (SPM) of Air Particle and/or Aerosol Grant	100% Federal (EPA)

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: The department received homeland security funding beginning in FY04.

Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. Planned FY06 is shown as full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Homeland Security-Federal Grants

Program is found in the following core budget(s): Homeland Security-Federal Grants

6. What are the sources of the "Other " funds?

Not applicable

7a. Provide an effectiveness measure.

Incidents of possible breaches of security (tampering events) that have been investigated at public water supply systems

Note: Possible breaches of security, or tampering events, are routinely investigated by local law enforcement. These breaches are required to be reported to the department and the department submits these reports to EPA. If needed, the public water supply system will call in the department (either central office or a regional office) to provide assistance with sampling or to provide equipment that will enable the systems to conduct on-site analyses of their water supplies. This was a new measure in FY05, therefore some prior year projected data is not available.

7b. Provide an efficiency measure.

Average daily delivery time of environmental samples, FY04-FY08

Notes: This was a new measure in FY05, therefore some prior year projected data is not available. STAT Courier conveys same day courier service for the Special Purpose Monitoring of environmental samples. This courier service is required 365 days a year including weekends and holidays. The environmental samples consist of particulate matter on filters collected from ambient air. The contract with STAT Courier states that the samples shall be picked up at the St Louis County Health Laboratory by 9:00 am and must be delivered by 12:00 pm the same day to the State of Missouri Health Laboratory in Jefferson City. The overall average delivery time is 2 hours and 24 minutes.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Homeland Security-Federal Grants

Program is found in the following core budget(s): Homeland Security-Federal Grants

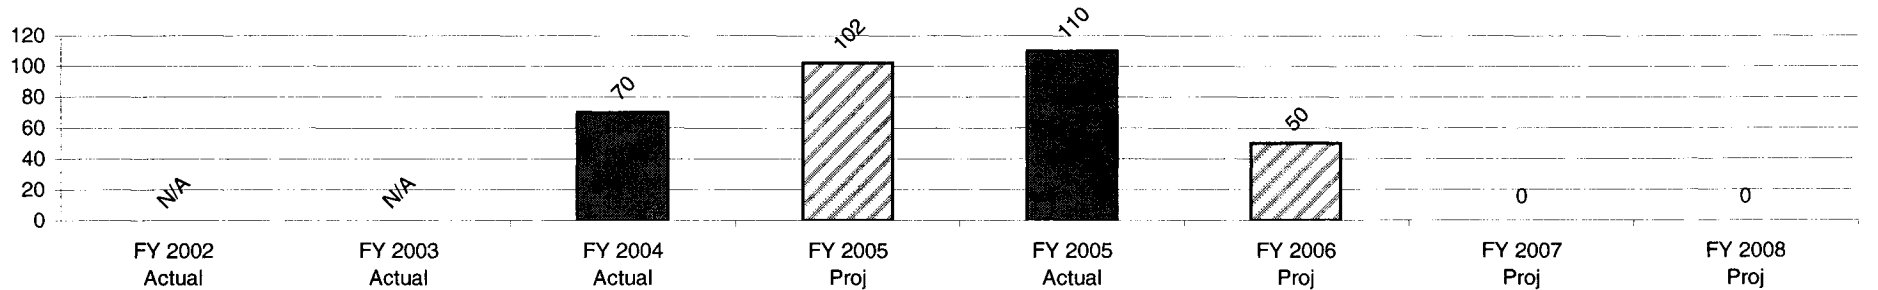

FY05 Average Daily Delivery Time of Environmental Samples

7c. Provide the number of clients/individuals served, if applicable.

Number of public water systems receiving model emergency operation plans to enable the systems to complete their local emergency operations plans

Model Emergency Operations Plans Distributed

Notes: This was a new measure in FY05, therefore some prior year projected and actual data is not available. One-time counter-terrorism grant funds for this activity are expected to be fully expended during FY06. However grant funds will continue to be available for staffing and other activities.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Homeland Security-Federal Grants

Program is found in the following core budget(s): Homeland Security-Federal Grants

This was a new measure in FY05, therefore some prior year projected data is not available. One-time counter-terrorism grant funds for this activity are expected to be fully expended during FY07. On-going federal homeland security grants are expected to continue, however at a reduced level for this activity.

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Minority Scholarships

Program is found in the following core budget(s): Minority Scholarships

1. What does this program do?

The Minority and Underrepresented Environmental Literacy Program was established by Senate Bill 805 of the 88th General Assembly to provide opportunities for minority and underrepresented students to pursue careers in environmentally related courses of study. The mission of the Environmental Educational Scholarship Program is to: create opportunities for undergraduate and graduate students to explore areas of environmental science courses of study; provide scholarship funds for students contingent upon academic status and performance; create a pool of applicants that reflect the cultural diversity of Missouri; and encourage support from all areas of society.

This PSD appropriation is used to provide scholarships to students.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.240

Minority & Underrepresented Environmental Literacy Program and Recruitment & Retention Scholarship Fund

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. FY06 expenditures are shown at full appropriation spending from the General Revenue Fund. The Recruitment and Retention Scholarship Fund is not utilized at this time due to potential conflict of interest issues.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Minority Scholarships

Program is found in the following core budget(s): Minority Scholarships

6. What are the sources of the "Other " funds?

Recruitment and Retention Scholarship Fund (0832)

7a. Provide an effectiveness measure.

Percentage of minority and female representation at the department

7b. Provide an efficiency measure.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Minority Scholarships

Program is found in the following core budget(s): Minority Scholarships

7c. Provide the number of clients/individuals served, if applicable.

7d. Provide a customer satisfaction measure, if available.

None available

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

2. CORE DESCRIPTION

Senate Bill 1155 passed during the 92nd General Assembly. Section 100.255 (11) identifies "Jobs Now projects." The essence of jobs now projects is to award an "entity" for cost saving innovations. The primary focus of jobs now projects are "the purchase, construction, extension, and improvement of real estate, plants, buildings, structures, or facilities used primarily as infrastructure facilities or public facilities. When any entity (including DNR or a DNR employee) provides a certified design or operation plan which is demonstrably less than the usual and customary average industry determination of cost then the entity or company proving such service may receive payment in an amount equal to the usual and customary fee for such project plus additional compensation equal to two times the percentage by which the cost is less than the usual and customary average industrial determination of cost. In addition, the entity would receive compensation equal to twenty-five percent of the amount of any annual operational costs which are lower than the customary average industry determination of cost for a period of time of one-fourth the design lifetime or five years whichever is less.

Possible applications include the department's efforts in conjunction with communities or private consultants involving the design of a wastewater treatment facility. Working together with the community, the private company, or an individual, an employee who develops an innovative design that will result in savings to the community may be eligible to receive a monetary award. Individuals within the community or the private entity may also be eligible. Designing more efficient state park facilities is another example; savings recognized would benefit the entire state park system.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Jobs Now Projects

Program is found in the following core budget(s): Jobs Now Projects

1. What does this program do?

Senate Bill 1155 passed during the 92nd General Assembly. Section 100.255 (11) identifies "Jobs Now projects." The essence of jobs now projects is to award an "entity" for cost saving innovations. The primary focus of jobs now projects are "the purchase, construction, extension, and improvement of real estate, plants, buildings, structures, or facilities used primarily as infrastructure facilities or public facilities. When any entity (including DNR or a DNR employee) provides a certified design or operation plan which is demonstrably less than the usual and customary average industry determination of cost then the entity or company proving such service may receive payment in an amount equal to the usual and customary fee for such project plus additional compensation equal to two times the percentage by which the cost is less than the usual and customary average industrial determination of cost. In addition, the entity would receive compensation equal to twenty-five percent of the amount of any annual operational costs which are lower than the customary average industry determination of cost for a period of time of one-fourth the design lifetime or five years whichever is less.

Possible applications include the department's efforts in conjunction with communities or private consultants involving the design of a wastewater treatment facility. Working together with the community, the private company, or an individual, an employee who develops an innovative design that will result in savings to the community may be eligible to receive a monetary award. Individuals within the community or the private entity may also be eligible. Designing more efficient state park facilities is another example; savings recognized would benefit the entire state park system.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 100.255 Jobs Now Projects

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Jobs Now Projects

Program is found in the following core budget(s): Jobs Now Projects

6. What are the sources of the "Other " funds?

Not applicable.

7a. Provide an effectiveness measure.

The program is currently under development. Therefore, there is no experience or basis for determining measures of effectiveness. However, the goal of the program is to recognize and award effectiveness. It should be noted the department spent approximately \$137 million related to public drinking water and wastewater infrastructure activities during FY05. Recommendations to reduce the construction and operating cost for these communities saves them money.

7b. Provide an efficiency measure.

The program is currently under development. Therefore, there is no experience or basis for determining measures of efficiency.

7c. Provide the number of clients/individuals served, if applicable.

The program is currently under development. Therefore, there is no experience or basis for determining the number of clients served. It should be noted that during FY05, approximately 40 communities utilized the department's water and wastewater infrastructure loans and grants programs. In addition, the state park system includes over 83 state park and historic sites with many public buildings (cabins, showerhouses, etc).

7d. Provide a customer satisfaction measure, if available.

None available.

2. CORE DESCRIPTION									
The department bills the programs for internal services such as vehicle replacements, interdivisional agreements, and conferences/training; and bills other governmental agencies or members of the general public for external services such as publication/data sales, the Environmental Management Institute (EMI), environmental education, and environmental services. This appropriation gives the department the ability to respond to both internal and external customers. Loss of this appropriation would result in a slower, more cumbersome and therefore, more costly payment method and, in some cases, the inability to respond to increasing demands by our internal and external customers.									
3. PROGRAM LISTING (list programs included in this core funding)

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Natural Resources Revolving

Program is found in the following core budget(s): Natural Resources Revolving Fund

1. What does this program do?

The department bills the programs for internal services such as vehicle replacements, interdivisional agreements, and conferences/training; and bills other governmental agencies or members of the general public for external services such as publication/data sales, the Environmental Management Institute (EMI), environmental education, and environmental services. This appropriation gives the department the ability to respond to both internal and external customers.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 60.595 Natural Resources Revolving Services Fund

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. Planned FY06 is shown as full appropriation.

6. What are the sources of the "Other " funds?

DNR Revolving Services Fund (0425)

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Natural Resources Revolving

Program is found in the following core budget(s): Natural Resources Revolving Fund

7a. Provide an effectiveness measure.

Operating expenditures from fund

7b. Provide an efficiency measure.

The DNR Revolving Services Fund allows the department to receive monies from the delivery of services and the sale or resale of maps, publications, and documents. These funds are then used to purchase goods or services, publish maps and publications, and pay for shipping charges, laboratory services, core library fees, workshops, conferences, and interdivisional agreements. This appropriation gives the department the ability to respond to both internal and external customers. Not having this appropriation would result in a slower, more cumbersome and therefore, more costly payment method and, in some cases, the inability to respond to increasing demands by our internal and external customers.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Sales Tax Reimbursement to GR

Program is found in the following core budget(s): Sales Tax Reimbursement to GR

1. What does this program do?

The department collects sales tax on the following items. In the Division of State Parks, sales tax is collected on souvenirs, camping fees, wood sales, gift shop sales, cave tours, historic site tours, ATV usage permits, ATV accessories, vending machine sales, swimming pool fees, pay phone receipts (if the department owns or rents the pay phone from the phone company), rentals of shelter houses, and rentals of cabins and other guest quarters, etc. In addition, the Division of Geology and Land Survey collects sales tax on maps and publications sold to the general public. By having this appropriation, the department is able to promptly and efficiently transfer state tax revenue to the General Revenue Fund.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 144.020.1 Tax imposed upon all sellers
 RSMo 144.010.1(11) Defines seller as a person
 RSMo 144.010.1(6) Defines person

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. Planned FY06 is shown as full appropriation.

6. What are the sources of the "Other " funds?

State Parks Earnings Fund (0415); DNR Revolving Services Fund (0425)

2. CORE DESCRIPTION

Dedicated funds within the department share in the cost of administering the programs in the department. The cost share proposal uses the department's indirect cost rate as a method of allocating administrative costs to dedicated funding sources within the Department of Natural Resources. The indirect cost rate used is an established rate approved by our federal cognizant agency, the Department of Interior; and provides a standard methodology that can be used consistently throughout the department. Each dedicated fund's share is computed based upon its percentage of personal services, fringe and expense and equipment appropriations.

CORE DECISION ITEM

Other Funds: Petroleum Storage Tank Insurance Fund (0585)

2. THIS REQUEST CAN BE CATEGORIZED AS:

<input type="checkbox"/> New Legislation	<input type="checkbox"/> New Program	<input type="checkbox"/> Supplemental
<input type="checkbox"/> Federal Mandate	<input type="checkbox"/> Program Expansion	<input checked="" type="checkbox"/> Cost to Continue
<input type="checkbox"/> GR Pick-Up	<input type="checkbox"/> Space Request	<input type="checkbox"/> Equipment Replacement
<input type="checkbox"/> Pay Plan	<input type="checkbox"/> Other: _____	

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Dedicated funds within the department must share in the cost of administering the programs in the department. The cost share proposal uses the department's indirect cost rate as a method of allocating administrative costs to dedicated funding sources within the Department of Natural Resources. The indirect cost rate used is an established rate approved by our federal cognizant agency, the Department of Interior; and provides a standard methodology that can be used consistently throughout the department. As the result of changes that occurred in the FY06 budget with the Petroleum Storage Tank Insurance Fund (PSTIF), this fund was exempted from the standard cost allocation methodology. The PSTIF needs to share in the cost of department administration.

NEW DECISION ITEM
RANK: 009 OF 009

Department of Natural Resources	Budget Unit	79685C
Agency Wide Operations		
Cost Allocation Fund Transfer	1780005	

4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

Each dedicated fund's share is computed based upon its percentage of personal services and expense and equipment appropriations. Using this computation, the PSTIF share of costs is \$165,527.

5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

Other Funds: Missouri Air Emission Reduction Fund (0267); State Parks Earnings Fund (0415); DNR Revolving Services Fund (0425); Historic Preservation Revolving Fund (0430); Cost Allocation Fund (0500); Natural Resources Protection Fund-Water Pollution Permit Fees (0568); Solid Waste Management Fund-Scrap Tire (0569); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Natural Resources Protection Fund-Asbestos (0584); Underground Storage Tank Regulation Program (0586); Natural Resources Protection Fund-Air Pollution Permit (0594); Water and Wastewater Loan Revolving Fund (0602); Parks Sales Tax Fund (0613); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Groundwater Protection Fund (0660); Energy Set-Aside Program Fund (0667); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Safe Drinking Water Fund (0679); Coal Mined Land Reclamation Fund (0684); Oil and Gas Remedial Fund (0699); Biodiesel Fuel Revolving Fund (0730); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755); Confederate Memorial Park Fund (0812); Missouri Alternative Fuel Vehicle Loan Fund (0886); Drycleaner Environmental Response Trust Fund (0898); Mined Land Reclamation Fund (0906); Babler State Park Fund (0911)

Note: An estimated appropriation is requested for all funds.

2. CORE DESCRIPTION

The department deposits revenue it receives as soon as possible, as a cash management practice. Since the department collects over 40 different revenue streams, there are occasions when revenue payments received by the department need to be refunded. This appropriation provides the means to refund these revenues back to the entity that made the payment.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Refund Accounts

Program is found in the following core budget(s): Refund Accounts

1. What does this program do?

The department needs appropriation authority to promptly return funding to citizens and other organizations. Since the department collects many fees, there are occasions when fees or other payments received by the department need to be refunded.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

There is no specific federal or state statutory or constitutional basis for this decision item.

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. Planned FY06 is shown as full appropriation.

6. What are the sources of the "Other" funds?

Other Funds: Missouri Air Emission Reduction Fund (0267); State Parks Earnings Fund (0415); DNR Revolving Services Fund (0425); Historic Preservation Revolving Fund (0430); Cost Allocation Fund (0500); Natural Resources Protection Fund-Water Pollution Permit Fees (0568); Solid Waste Management Fund-Scrap Tire (0569); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Natural Resources Protection Fund-Asbestos (0584); Underground Storage Tank Regulation Program (0586); Natural Resources Protection Fund-Air Pollution Permit (0594); Water and Wastewater Loan Revolving Fund (0602); Parks Sales Tax Fund (0613); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Groundwater Protection Fund (0660); Energy Set-Aside Program Fund (0667); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Safe Drinking Water Fund (0679); Coal Mined Land Reclamation Fund (0684); Oil and Gas Remedial Fund (0699); Biodiesel Fuel Revolving Fund (0730); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755); Confederate Memorial Park Fund (0812); Missouri Alternative Fuel Vehicle Loan Fund (0886); Drycleaner Environmental Response Trust Fund (0898); Mined Land Reclamation Fund (0906); Babler State Park Fund (0911)

PROGRAM DESCRIPTION

Department of Natural Resources
AWO - Refund Accounts
Program is found in the following core budget(s): Refund Accounts

7a. Provide an effectiveness measure.

7b. Provide an efficiency measure.

The department achieves efficiency through the use of estimated appropriations to promptly process refunds to citizens and other organizations.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

This page was intentionally left blank.

PROGRAM DESCRIPTION

Department Natural Resources

Environmental Improvement and Energy Resources Authority

Program is found in the following core budget(s): Environmental Improvement and Energy Resources Authority

1. What does this program do?

The Environmental Improvement and Energy Resources Authority (EIERA) is a quasi-governmental agency that serves as the financing arm for the department. EIERA's primary mandate is to provide financial assistance for energy and environmental projects and protect the environment. EIERA also conducts research, supports energy efficiency and energy alternatives and promotes economic development.

In cooperation with the Missouri Clean Water Commission and the U.S. Environmental Protection Agency (EPA) and other state agencies, EIERA helped establish the Missouri State Revolving Fund (SRF). The SRF provides loan monies to communities and districts for construction of wastewater and drinking water projects. In cooperation with the department's Energy Center, the Missouri Energy Efficiency Leveraged Loan Program was developed to provide funds to city and county governments and public school districts for energy efficiency improvements in facilities or buildings. EIERA also coordinates recycling market development to expand and support recycling and waste recovery through the Missouri Market Development Program and issues Private Activity Bonds for pollution prevention projects that qualify under the US Tax Code.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Safe Drinking Water Act (1996)

US Tax Code

RSMo 260.005-260.125

RSMo 640.100-640.140

RSMo 640.651-640.686

RSMo 644

RSMo 260.335

EIERA authorizing statutes

Missouri Drinking Water Act

Energy Loan Program

Missouri Clean Water Law

Solid Waste Management/Market Development

3. Are there federal matching requirements? If yes, please explain.

The Clean Water State Revolving Fund Capitalization grants and Drinking Water Capacity Development grants require a 20% match. Traditionally match has been funded through the sale of State Water Pollution Bonds or State General Revenue. During FY04, EIERA began supplying the match through the sale of its bonds for the Drinking Water Program. The first Clean Water Program bond issue of FY05 included state match. This relieves the state of the need to use state funds to pay debt service on state match bonds.

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

PROGRAM DESCRIPTION

Department Natural Resources

Environmental Improvement and Energy Resources Authority

Program is found in the following core budget(s): Environmental Improvement and Energy Resources Authority

6. What are the sources of the "Other " funds?

State Environmental Improvement Authority Fund (0654)

7a. Provide an effectiveness measure.

Number of Entities Served by Bond Sales

Note: Projections are very difficult to make as bond financing occurs as projects are ready to proceed. Many variables, such as business climate and interest rates can impact when a company or community will come to the Authority for financing.

Funding Recipient Estimates of Tons of Material Diverted from Landfills as a Result of Missouri Market Development Program Project Funding

PROGRAM DESCRIPTION

Department Natural Resources

Environmental Improvement and Energy Resources Authority

Program is found in the following core budget(s): Environmental Improvement and Energy Resources Authority

7b. Provide an efficiency measure.

Interest savings to communities through SRF water and wastewater program

Note: Interest savings reflect only the interest rate subsidy realized through our reserve fund model of financing. Another savings which is not easily quantified is the reduced interest rate achieved as a result of EI ERA's AAA bond rating. This rating, which is higher than the vast majority of Missouri communities, allows EI ERA bonds to be purchased at a lower interest rate than the communities could achieve by issuing their own bonds. Projections are very difficult to make as bond financing occurs as projects are ready to proceed. Many variables, such as business climate and interest rates can impact when a company or community will come to the Authority for financing.
